Built Environment, Sustainability & Geography Catalogue

January - June 2026
New and Forthcoming Titles

Welcome

Welcome to the January to June 2025 Built Environment, Sustainability & Geography Catalogue.

We welcome your feedback on our publishing programme, so please do not hesitate to get in touch – whether you want to read, write, review, adapt or buy, we want to hear from you, so please visit our website below or please contact your local sales representative for more information.

www.routledge.com

Prices and content are correct at time of going to press and may be subject to change without notice. Some titles within this catalogue may not be available in your region.

eBooks

We have over 50,000 eBooks available across the Humanities, Social Sciences, Behavioural Sciences, Built Environment, STM and Law, from leading Imprints, including Routledge, Focal Press and Psychology Press. These eBooks are available for both individual and institutional purchase.

INDIVIDUALS

Our eBooks are available from Amazon, Apple iBookstore, Google eBooks, Ebooks.com, Kobo, Barnes & Noble, Waterstones, Mobipocket, VitalSource, and CourseSmart.

LIBRARIES AND INSTITUTIONS

Subscribe to or purchase a wide range of eBook packages or pick and mix your own from our complete collection (a minimum number of titles applies). FREE TRIALS are available. For more information, please visit www.tandfebooks.com or contact your local sales team.

eUpdates

Register your email at www.tandf.co.uk/eupdates to receive information on books, journals and other news within your area of interest.

(Un)Common Precedents in Architectural Design

Edited by **Federica Goffi, Isabel Potworowski, Kristin Washco**

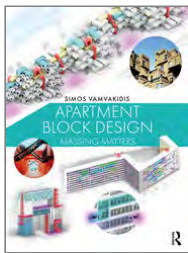

This book calls for an attentive examination of the uncommon that inspires creativity, prompting a re-examination of both common and marginalised precedents. It addresses a critical need to re-examine architectural precedents, understanding why, how, and what we study to reveal the intentions, transmedia explorations, and referents behind the workings of a more inclusive architectural imagination nurtured in multicultural practices and teaching environments. The book offers an alternative to the compulsion to normalise, universalise, repeat, restate, and re-enact, transforming the documentation of far-removed precedents through first-person experiences.

Apartment Block Design

Massing Matters

Simos Vamvakidis

This architectural design book focuses on massing studies for multi-unit housing projects; namely apartment blocks. It provides a fresh look at architectural synthesis for architects, students and architecture curious readers, focusing on multi-unit housing projects. The book re-examines the apartment block as a design model, for today and tomorrow, through a simple, flexible and explicit design approach. The innovation of this book lies in the idea that any type of apartment block can be designed and understood using three basic fundamental elements: Housing Units, Circulation and Communal Spaces.

Architecture and Progress

Exploring a Progressively Problematic Built Environment

Edited by **Mark Blumberg, Matthew Hall**

This volume proposes an interdependent relationship between progress and obstacles in architecture and the built environment. It challenges the positive notion of progress, and the conception of progress and obstacle as a dichotomy. For shapers of the world, finding 'the solution' is often a mark of progress that becomes embedded in culture, society, and history. This will be interesting reading for upper-level students and scholars of Architecture, Urban Design, Philosophy, and Sociology.

Architecture as Environmental Media

Rendering the Planetary

Edited by **Daniel Jacobs**

This edited volume explores the agency of environmental media in architectural production. As design disciplines confront the changing landscapes and consequences of climate breakdown, media for communicating socio-environmental relations play an increasingly critical role in defining new narratives for the future of our planet. Exploring architecture and design through the lenses of media theory, environmental studies, visual studies, geography, and landscape, this book will engage students and scholars from a wide range of disciplines.

Architecture in the Baltic States

Cities, Landscapes and Heritage of Estonia, Latvia and Lithuania

Edited by **Marco Falsetti**

Series: *Routledge Research in Architecture*

This book explores the architecture of the Baltic States, a region still relatively unexplored in architectural literature. Nevertheless, this collection of essays provides readers with a comprehensive overview of the urban architectural environment of the three countries that make up the Baltic region: Lithuania, Latvia and Estonia.

Architectures of Ageing in Place

Edited by **Anuradha Chatterjee**

Architectures of Ageing in Place provides curated critical perspectives, from a practice-based research point of view, of buildings that are purpose built and/or refurbished to accommodate housing and care needs of older people aging in place in high rise/medium rise integrated communities. Taking a broad, interdisciplinary approach, this book will be a helpful reference not only for architects, designers and urban planners but also students and practitioners in health and social care, gerontology/ageing, and medical sociology.

Building and Unbuilding the City Museum

From Le Corbusier to Ahmedabad

Edited by **Sarosh Anklesaria**, **Lily Chi**

Series: *Routledge Research in Architecture*

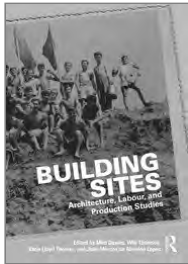

Sanskar Kendra stands as one of Le Corbusier's lesser-known architectural achievements, a cultural center designed for post-independence Ahmedabad that now faces an uncertain future. This book examines Sanskar Kendra both as a physical artifact and as a site of broader cultural debates.

Building Sites

Architecture, Labour, and Production Studies

Edited by **Matt Davies** Newcastle University, UK, **Will Thomson**, **Katie Lloyd Thomas**, **João Marcos de Almeida Lopes**

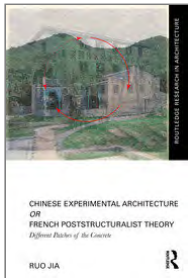

Building Sites addresses the urgent need to advance the critical understanding of relations between architectural design and the labour of building. Through its engagement with the ground-breaking work of the architect and theorist Sérgio Ferro, who developed a history of architecture 'seen from the building site', the book sets out a programme for a new field of Production Studies for architecture and other disciplines.

Chinese Experimental Architecture Or French Poststructuralist Theory

Different Patches of the Concrete

Ruo Jia

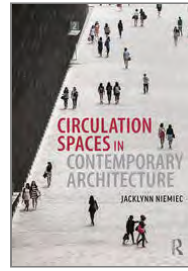

Series: *Routledge Research in Architecture*

Chinese Experimental Architecture Or French Poststructuralist Theory starts with a paradox: how the Chinese Cultural Revolution—through its adaptation by French Theory and French Theory's subsequent adaptation by Chinese Experimental Architecture—shaped the Chinese reformative effort to redefine itself, amidst its struggle against colonial dynamics, and against the Cultural Revolution.

Circulation Spaces in Contemporary Architecture

Jacklynn Niemiec

The winding paths of ants and the intricate stories of city streets reveal how movement is shaped by forces beyond mere efficiency. In architecture, however, circulation is often viewed as a technical requirement—corridors, stairs, and ramps—designed for easy passage. Drawing from architecture, neuroscience, and design theory, Niemiec invites architects, interior designers, students, and readers interested in the built environment to reconsider the spaces in between. Whether you design buildings or simply navigate them, this is an invitation to see circulation spaces as connective, temporal spaces that link people, context, and change.

Collaborations in Architecture and Sociology

Anita Bakshi, **Zaire Dinzey-Flores**

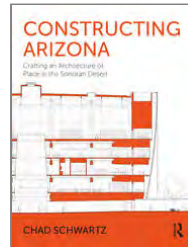

This book, by an architect and a sociologist, addresses the disconnect between the design of the built environment and social life and lays out a pathway for interdisciplinary engagement. Through this collaboration, the authors create a new interdisciplinary orientation and methodology, termed SOCIOARC, that recognizes the relationship of the built form and aesthetics to social experience. Accessibly written and illustrated, this book will be an essential resource for undergraduate- and graduate-level students of sociology, architecture, urban design, landscape architecture, and planning, and all those interested in shaping a more just, equitable society through our built environment.

Constructing Arizona

Embracing an Architecture of Place in the Sonoran Desert

Chad Schwartz Southern Illinois University–Carbondale, USA

This book is the first to comprehensively present the architecture of the Sonoran Desert region of Arizona, balancing a breadth of projects with a depth of analysis. Building on over fifty interviews with noted members of the architecture community in Arizona and the critical first-hand analysis of their built work, this book reveals the inherent principles, vocabulary, and influences of the regional architecture while also tying its contemporary makeup to a lineage of constructing in the Sonoran Desert. Given the current state of our planet, these lessons will be of critical importance to communities across the globe that soon may have to adapt to living in similar conditions.

Contemporary Latin American Architecture

Other Traditions

Edited by **Inés Martín-Robles**

Not a typical overview of Latin American Architecture, the book uncovers a series of lineages, often hidden or overlooked by international critics. In each chapter, prominent contemporary architects across Puerto Rico, Paraguay, Chile, Uruguay, Mexico, Peru, Ecuador, Colombia, Costa Rica, and Argentina, position their work within both historical and contemporary local and international traditions. This will be a crucial read for all researchers and students of Latin American architecture, history, and cultural heritage, as well as all those interested in exploring non-western, Global South, and non-canonical architectural traditions.

2ND EDITION

Creating Sensory Spaces

The Architecture of the Invisible

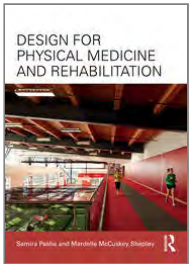

Barbara Erwine University of Washington, USA

Creating Sensory Spaces celebrates spaces enlivened with sensual richness and provides you with the knowledge and tools necessary to create them. Drawing on numerous built case studies in ten countries and illustrated with over 85 full color images, the book presents a new framework for the design of sensory spaces including light, color, temperature, smell, sound, and touch. Bridging across disciplines of architecture, interior design, engineering, phenomenology and perceptual psychology, this book informs the design of buildings and neighborhoods that reclaim the role of the body and all the senses in creating memorable experiences of place and belonging.

Design for Physical Medicine and Rehabilitation

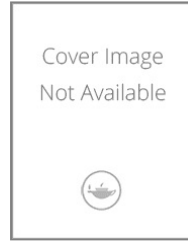

Samira Pasha, Mardelle McCuskey Shepley

This book provides a brief introduction to Physical Medicine and Rehabilitation and its historical and global context for readers interested in the role of design. It introduces various settings where rehabilitation can be provided and their relevant patient demographics, influential trends, and available research to paint a full picture for readers who wish to better understand this field. The book lays the groundwork for making design decisions by sharing available standards, project case studies, environment & behaviour literature, and applicable theories.

Designing Sustainable Residences for Human Wellbeing

Lisa Tucker

This book is a how-to manual for designing sustainable residences for human wellness. While the commercial market has embraced these principles, the residential market lags behind. Residential designers work much more intimately with clients and are attuned to specific and individual needs. Including information on residential programming, space planning, materials, building systems, energy and water efficiency, this will be a helpful and complete guidebook for all residential designers and students of residential interior design and architecture.

3RD EDITION

Designing Tall Buildings

Structure as Architecture

Mark Sarkisian Skidmore Owings & Merrill, San Francisco, USA

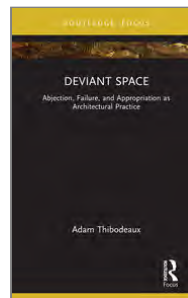

This third edition of Designing Tall Buildings is an enhanced and accessible reference that guides the reader through the fundamental principles of designing high-rise buildings. This new edition includes four new chapters, including initial concepts for tall building design, techniques for optimization, considerations for carbon and the use of alternative materials such as timber. The third edition also includes 300 additional illustrations, and current code requirements and equations. This third edition is a must-have reference for students and designers.

Deviant Space

Abjection, Failure, and Appropriation as Architectural Practice

Adam Thibodeaux

Deviant Space: Abjection, Failure, and Appropriation as Architectural Practice frames architecture as a fragile Symbolic construct, susceptible to appropriation, disruption, and reorientation by deviant bodies. Anchored in phenomenology and queer theory, it examines how spatial practices subvert architectural function, with particular focus on the tactics of men who have sex with men (MSM) in major North American cities during the AIDS epidemic.

3RD EDITION

Diagramming the Big Idea

Methods for Architectural Composition

Jeffrey Balmer University of North Carolina at Charlotte,
Michael Swisher University of North Carolina at Charlotte

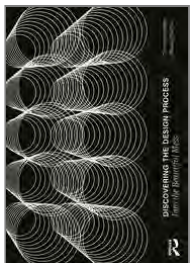

Becoming an architect is a daunting task. Beyond the acquisition of new skills and procedures, beginning designers face an entirely unfamiliar mode of knowledge: design thinking. In *Diagramming the Big Idea*, Jeffrey Balmer and Michael T. Swisher introduce the fundamentals of design thinking by illustrating how architects make and use diagrams to clarify their understanding of both specific architectural projects and universal principles of form and order. The goal of this book is to make explicit to students what they are learning, why they are learning it and how to internalize such lessons toward their lifelong development as designers.

Discovering the Design Process

Into the Beautiful Mess

Courtney Windham , Margaret Fletcher Auburn University, Auburn, Alabama, USA

Designers seek moments of creative bliss when everything aligns, stress dissolves, and decisions flow effortlessly. This book celebrates that vibrant, messy process. Through rich photography of everyday studios and thoughtful conversations with artists, designers, and makers from across disciplines, it offers an intimate glimpse into how ideas are formed and refined. Whether you're a student, an emerging creative, or an experienced practitioner, this book invites you to recognize—and embrace—the unique nature of your own design journey, and find inspiration in the glorious chaos of making.

Double-Design for Durable Architecture

Long-life Fabric and Function for the Democratisation of Space

Michael Cassidy

Through the assessment of compatibilities of the physical requirements for buildings serving different uses over time, the book suggests an approach that establishes a long-life infrastructure within which shorter-life and recyclable material may be used in the fit-out to serve each successive use. Over time, the implementation of Double-Design would provide buildings that are more suited to changing needs. This is essential reading for practising architects, those entering the profession, and anyone interested in the built environment's future.

Encounters with Architecture

Insights from a Hundred Places

Howard Davis University of Oregon, USA

This book describes one hundred memorable places that have been important in the architectural career of the author, as a practitioner, teacher and writer. The illustrated essays provide insights from a variety of buildings and places on five continents: from different eras, from the everyday to the famous, from houses to public buildings, and from streets to cities. With hundreds of beautiful photographs, supplemented by helpful diagrams and drawings, the book is organized and written in a way that is accessible to a wide audience and will interest everyone who is fascinated by architecture and cities, including teachers, practitioners and students.

Environmental Design for Health

A Framework and Visual Guide

Edited by **Xuemei Zhu , Mardelle McCuskey Shepley , Zhipeng Lu**

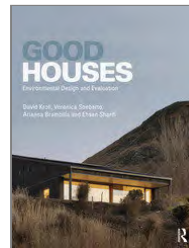

This book provides a user-friendly guide to the impact of environmental design on individual and population health, as well as the relevant roles of social and behavioral factors. It explores how architecture, interior design, landscape architecture, and urban planning can contribute to a healthier, more equitable, and more resilient society. Employing an evidence-based and solution-oriented approach, it provides a much-needed textbook for environmental designers and public health professionals.

Good Houses

Environmental Design and Evaluation

David Kroll , Veronica Soebarto , Arianna Brambilla , Ehsan Sharifi

Good Houses brings together the design process, building science, and the environmental systems that can be used by both teachers and students in teaching and learning about designing good, 'responsible' houses. The book approaches housing design holistically by taking its environment as the starting point, integrating design processes more closely with architectural science and environmental systems. It is essential reading for those designing residential projects.

Routledge

Housing Standardisation and Design Governance

Cover Image
Not Available

Sam Jacoby , Alvaro Arancibia

This book examines how housing design governance shapes the quality of homes and the wellbeing of residents, analysing the political, economic, social, historical, and environmental drivers of design. Combining historical, technical, and social perspectives, this interdisciplinary design research study provides a multidimensional understanding of housing quality. It offers practical insights for policymakers, housing providers, and designers, showing how lived experience can inform future standards and policies to create more inclusive, adaptable, and sustainable homes and communities.

Imaginative Reasoning in the Shaping of Buildings

Cover Image
Not Available

Sonit Bafna Georgia Institute of Technology, Atlanta, Georgia, USA

Imaginative Reasoning in the Shaping of Buildings proposes that buildings evoke the viewer's recreative imagination and this matters to the shaping of buildings. Author Sonit Bafna argues that three topics in human cognition—explanation and interpretation, attention, and imagination—support this idea, and he draws from psychology, studies of vision, aesthetics, and philosophy of mind and science.

Modelling Social Housing

Exploring the Interplay of Social Life and Built Environments on European Social Housing Estates

Edited by **Mikkel Høghøj** Aarhus University, Denmark,
Mette My Madsen , Anne Corlin , Morten Nielsen
Aarhus University, Denmark

Series: Explorations in Housing Studies

This book delves into the intricate relationship between everyday social life and the architectural landscapes of social housing across European cities. Focusing on social housing across multiple temporal and socio-cultural European urban settings, the book traces how the confluence of distributed knowledges, technological resources, and architectural histories may have considerable effects across different scales, ranging from everyday interactions to welfare planning and economic policies. To capture these intricate socio-spatial relations, the book introduces the concept of 'social urban modelling' as a novel analytical approach to social housing research.

Modern Architecture in the Balkans

From Le Corbusier to Tito

Lorenzo Pignatti

Series: Architect

This book is an attempt to comprehend the reasons for modernity in the Balkans, beginning with the famous Journey to the East undertaken by Charles-Edouard Jeanneret in 1911. However, the modernity that developed after the Second World War would not have existed without the figure of Josip Broz Tito. While there is no direct relationship between them, this book presents a series of intersecting relations, beginning with the interpretation of Yugoslavia's cities and architecture, to trace a path that gives this region an unquestionably central position in the international architectural panorama of the twentieth century.

Nietzsche for Architects

Lucy Huskinson University of Bangor, Wales, UK

Series: Thinkers for Architects

In the bewildering array of architectural positions that lay claim to Nietzsche as an influence, how can we begin to make sense of Nietzsche's own approach to architecture? And how can we identify within his complex philosophy the key ideas and themes we require to make sense of his contribution to architecture? This first introduction to Nietzsche's philosophy written specifically for architects locates his evaluation of appropriate and inappropriate architecture in the body of his writings and presents a clear overview of Nietzsche's insights into architectural design alongside his advice for architects and designers.

On Care and Architecture

An Auto-Ethnographic Approach

Anthony Clarke

Series: Routledge Research in Architecture

This book argues that current techniques and representation of architectural practice can take on greater significance and generate a more meaningful societal and professional contribution if they are developed through a lens of care. This lens of care, however, requires a fundamental repositioning in the way architects and designers orientate themselves within each project.

Open Design in Practice

Frans van der Werf

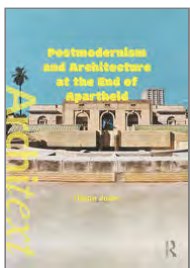

Series: Open Building

Architect and urban planner Frans van der Werf discloses in this book his own experiences as one of the pioneers of the worldwide Open Building approach. In this book he shares his practice over the course of four decades in four Urban Tissue projects and seven Support Structures in the Netherlands and abroad. They still stand today, as exemplars of how this approach can produce affordable user-centric environments of high-quality that balance the Common and the Individual spheres. This book is essential reading for students, architects, urbanists, developers and city authorities who want to consider Open Building for a truly sustainable environment.

Postmodernism and Architecture at the End of Apartheid

Hilton Judin University of Witwatersrand, South Africa

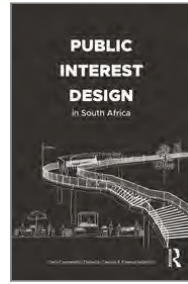

Series: Architect

Set against a social and political urban landscape of segregation and forced removals, Postmodernism and Architecture at the End of Apartheid unpacks postmodernism in the 1970s and 80s as it unfolds in South Africa during the final brutal decade of apartheid. Architecture and apartheid are central subjects of the book—the ways they came to interact simultaneously to both buttress and undermine a country rapidly disintegrating. With battles waged in defence of white minority rule, architects' turn to postmodernism reflected their disintegrating consciences and commitments in operating in uncertain times.

Public Interest Design in South Africa

Carin Combrinck, Claire du Trevou, Tshelo Mokholo

This book presents salient examples of architectural projects and practices in South Africa since 1994 that collectively subscribe to the paradigm shift towards Public Interest Design. Despite radical political transformation in the country, the people of South Africa remain adversely affected by the socio-spatial legacies of a segregated urban landscape. Serving as a microcosm of the challenges to integration and democracy faced by society globally, this book will be of great interest not only to scholars and students of architecture, urban planning, and development studies in South Africa, but also internationally.

2ND EDITION

Residential Retrofit

24 Case Studies

Marion Baeli

The essence of sustainability in buildings is their capability to adapt to change over time. The UK has a large housing stock that has been developed and evolved over generations, and become the fabric and character of our cities, towns and neighbourhoods. The capability of buildings to adapt to changing lifestyles is the root of their sustainability. This book presents a series of innovative and best practice case studies of residential low energy retrofit projects, and illustrates what has been achieved in practice in the UK.

Robotics for Architectural Restoration

Sara Codarin

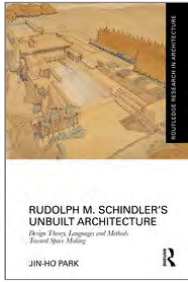

In the current age of automation, there is a growing opportunity to connect design and manufacturing into a single workflow that harnesses industrial tools such as robots and brings their efficiencies to vulnerable building sites within the conservation of cultural heritage. The first book to comprehensively research the intersection of robotics, digital fabrication, restoration theory, and digital technologies in data collection, this will be of great interest to all students and professionals supporting architectural restoration and conservation, as well as those working in robotics and AI for the architectural and construction industries.

Rudolph M. Schindler's Unbuilt Architecture

Design Theory, Languages and Methods Toward Space Making

Jin-Ho Park

Series: *Routledge Research in Architecture*

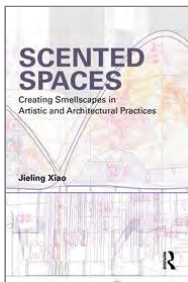

This book explores Rudolph M. Schindler's design theory, architectural language, and methods, with a focus on his unbuilt projects. Drawing from his lecture notes, manuscripts, and drawings, it offers fresh insights into Schindler's legacy, emphasizing how his work diverged from mainstream modernism and deserves greater recognition in modern architectural history.

Scented Spaces

Creating Smellscapes in Artistic and Architectural Practices

Jieliang Xiao

This book explores the overlooked role of smell in architecture, design, and urban life, positioning olfaction as a powerful medium for shaping place, atmosphere, and experience. Smells are conceptualised as spatial design materials and it shifts the paradigm of smells from the intangible to the tangible with new concepts of "scentability", "scentography" and "scentonics". Case studies from art, architecture, and urban design illustrate practical interventions, from scented materials to landscapes and devices, showing how olfactory design operates across scales and durations.

Soft Design

Aesthetic Experience at the Intersection of Materials, Technology & Interaction

Liliana Becerra

Soft Design explores an emerging design language of emotional aesthetics that merges emotive and sensory design with ancient and new technology to create multidimensional and multisensorial experiences. Soft Design integrates tangible and intangible expression of the aesthetic experience with scientific research. This will be interesting reading for a wide range of design practitioners – interior, industrial, interaction, spatial, digital, sensory, and UX designers – as well as those working in neuroaesthetics and in the converging fields of health, science and design.

Speculative Architectures after Minoritarian Futurisms

Joel P.W. Letkemann

Series: *Routledge Research in Architecture*

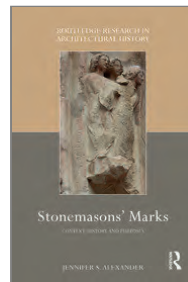

Speculative Architecture after Minoritarian Futurisms is a work of architectural theory which understands architecture as a practice of speculation analogous to science fiction. While it might seem immediately obvious, especially given the discipline's legacy of fantastical invention and commitment to 'the future,' this book argues that this hypothetical conjunction offers a highly sophisticated critical perspective on the discipline, arguing that the only way to deal with the complex challenges of the present is in processes of speculation and ethical commitment to imagining futures evinced in minoritarian futurisms.

Stonemasons' Marks

Context, History and Purposes

Jennifer Alexander

Series: *Routledge Research in Architectural History*

This book investigates the historical and functional significance of Stonemasons' marks—symbols inscribed on individual stone blocks—as a communicative practice within the architectural and construction industries. Masons' marks exist for practical reasons and have been in use for over 4000 years. Marks stood outside literacy and acted as a form of communication within the stone-working environment that has parallels with systems of visual signs used elsewhere. This book presents an analysis of masons' marks, moving the debate away from a search for meaning to an appraisal of their roles.

Structural Design of Lightweight Architecture

Joshua Schultz, Christian Stutzki

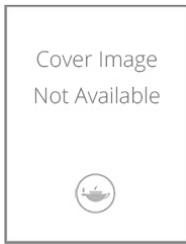

This survey of lightweight specialty structures provides in-depth case studies supplemented with technical guidance and an overview of fundamental theories. Drawing on almost 75 years of combined professional and academic experience, the authors guide readers through design of lightweight systems: spaceframes, grid shells, cable nets, ETFE membranes, rails, stairs, and canopies. Written for structural architecture students and early career professionals, this book is an essential introduction to the fundamentals of each lightweight structural system.

2ND EDITION

Tall: the design and construction of high-rise architecture

Edited by **Guy Marriage** Victoria University of Wellington, New Zealand

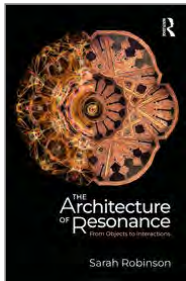

This second edition of TALL has been updated with new information about the construction of high-rise architecture. A lot has happened in the world since 2019 when the first edition was published and so the updates respond to these changes. In addition to the existing illustrations, there are 34 new illustrations in clear black and white, to assist further understanding of the revised material. Overall, this new edition continues to provide a practical guide and desk-reference to any architect or architecture student embarking on a tall building project.

The Architecture of Resonance

From Objects to Interactions

Sarah Robinson

This book carefully details an alternative for thinking and designing that shifts attention from abstract formalism and object orientation to the creation of dynamic interacting fields of affective, tactile, kinaesthetic, ecological and social engagement. The book articulates resonance as a model and metaphor for the way we interact with our environments. Seamlessly combining architecture with cognitive science and neuroscience, environmental and evolutionary psychology, and social theory and anthropology, in clear, direct and engaging prose, this book will be essential reading for all architecture students as well as those in these varied fields.

2ND EDITION

The Complete Guide to Perspective Drawing

From One-Point to Six-Point

Craig Attebery Art Center, Pasadena, California, USA

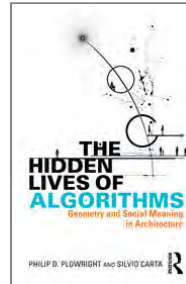

As a professional, understanding the foundations of drawing, how we process images, and how we interpret what we see are principal skills. Understanding linear perspective enables artists and architects to accurately communicate their ideas on paper. With over 400 simple, clear drawings, written explanations, video tutorials, exercises, as well as historical and theoretical background, this book is an essential visual guide for current and future architects, interior designers, landscape architects, graphic designers, video game designers, animators, and artists.

The Hidden Lives of Algorithms

Geometry and Social Meaning in Architecture

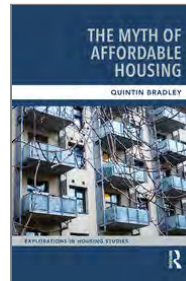

Philip D. Plowright, **Silvio Carta** University of Hertfordshire, UK

As generative and analytic algorithms increasingly automate the design of our built environment, the power of simple geometrical notation to affect social meanings becomes both more powerful and more elusive. This book examines how the geometric outcomes of spatialised algorithmic operations influence more complex human experiences of accessibility, belonging, and identity as well as shape the dynamics of equity, connectivity, privacy, and power in architectural and urban spaces. It challenges designers to look beyond technical implementation, urging a critical awareness of how computational processes can reinforce or reimagine the social fabric of our shared spaces.

The Myth of Affordable Housing

Quintin Bradley

Series: Explorations in Housing Studies

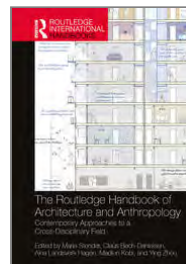

Affordable housing makes housing unaffordable. The Myth of Affordable Housing is a critique of the abject failure of affordable housing policies to address a global crisis of need. It is an evaluation of affordability as a policy goal, and it investigates the political economy of housing from a Marxist perspective.

Routledge
March 2026 : 200pp

The Routledge Handbook of Architecture and Anthropology

Contemporary Approaches to a Cross-Disciplinary Field

Edited by **Marie Stender**, **Claus Bech-Danielsen**, **Aina Landsverk Hagen** Oslo and Akershus University College of Oslo, Norway, **Madlen Kobi**, **Ying Zhou**

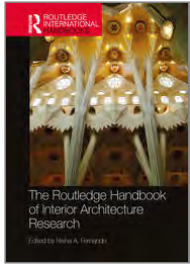

Series: Routledge International Handbooks

This Handbook provides fresh insights into the debates and challenges that unfold in the cross-disciplinary field of architecture and anthropology. Based on studies of empirical contexts across the globe, the authors launch and test a broad variety of methods and advance various theoretical concepts.

Routledge

Upkeep, Repair, and Maintenance in Adaptive Interiors

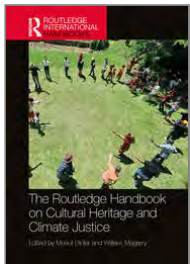

Edited by **Amy Campos** California College of the Arts, USA
, Deborah Schneiderman Pratt Institute, USA, **Keena Suh**, **Karyn Zieve** Pratt Institute, USA

This volume explores issues of repair, maintenance, sustenance, and adaptation within the context of interior design and its histories. This will be of great interest to all students and academics of interior design, as well as architecture, architectural conservation, visual culture, history of art, and all those interested in the theory and philosophy of the reuse of interiors.

The Routledge Handbook on Cultural Heritage and Climate Justice

Edited by **Mesut Dinler**, **William Megarry**

Series: *Routledge International Handbooks*

This volume contains contributions from over 60 authors from 20 countries exploring the importance of climate justice and equity in climate action. While focused on cultural heritage, its relevance extends into other fields including policy, just transitions, development studies and climate adaptation. Its central message is that climate action and climate justice are inseparable in our response to the climate crisis.

Theorising Interior Architecture and Design

Identity, Practices, Education, and Beyond

Edited by **Carola Ebert** Berlin International University of Applied Sciences, Germany

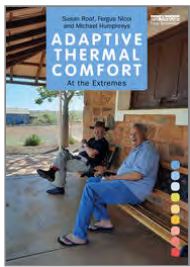

This book looks at interior architecture and design from a contemporary and international perspective, taking theory building to be one of the most important acts of defining a discipline. It explores the interior discipline's theoretical dimension and its pedagogical, professional and creative practices in different settings across the globe. The book's scrutinising discourse provides a compelling theorisation of interiors as a multi-lingual, culturally situated discipline. It is essential reading for everyone concerned with interiors – practising, studying or working in educational and professional institutions.

Adaptive Thermal Comfort

At the Extremes

Susan Roaf Heriot-Watt University, UK, **Fergus Nicol** London Metropolitan University, UK, **Michael Humphreys** Oxford Brookes University, UK

This book is the third in a three-volume set covering all aspects of adaptive thermal comfort. It provides a simple, step by step method for designing comfortable low energy buildings in any climate. Building on the academic principles, practices and fundamental research described in the first two volumes this book is written for building designers, owners, occupants, planners, architectural engineers, self-builders, renovators and educated laymen. It has been written to demystify the art and science of the performance and impacts of buildings and to explain how to, in practice, achieve adaptable, well-behaved and well-liked buildings.

Advancing Real Property Valuation

AI, Drone and Emerging Digital Technologies in Professional Practice and Education

Edited by **Johari Amar** Bond University, **Lynne Armitage** Bond University

Digital technologies are reshaping the way property and asset values are assessed, regulated and trusted. From automated valuations to drone-assisted site inspections, these advances are influencing professional practice and testing the legal, regulatory and institutional frameworks – including those established by IVSC, API and RICS. This book examines how AI, drones and emerging digital tools are being integrated into valuation processes across varied contexts. Its scope extends beyond traditional property valuation to urban markets, public assets, infrastructure and ESG assessments. Drawing on insights from leading academics and industry experts in Australia and internationally.

An Adaptive Safety Incentives Framework for Construction Organisations in Developing Economies

Kunle Ogundipe, **Babatunde Fatai Ogunbayo**, **Clinton Aigbavboa** University of Johannesburg, South Africa

Series: *Routledge Research Collections for Construction in Developing Countries*

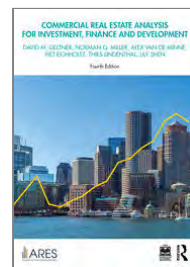

The central aim of this book is to study safety incentives in a construction context and conceptualise an incentive framework for construction organisations in developing economies. By explaining the behavioural approach to creating reward systems that minimize unintended consequences and maximize happiness, health, wealth, and success, the book takes a pragmatic approach to developing safety incentives and provides significant practical insights. The book will interest professionals in construction, project management, quantity surveying, civil engineering, human resource management, OSH and owners of construction organisations as well as researchers in all these fields.

4TH EDITION

Commercial Real Estate Analysis for Investment, Finance and Development

David M. Geltner, **Norman G. Miller**, **Alex Van De Minne**, **Piet Eichholtz**, **Thies Lindenthal**, **Lily Shen**

Series: *The American Real Estate Society (ARES) Real Estate Thought Leadership Collection*

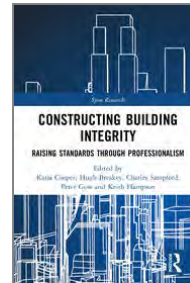

Commercial Real Estate Analysis for Investment, Finance and Development, a fully revised fourth edition of the authors' leading textbook, presents the foundations of real estate investment analysis with the rigor of general finance and economics. This book introduces the essential building blocks of the field: market assumptions, valuation, financial analysis, and development. Drawing from extensive academic and industry experience, the authors approach the investment analysis process using a combination of theory and practical tools in a discussion tailored to advanced students.

Constructing Building Integrity

Raising Standards through Professionalism

Edited by **Katja Cooper** Griffith University, **Hugh Breakey** Dr Hugh Breakey is a Research Fellow at Griffith University, Australia., **Charles Sampford** Griffith University, Australia, **Peter Gow**, **Keith Hampson** Sustainable Built Environment National Research Centre (SBEnrc), Curtin University, Australia

Series: *Spon Research*

Constructing Building Integrity examines how ethical and professional standards can be raised in the residential apartment sector. The book brings together experts from a range of disciplines across the built environment and professional standards to make a significant contribution to the existing literature on professional ethics in the construction industry. Essential reading for scholars of governance, professionalism, professional ethics, integrity and construction management as well as reflective practitioners and policy makers in the built environment.

Construction Business for the 21st Century

Managing Risk and Improving Profits

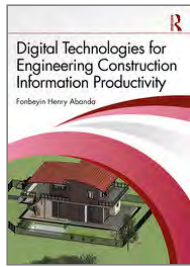

Thomas C. Schleifer

This book covers the business side of construction contracting. This book provides 21st century processes, procedures and practices that will advance the construction industry into the future. Drawing from decades of research into the causes of contractor failure, the author offers solutions for improved profits and risk management and identifies "legacy" industry practices that have become obsolete. Whether a General Contractor, Construction Manager, specialty contractor, credit grantor, or student, this book will provide a thorough understanding of the intricacies and complexities needed to succeed in the construction business.

Digital Technologies for Engineering Construction Information Productivity

Fonbeyin Henry Abanda

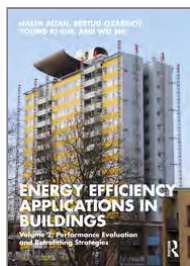

This book goes beyond other digital construction books by examining how emerging digital construction technologies and other popular technologies developed by, for example, Microsoft, can be used in improving the productivity of construction information. The book discusses both the theory and practice through use case illustrations in integrated software environments and successfully blends applications and workflows of construction technologies with more common and non-industry specific software systems. This book is essential for students, academics, educators, construction professionals and construction software developers.

Energy Efficiency Applications in Buildings

Volume 2: Performance Evaluation and Retrofitting Strategies

Hasim Altan , Bertug Ozariso , Young Ki Kim , Wei Shi

Energy Efficiency Applications in Buildings presents an investigation into the energy use and measures to improve the energy efficiency of existing building stock in the UK. The aim of this research is to assess the domestic energy use of statistically representative residential buildings and their occupants' thermal comfort by considering the significant impact of overheating risks on energy consumption and occupants' well-being.

Fire Prevention in Modern Construction

A Practical Guide

Matthew J. Bourque

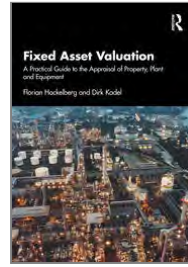

Fire Prevention in Modern Construction: A Practical Guide introduces and explains the fundamentals of construction fire safety. It explores applicable codes and standards while providing a fundamental understanding of common fire protection and life safety systems found in buildings. This book is an essential resource for those serving as a Fire Protection Program Manager (FPPM), but also equips professionals in the construction, real estate, engineering, property management sectors with the necessary fire prevention fundamentals to support real estate projects and keep them safe.

Fixed Asset Valuation

A Practical Guide to the Appraisal of Property, Plant and Equipment

Florian Hackelberg , Dirk Kadel

The valuation of fixed assets is a core discipline at the intersection of finance, accounting, and asset management. As industries face increasingly complex regulatory frameworks and global market dynamics, developing a solid understanding of valuation principles is essential for both academic study and professional practice. This comprehensive book offers a structured, academically rigorous introduction to the appraisal of property, plant and equipment, bridging theoretical depth with real-world application. It is a robust resource for students, researchers, and early-career professionals seeking to build advanced expertise in asset valuation.

Fundamentals of Construction Project Delivery Systems

Yong-Woo Kim University of Washington, USA

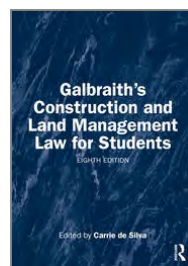

Fundamentals of Construction Project Delivery Systems advocates for a transformative approach that places emphasis on integrated methodologies such as design-build and integrated project delivery. In addition, the book embraces new approaches in the industry: framework, program-based procurement, and positioning project delivery system as a design endeavour to define an organizational structure. This book offers guidance on how owners can effectively leverage integrated approaches to enhance project outcomes. For educational purposes, the book offers guidance for undergraduate and graduate students in project delivery method courses within construction management programs.

8TH EDITION

Galbraith's Construction and Land Management Law for Students

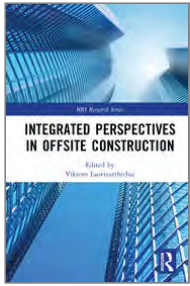

Edited by **Carrie de Silva** Harper Adams University, UK

Clearly written and with wide ranging coverage of key legal principles, this textbook highlights the need for students on built environment related courses to access information on how the law relates to their profession, without getting into the heavy detail of the full-scale legal texts. All chapters in this eighth edition have been updated with new case law along with statutory and regulatory changes and provide the background to the English legal system before covering key topics such as contract law, tort, health and safety, land law, planning, landlord and tenant, dispute resolution and employment law.

Integrated Perspectives in Offsite Construction

Edited by **Vikrom Laovisutthichai**

Series: *BRI Research Series*

Integrated Perspectives in Offsite Construction offers a comprehensive analysis of the multifaceted aspects of offsite construction and addresses critical gaps to advance this promising field. The book broadens the scope of offsite construction beyond manufacturing and assembly, incorporating the entire building life cycle from pre-construction (e.g., project initiation and design) to post-construction (e.g., occupancy and evaluation) to provide an integrated perspective. With its holistic view and practical insights, it is a valuable resource for researchers, practitioners, educators, and industry professionals seeking to navigate and advance offsite construction.

Integrating Occupational Safety and Health using Digital Technologies

The case of Building Information Modelling

Manuel Tender, Matej Mihic, Firmino Oliveira da Silva, João Pedro Couto, Paul Anthony Fuller, Peter Demian, Kitty Karolyfi, Rania Wehbe, Radhlinah Aulin

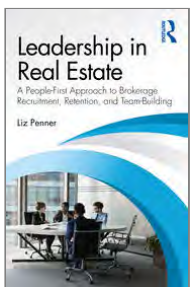

This book is designed to help practitioners understand the growing potential for the use of Building Information Modelling (BIM) to improve Occupational Safety and Health (OSH) outcomes in the Architecture, Engineering, Construction and Operations sector. Through a series of cutting-edge practical cases, an international team of researchers and practitioners examine the benefits, barriers and challenges associated with the introduction of new digital information technologies in OSH settings. The BIM applications are presented in a practical manner, making them easily applicable by the construction project professional, as well as informative for the academic researcher.

Leadership in Real Estate

A People-First Approach to Brokerage Recruitment, Retention, and Team-Building

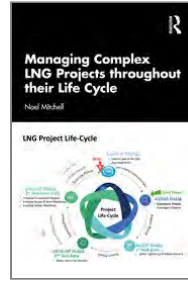

Liz Penner

Leadership in Real Estate: A People-First Approach to Brokerage Recruitment, Retention, and Team-Building offers a relationship-focused approach to brokerage leadership, grounded in behavioral insights, practical tools, and real-world experience. Recruitment and retention are more than just business strategies: they're about building relationships, creating trust, and creating an environment where agents feel they belong. Whether launching a new brokerage, stepping into a leadership role, or simply reimagining what's possible, this book is ideal reading for managing brokers, team leaders, and other real estate professionals.

Managing Complex LNG Projects throughout their Life Cycle

Noel Mitchell

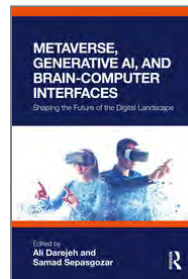

This book serves as an invaluable resource for both aspiring and experienced professionals in the field of LNG project management. It offers practical insights and strategies essential for navigating the complexities inherent in mega LNG projects. Readers will gain a comprehensive understanding of best practices and critical success factors, equipping them to effectively manage and deliver successful LNG initiatives. This book can offer targeted strategies and best practices for effective project management and is essential reading for oil and gas professionals, engineers and project managers worldwide.

Metaverse, Generative AI, and Brain-Computer Interfaces

Shaping the Future of the Digital Landscape

Edited by **Ali Darejeh, Samad Sepasgozar** University of New South Wales, Australia

Series: *Advanced Digital Technologies for the Built Environment*

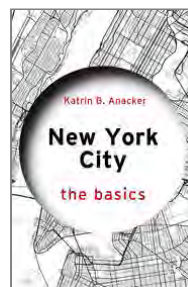

This compelling exploration delves into the heart of cutting-edge technologies, specifically the Metaverse, Brain-Computer Interfaces (BCI), and generative artificial intelligence (AI). The authors contemplate how the next generation of virtual environments will manifest, as well as how the digital landscape can be affected. Whether you're a student, educator, or industry professional, this book is your ticket to understanding and harnessing the power of the future. It provides a pathway for those who believe in the limitless possibilities that the Metaverse, BCI, and generative AI can bring to our daily experiences.

New York City

The Basics

Katrin B. Anacker

Series: *The Basics*

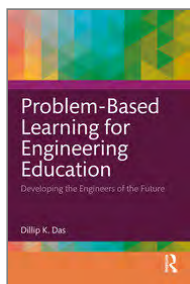

New York City: The Basics offers an accessible look at the dynamic and diverse hub of New York City. Written in a clear, engaging style, the book discusses geographic, historic, demographic, socioeconomic, housing, and governmental aspects in the Big Apple. The chapters touch on different topics, from the history to the demography and immigration, the economy, housing, government and governance, the city's exceptionalism, and more. This book serves as a valuable guide for undergraduate and graduate students in geography, urban studies, urban affairs, and urban planning, and would be an excellent resource for anyone planning a field trip to New York City.

Problem-Based Learning for Engineering Education

Developing the Engineers of the Future

Dillip K. Das Howard College

This book embarks on an in-depth exploration of Problem-Based Learning (PBL) in the context of engineering education. Its goal is to provide a comprehensive understanding of the genesis, potential, challenges, contemporary relevance and methodological approaches of PBL. The impetus behind this undertaking arises from the acknowledged challenges within engineering education, necessitating a fundamental paradigm shift. The book is a treasure chest for educators, researchers, and policymakers who want to make engineering education more effective and relevant, preparing the next generation of engineers to tackle the complex challenges our world faces.

PropTech Innovations in Real Estate Investment and Finance

Sustainable Futures

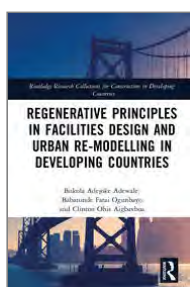

Yishuang Xu, Leo Ming-yan Lo, Andy King-man Yiu

The real estate industry is undergoing unprecedented transformations driven by emerging technologies and sustainability practices. This textbook explores the intersection of PropTech, blockchain and sustainability, shaping the future landscape of real estate investment and finance. The book is a straightforward guide to understanding how new technologies are changing the real estate industry. It explains in clear, everyday language the key digital innovations like artificial intelligence, virtual reality, and blockchain transforming how homes and buildings are designed, constructed, bought, sold, financed, and managed.

Regenerative Principles in Facilities Design and Urban Re-modelling in Developing Countries

Bukola Adejoke Adewale, Babatunde Fatai Ogunbayo, Clinton Aigbavboa University of Johannesburg, South Africa

Series: *Routledge Research Collections for Construction in Developing Countries*

In the face of rapid urbanization and environmental challenges, the developing world stands at a crossroads. Conventional sustainable design, often modelled on Global North precedents, is proving insufficient to address the deep-seated infrastructural and socio-economic complexities of these unique contexts. This book argues for a radical shift from simply minimizing harm to actively healing and restoring our communities and ecosystems through regenerative architecture. Moving beyond theory, this work provides a critical and practical roadmap for applying regenerative principles specifically in the challenging environments of developing nations.

40TH EDITION

Spon's Civil Engineering and Highway Works Price Book 2026

Edited by **AECOM** AECOM, London, UK

Series: *Spon's Price Books*

Captures real material, plant and labour costs from the UK's major live rail, civils and highways projects. Now in its 40th edition, SPON'S CIVIL ENGINEERING AND HIGHWAY WORKS PRICE BOOK 2026 from AECOM gives a full breakdown of labour, plant and material elements, with labour rates updated. Cost guidance is given at a number of levels, varying from the more general functional costs to detailed resource costing; and in conformity with CESMM4 and the Highways Method of Measurement, and updated to the CIJC wage agreement. Use the code inside the front cover of the book to get ebook access and use until the end of December 2026.

The Future of Real Estate Education

From Pedagogy to Technology

Edited by **Karen M. McGrath, Elaine Worzala, Pernille H. Christensen**

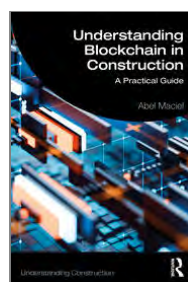

The Future of Real Estate Education brings together award-winning educators and researchers to address the complexity and challenges of today's real estate degree programs. Representing diverse disciplinary, geographic, and professional perspectives, the authors discuss innovative technology, inclusive pedagogy, curriculum development and more in an updated, global approach to real estate education. This book will interest faculty and administrators in real estate degree programs as well as instructors teaching undergraduate and postgraduate real estate courses. It is also relevant for professional educators and students pursuing professional education or a real estate degree.

Understanding Blockchain in Construction

A Practical Guide

Abel Maciel Design Computation Ltd.

Series: *Understanding Construction*

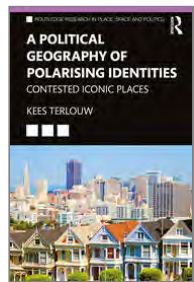

An essential resource that offers a comprehensive exploration of the transformative impact of blockchain technology in the construction industry. This book serves as a foundational reference, detailing how this technology is the cornerstone for data-driven digital processes in the built environment, referred to as the 'golden thread'. Written in an easy-to-understand way, it is perfect for both beginners and experts and is filled with examples showing how blockchain can help in various aspects of construction. Essentially, this book is a roadmap, guiding construction professionals through the exciting new world of blockchain, helping them stay updated, more effective and future-proof.

A Political Geography of Polarising Identities

Contested Iconic Places

Kees Terlouw University of Utrecht, Netherlands
Series: *Routledge Research in Place, Space and Politics*

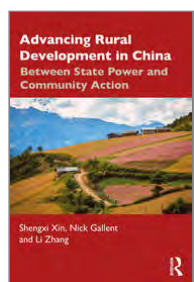

This book links the current wave of political polarisation to the polarisation taking place between cosmopolitan and parochial identity discourses, and their antagonistic valuation of iconic urban and regional places. The broader spatial and temporal perspective adopted in this book is of interest to anyone who wants to look beyond the national political headlines. It will help students, researchers, human geographers, political scientists, and sociologists better understand the intricate relation between identities, politics, places and societal developments.

Advancing Rural Development in China

Between State Power and Community Action

Shengxi Xin, Nick Gallent University College London, United Kingdom, **Li Zhang**

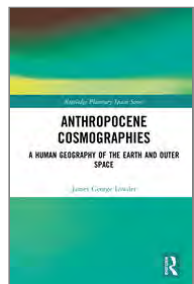

This book is about the practice of rural development in contemporary China. It evolves the concept of 'neo-exogenous development' to explain how the power of the state links to community action via local party structures, in pursuit of both state-building and rural revitalisation. The book presents a critical study of China's approach to rural development for students and researchers in the fields of human geography, rural sociology, planning, agricultural economics, public management, and international development.

Anthropocene Cosmographies

A Human Geography of the Earth and Outer Space

James George Lowder
Series: *Routledge Planetary Spaces Series*

This book explores relationships between humans and outer space through a geographical lens in the context of the Anthropocene. Presenting a bold and diverse engagement with outer space, the book expands geographical understandings of outer space and reflects upon humankind's place in the cosmos, all the while shedding light on the linkages between human life and cosmic processes. The interdisciplinary nature of this book makes it appealing for anyone engaging with outer space and planetary thinking.

Britain's Changing Roadscapes

Mobility, Place, Attachment, Loss

Lynne Pearce
Series: *Routledge Research in Culture, Space and Identity*

Through a creative juxtaposition of autoethnography and theoretical enquiry, this book documents how Britain's roads and roadscapes have changed over the past thirty-five years via a route that runs from Scotland to Cornwall. As well as documenting change, the book is also concerned with how it makes its presence felt to road-users and to what effect. This interdisciplinary exploration of Britain's changing roads and roadscapes will appeal to academics and students working in, and across, the fields of social and cultural geography, mobilities studies, cultural history, literary and cultural theory, and contemporary archaeology.

Decolonising Feminist Explorations of Urban Futures

Edited by **Linda Peake, Nasya S. Razavi, Grace Adeniyi-Ogunyankin, Elsa Koleth**

How do decolonial feminist urban imaginaries of urban futures begin to interrogate twenty-first century urban life? The urban futures signaled by the chapters in this book highlight three overlapping dimensions of urban imaginaries—capitalist, colonialist, (neo)colonialist—and how women's struggles, negotiations and placemaking practices offer alternative decolonial urban imaginaries. The book is based on papers given at the 'Feminist Explorations of Urban Futures' conference, held in 2019 at York University in Toronto, organized by the feminist research project, 'Urbanization and Gender in the Global South: A Transformative Knowledge Network' (GenUrb).

Dracula Urbanism and Smart City Mania

Urban Change in the Twenty-First Century

David Wilson, Elvin Wylly
Series: *Routledge Studies in Urbanism and the City*

This innovative book applies the metaphor of Dracula to understand a highly controversial reality that marks so many cities today: how the rage of smart city development and growth proceeds, is organized, and produces benefits for some and afflicts others. This book will appeal to students, researchers and informed readers interested in urban studies, city planning, urban sociology, critical geography, and literature studies. The book is lucidly written and substantively deep to enhance classroom teaching and provide important detail for research on urban redevelopment, city restructuring, and societal change.

2ND EDITION

Environmental Security

Approaches, Issues and Actors

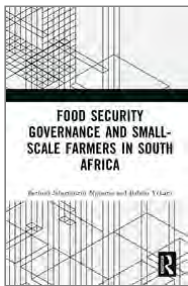

Edited by **Rita Floyd** University of Warwick, UK, **Richard Matthew** University of California, USA

This book offers a comprehensive survey of the distinctive theoretical approaches, fundamental issues and key actors that are central to the contemporary field of environmental security studies. It has been carefully designed to benefit anyone interested in environmental and climate security. It is especially valuable as required reading for students at both undergraduate and postgraduate levels.

Food Security Governance and Small-Scale Farmers in South Africa

Bethuel Sibongiseni Ngcamu University of South Africa, SA, **Babalo Yekani**

This book explores the influence of policies and politics on food security governance at a local government level. It unravels new, and as yet, unknown, dimensions on how policy and decision-making incoherences, fragmentations and disintegrations emerge with different stakeholders working in silos. This cutting-edge and innovative book will appeal to students, researchers and professionals in the fields of agricultural economics, food studies, public administration and management, economics, sociology and human geography and will also be valuable to members of the local and international community.

Geographical Journeys

Geographers Tell Their Stories

Edited by **Kevin Cox**

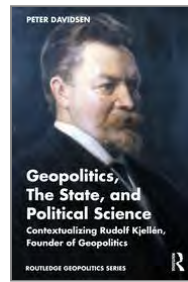

This book provides concise insights from a diverse range of leading scholars reflecting on how they became geographers. Asking how a range of geographers, representative of the field's diversity, this book explores the trajectory of their academic career, their formative influences, interpretive frameworks and divisions within geography, and what it means to have a geographic sensibility. In these ways, the book offers insightful contributions on how geographies and the history of the field get made; and for those considering embarking on a career in geography, just what to expect.

Geopolitics, the State, and Political Science

Contextualizing Rudolf Kjellén, Founder of Geopolitics

Peter Davidsen

Series: *Routledge Geopolitics Series*

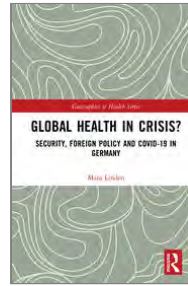

The book is an intellectual history of theories of political science, the state, and geopolitics, with Professor Rudolf Kjellén as the point of departure. Geopolitics, the State, and Political Science discovers the original contexts in which Kjellén's theories were produced and rethinks the scientific debates in which they intervened. Following Professor Quentin Skinner and the Cambridge school of political thought and intellectual history, this study discovers, contextualizes, reinterprets, and rethinks an important scientific dispute.

Global Health in Crisis?

Security, Foreign Policy and Covid-19 in Germany

Mara Linden

Series: *Geographies of Health Series*

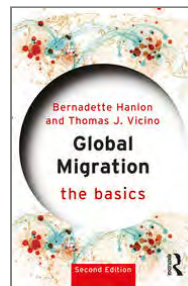

This book examines global health as a foreign policy issue in Germany and global health's entanglement with security and economic concerns. Based on an ethnography at the German Federal Foreign Office during Covid-19, it explores the emergence of this policy field, its variations in the pandemic moment, and the coordination of vaccine donations as a case study. For anyone interested in global health, both in academia and 'in the field', this book provides insights to governmental cooperation in the area of global health and foreign policy prior to and during a crisis, and allows for conclusions for further developments and/or future crisis moments.

Our Utopian Futures

Imagining a Sustainable, Dialogical, and Inclusive World

Valentin Mihaylov University of Silesia in Katowice

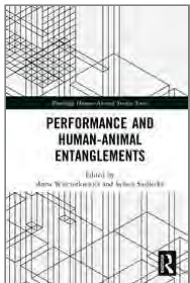

Series: Routledge Research in Place, Space and Politics

This multidisciplinary book explores the utopian impulses in modern social thought, tackling the most pressing and interconnected planetary challenges. It combines a reconsideration of our dystopian present with a critical investigation of socio-spatial utopias, which suggest alternative modes for man-nature and inter-human interactions in an imagined sustainable, dialogical, and inclusive world. The book is written in the common language of the knowledge that is co-created by the fields of global studies, political and cultural geography, environmental sociology, and international relations.

Routledge

Performance and Human-Animal Entanglements

Edited by **Anna Wiczorkiewicz , Sylwia Siedlecka**

Series: Routledge Human-Animal Studies Series

The volume explores how nonhuman animal lives are entangled with human interests, conflicts, and desires, highlighting the role of performance in these interactions. Drawing on diverse case studies, it unfolds across four thematic sections: Training Animals, Show Machines, Artistic Experiments, and Political Conflicts. The book is aimed at scholars, students, and activists in cultural and animal studies, performance and media studies, and related fields, as well as anyone interested in ethics and human-animal relations.

Posturban

Deurbanising Society: alterRural Modernities

Pieter Versteegh

Posturban reveals why the future cannot remain urban. Linking climate breakdown, inequality, and democratic erosion to an urban paradigm rooted in a patriarchal, discriminative divide, it calls for a radical shift towards resilient, decentralised, and ecologically rooted ways of living. Written for engaged citizens, activists, policymakers, and scholars interested in more equitable and sustainable ways to organise society, Posturban is for anyone ready to challenge the future of cities and explore viable, hopeful alternatives.

Reimagining Disasters

Voices in the Pluriverse

Edited by **JC Galliard** Auckland University, NZ, **Ksenia Chmutina**

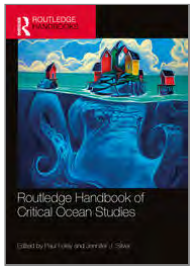

Series: Routledge Studies in Hazards, Disaster Risk and Climate Change

Reimagining Disasters builds on the momentum gained by the 2019 Disaster Studies Manifesto, which aims to inspire and inform more respectful, reciprocal and genuine relationships between home and visiting researchers in disaster studies. Overall, this book shows that it is possible to conduct more just, grounded, and relevant disaster studies that reflect local perspectives and priorities and challenge the established notions of power. It is an essential read for students and scholars interested in disaster and postcolonial studies.

The Panacea for Immigrant People in the Arctic

Opportunity or Vulnerability?

Edited by **Nafisa Yeasmin**, **Juhar Yasin Abamosa**, **Syed Musa Kajim Nuri**

Series: *Routledge Research in Polar Regions*

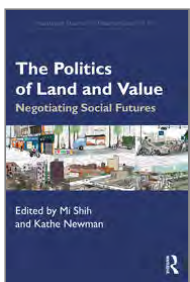

This book explores whether the Arctic serves as a true panacea for immigrants, offering opportunity and renewal, or if it reveals deep vulnerabilities, including isolation, harsh conditions, and exploitation. By examining the intersection of migration, socio-economic development, and climate change, the book uncovers the forces shaping immigrant lives and their role in the Arctic's evolving future. This book will be of interest to researchers and policymakers working in fields such as migration studies, political science, environmental studies, sociology, economics, and human geography.

The Politics of Land and Value

Case Studies from Across the Globe

Edited by **Mi Shih**, **Kathe Newman**

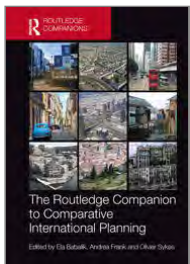

Series: *Routledge Studies in Urbanism and the City*

This book investigates the treatment of land as a source of money in global urban processes. This book is particularly useful for urban scholars, municipal planners, community organizers, educators, and students in fields related to urban planning and geography and those who are interested in issues around land value capture, land development tools, urban redevelopment, public-private negotiation, urban political economic analysis, community mobilization, alternative urbanism, equity, and justice.

The Routledge Companion to Comparative International Planning

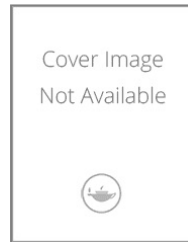

Edited by **Ela Babalik** Middle East Technical University, Turkey., **Andrea I Frank**, **Olivier Sykes** Liverpool University, UK.

Across seven parts, the book explores questions of 'why' engage in international comparative planning research; 'what' planning aspects might be compared; and 'how' comparison might be approached. The companion will be of interest to educators, academics and researchers, planning practitioners, city and municipal governments, consultants, and advanced students, in the fields of city, urban, and regional planning, urban design, human geography, and urban, environmental, and international development studies, interested in comparing and co-learning from global practices and places.

The Routledge Handbook of Cultural Geographies

Edited by **Peter Merriman** Aberystwyth University, UK, **ANNA SECOR**, **Shanti Sumartojo**

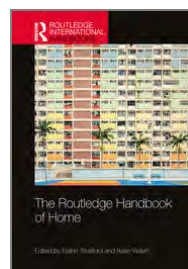

Series: *Routledge International Handbooks*

This handbook provides cutting-edge insights into the dynamic and cross-cutting field of cultural geography, arguing that this vibrant field can provide important perspectives on the most significant academic, political and creative conversations of our times. It acts as an essential guide for researchers, undergraduate students and postgraduate students in human geography and related fields, as well as activists and creative practitioners who practise cultural geography in a myriad of different ways.

The Routledge Handbook of Home

Edited by **Elaine Stratford** University of Tasmania, Australia, **Katie Walsh**

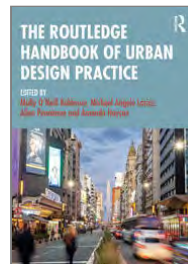

Series: *Routledge International Handbooks*

This global, critical, and interdisciplinary handbook rethinks home as a material, emotional, and geopolitical site. It examines housing, displacement, domesticity, climate, care, and the intimate labours of home. Designed for a broad audience, this handbook supports undergraduate learning, graduate teaching, and advanced research.

The Routledge Handbook of Urban Design Practice

Edited by **Molly O'Neill Robinson**, **Michael Angelo Larice**, **Allen Penniman**, **Amanda Haycox**

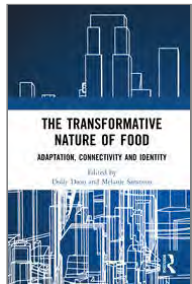

The Routledge Handbook of Urban Design Practice brings together diverse voices in urban design, emphasizing the urgent need for innovative approaches to address shared challenges, offering actionable steps to empower practitioners, students, and academics in creating vibrant and sustainable cities. The Handbook addresses how technological advancements and the big challenges are reshaping urban spaces, making it an essential resource for those involved in the transformation and future of our cities.

The Transformative Nature of Food

Adaptation, Connectivity and Identity

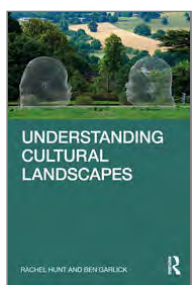

Edited by **Dolly Daou, Melanie Sarantou** University of Lapland, Finland

This book explores the process of food migration, adaptation and connections to cultural identities through the lens of food design research. Using design practice and methodology, it creates an awareness for the health and wellbeing of humanity's ecosystems through identity and adaptation. The Transformative Nature of Food will be of value to academics and postgraduate students in food design, cultural studies, and environmental sustainability programs, as well as professionals in cultural and non-profit sectors. Government agencies focused on migration, tourism, agriculture, and local development will also find this research valuable for policy and program development.

Understanding Cultural Landscapes

Rachel Hunt, Ben Garlick

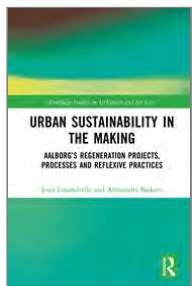

Understanding Cultural Landscapes provides an introduction to the range of approaches characterising the study of landscape and culture. This textbook discusses the origins, underpinnings, and practical applications of social science and humanities scholarship concerning landscape, and its theorisation. This book will be valuable for both students and educators encountering, or teaching, the study of landscape within the humanities and social sciences for the first time. The incorporation of practical exercises and suggested reading enables the book to supplement independent study or be used as a teaching aid.

Urban Sustainability in the Making

Aalborg's Transformation Projects, Processes and Reflexive Practices

Enza Lissandrello, Alessandra Badami

Series: *Routledge Studies in Urbanism and the City*

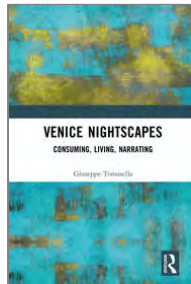

This book explores how urban sustainability is negotiated and enacted through planning practices, narratives, and institutional change. It does so through the case of Aalborg, to illustrate transitions that are shaped by urgency, legitimation and implementation. This book is intended for scholars, advanced graduate students, and critically engaged practitioners in the fields of urban planning, sustainability studies, human geography, and environmental governance. It will be of particular interest to those conducting research on urban transitions, planning theory, climate adaptation, and socio-ecological transformation.

Venice Nightscapes

Consuming, Living, Narrating

Giuseppe Tomasella

Series: *Routledge Research in Culture, Space and Identity*

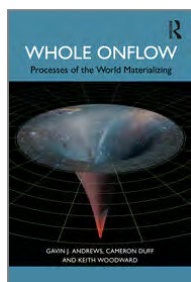

This book rethinks the urban night through an interdisciplinary exploration of Venice's nighttime economies, social practices and cultural narratives. Interpreting nightscapes as lived, contested and imaginative spaces, the book introduces the 'genius noctis' – a critical lens for engaging with the identity of the nocturnal city. This book resonates with researchers and students across cultural geography, urban studies, mobility studies, anthropology and environmental humanities – particularly those investigating nightscapes, Mediterranean urban cultures or interdisciplinary place-based inquiry.

Whole Onflow

Processes of the World Materializing

Gavin J. Andrews, Cameron Duff, Keith Woodward

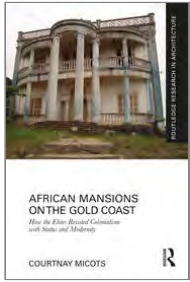

This book describes 'whole onflow' which is, at once, the emergence and becoming of the entirety of the world/universe and any actual, unique position whatsoever in it 'now'. A physical plane and self-organizing process that owes its energy to the big bang; in our region it now unfolding the infinitely complex and varied world we engage, contribute to and experience. It is very much a speculative and provocative piece, but a necessary one, and will be of particular interest to those studying the world through poststructuralist, posthumanist, new materialist and non-representational theoretical lenses.

African Mansions on the Gold Coast

How the Elites Resisted Colonialism with Status and Modernity

Courtney Micots

Series: Routledge Research in Architecture

This will be the first book to focus on the African patrons, who commissioned grand family mansions from the 1860s to 1950s, to highlight their intentions during the tumultuous period in the Gold Coast Colony (part of present-day Ghana) from roughly 1874 to independence from the British on March 6, 1957.

3RD EDITION

An Introduction to Community Development

Edited by Rhonda Phillips, Robert H. Pittman

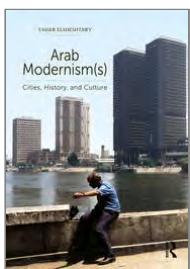

This book offers comprehensive and practical approaches to enhance development processes and outcomes for communities. It enables students to make connections between academic study and practical know-how in both private and public sector contexts. Now in its third edition, the book is based on the authors' years of teaching and research with practicing community and economic development professionals, policymakers, community leaders and planners. Each chapter is supplemented with text boxes, cases, keywords, exercises, further reading, and reference lists. This third edition is the most impactful and user-friendly text for community development now available.

Arab Modernism(s)

Cities, History, and Culture

Yasser Elsheshtawy

Series: Planning, History and Environment Series

Arab Modernism(s) is an exploration of how the Arab world encountered modernism – sometimes inadvertently, sometimes deliberately – and how those encounters continue to shape the built environment of its cities today. Adhering to his late father's belief that 'cities are nothing without people', Yasser Elsheshtawy writes not just about the buildings, but the lives lived in and around them. His narrative weaves together personal anecdotes and works of fiction and film, thus providing a textured backdrop to his central theme: the evolution of modernism in Arab cities.

Atlas of Green Energy Transitions

Power, Conflict, and Possibilities

Edited by Matthew Seibert

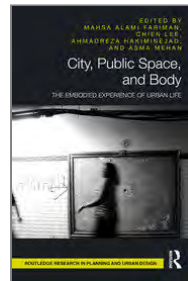

Atlas of Green Energy Transitions: Frontiers of Power, Conflict, and Possibilities employs immersive first-person narrative descriptions and rich imagery to tell the oft-revealing stories of contestation, exploitation, and complication within the landscapes upon which the world's green energy transition depends. In response to these stories, counternarratives propose alternatives to silver-bullet ecomodernism, advocating for just practices and reciprocal relationships with our host landscapes. The book targets an audience of students and practitioners of the built environment while seeking to inspire the inner designer in all readers.

City, Public Space, and Body

The Embodied Experience of Urban Life

Edited by Mahsa Alami Fariman, Chien Lee, Ahmadrza Hakiminejad, Asma Mehan

Series: Routledge Research in Planning and Urban Design

This book offers a timely and interdisciplinary examination of how bodies experience, shape, and are shaped by urban life, particularly in the wake of the COVID-19 pandemic. Bringing together contributions from scholars, artists, and practitioners across diverse geographies, the book explores the entangled relationships between urban space, embodiment, and publicness through a variety of methodological lenses including ethnography, visual and performative arts, and critical urban theory. The book highlights underexplored themes such as gendered vulnerability, spatial justice, post-pandemic public space, and marginalised urban bodies in both Global North and South contexts.

Collective Landscape Futures

Edited by Anushka Athique, Duncan Goodwin, Ed Wall
University of Greenwich, UK

This book critically reflects on dominant landscape techniques, discusses landscapes that are marginalised through globalising market forces, and focuses on the collective nature of landscapes—from planetary climates to intimate private spaces. Collective Landscape Futures investigates the common, shared, and public endeavours that produce landscapes. Chapters address varied concerns across diverse geographies, from wilding practices to extractive landscapes and from decolonizing approaches to tools for co-creation. This volume will appeal to scholars and activists working in environmental humanities, landscape studies, and landscape architecture.

Construct

Large Everyday Architecture

Iain Borden University College London, UK

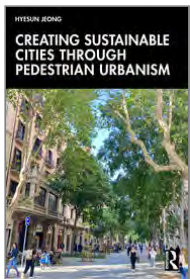

Series: *Routledge Research in Architecture*

Construct introduces a new category of architecture and engineering in our cities. These structures are highly visible yet often ignored, large-scale and built without traditional designers. They are characterized by substantial technical innovation and expertise, embedded in the everyday lives of thousands of urban citizens, and serve as embodiments of cultural and political meanings. These constructions represent an overlooked but significant aspect of our urban landscape, combining technical advancement with cultural significance despite their often anonymous design origins.

Creating Sustainable Cities Through Pedestrian Urbanism

Hyesun Jeong

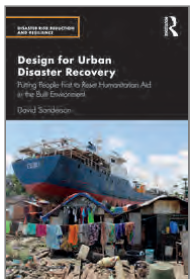

This book explores how communities worldwide are rethinking the relationship between mobility, place, and belonging. Drawing from cities across North America, Europe, and Asia, this book examines the shift from car-dominated planning toward human-centered design. It traces how walkable environments support environmental goals while fostering social connection and cultural vitality, demonstrating that sustainable cities are also more equitable and livable cities. Written for urban practitioners, community advocates, and engaged citizens, this work offers insights rather than prescriptions, recognizing that each place requires its own approach to pedestrian urbanism.

Design for Disaster Recovery

Putting People First to Reset Humanitarian Aid in the Built Environment

David Sanderson

Series: *Disaster Risk Reduction and Resilience*

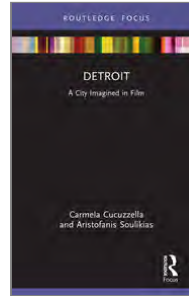

At a time of escalating urban disasters and sharply reduced aid budgets, humanitarian aid, long held in need of reform, has no choice but to reset. This book argues that humanitarian aid must accomplish this reset by prioritising people's agency and localising responses. The book ultimately seeks to reinforce that engaging in processes is vital for effective disaster recovery programmes. That means putting first those caught up in disaster and supporting local organisations who are best placed to provide the right support. It will be crucial reading to anyone working in humanitarian aid, especially planners, architects, engineers and community development practitioners.

Detroit

A City Imagined in Film

Carmela Cucuzzella, Aristofanis Soulikias

Series: *Built Environment City Studies*

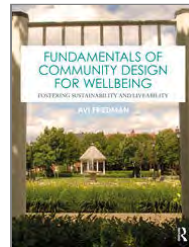

Detroit: A City Imagined in Film is a survey of prominent feature films depicting or referring to Detroit, and how they have captured and fed popular perceptions about the Motor City. Detroit, a magnifying glass, through which one sees an exaggerated portrait of America, has rendered itself to the eye of the cinematographic camera for over a century as background, stage and even character. Guided by Henri Lefebvre's *The Production of Space*, the authors analyse an array of fiction films filmed and/or set in Detroit from 1928 until today and examine filmic practice as one that has perceived, conceived but also produced the city's lived space.

Fundamentals of Community Design for Wellbeing

Fostering Sustainability and Livability

Avi Friedman McGill University, Canada

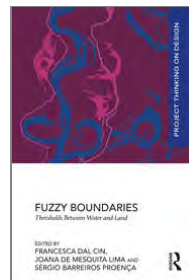

Fundamentals of Community Design for Wellbeing addresses the need to rethink the philosophy and form of residential environments due to recent social, economic, environmental and cultural shifts, including depletion of non-renewable resources, elevated levels of greenhouse gas emissions, and climate change. The book highlights planning strategies for liveability and wellbeing of communities from notable international case studies, addressing varied issues including accommodating elderly populations, designing walkable communities, and closing the affordability gap. This book is essential for students of urban planning, architecture and sustainability.

Fuzzy Boundaries

Threshold Between Water and Land

Edited by **Francesca Dal Cin, Joana de Mesquita Lima, Sérgio Barreiros Proença**

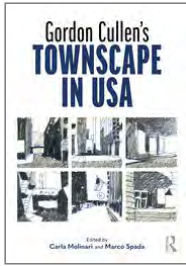

Series: *Project Thinking on Design*

Fuzzy Boundaries: Threshold between water and land is a curated selection of reflections on the boundaries between water and land, and its meaning amidst climate change, social, economic and political challenges. By engaging with form and contemplating the frictions and quiet conflicts that inhabit transitional spaces, the authors suggest that fuzziness - viewed through varied geographical and cultural lenses - holds the potential to reveal deeper layers of meaning.

Gordon Cullen's Townscape in USA

Edited by **Carla Molinari**, **Marco Spada**

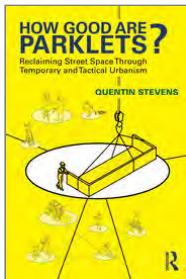

Along with a series of critical commentaries, this book unveils for the first time *Townscape in USA*, a previously unpublished manuscript written by Gordon Cullen in the early 1960s. Cullen brings his incisive, visually attuned, and often wry perspective to six American cities—New York, Pittsburgh, Boston, Chicago, Philadelphia, and Washington, D.C.—providing splendid, semi-prophetic visions of the cities' destinies, and foreshadowing the inevitable consequences of uncontrolled building development. These visions are supported by a series of sketches and photos taken from Cullen's archives. This book is an essential read for architects, planners, and dreamers alike.

How Good Are Parklets?

Reclaiming Street Space Through Temporary and Tactical Urbanism

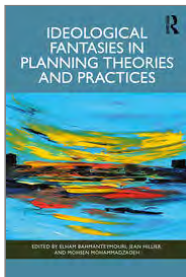

Quentin Stevens

Parklets are innovative, dynamic public spaces that are installed onto on-street car-parking spots. This book is the first to critically examine the parklet's purposes, formats, and impacts. It traces the parklet's history, from its invention in 2005 as an experiment that tactically reclaimed street space for broader public use, to its surge in popularity worldwide after the COVID-19 pandemic for outdoor dining, community gathering, and play. Drawing together archival research, expert interviews, typological analysis, mapping, field observation and design research, the book examines parklets' design, production, and implementation across varying urban contexts.

Ideological Fantasies in Planning Theories and Practices

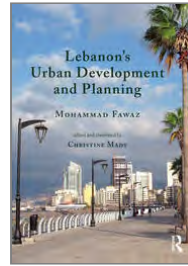

Edited by **Elham Bahmantemouri**, **Jean Hillier** RMIT University, Australia, **Mohsen Mohammadzadeh**

This edited volume challenges the hegemonic ideologies that underpin contemporary planning thought and practice, building on and extending the pioneering work of Michael Gunder. Contributors include established and emerging scholars from diverse global contexts, offering interdisciplinary insights for researchers and practitioners in planning, geography, sociology, philosophy, and political studies. This collection stands as both a scholarly tribute to Gunder's intellectual legacy and a call for critical, transformative planning futures.

Lebanon's Urban Development and Planning

Edited by **Christine Mady**

Series: *Planning, History and Environment Series*

After four hundred years of Ottoman rule followed by a little over two decades as part of the French Mandate, Lebanon finally gained independence in 1943. In her translation and editing of the four books by Mohammad Fawaz, Director of Lebanon's Directorate General of Urbanism from 1974 to 1993, Christine Mady provides a unique insight into the development and urban planning of Lebanon and its capital city Beirut from 1943 to the present day.

Mapping

Narratives, Practices and Spatial Inquiry

Edited by **Gihan Karunaratne**

Series: *Routledge Research in Planning and Urban Design*

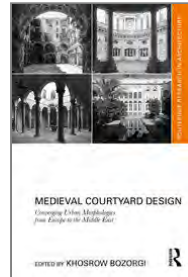

Mapping has evolved beyond navigation into a method for interpreting spatial, ephemeral, and sociopolitical dimensions of contemporary life. This volume explores how cartographic practices are being reimagined across disciplines to understand and reconfigure urban space. The essays examine mapping as both representational and generative, spanning participatory mapping in informal settlements, film-based documentation of marginalized geographies, embodied cartographies, and data-driven analysis.

Medieval Courtyard Design

Converging Urban Morphologies from Europe to the Middle East

Edited by **Khosrow Bozorgi**

Series: *Routledge Research in Architecture*

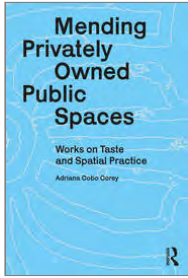

This groundbreaking study examines courtyard architecture across Paris, Florence, Siena, Granada, and Yazd to reveal how the deliberate creation of emptiness—the "bounded void"—functions as architecture's primary generative principle. Moving beyond conventional object-based analysis, the book demonstrates that architecture's essence lies not in built form but in calibrated absence.

Mending Privately Owned Public Spaces

Works on Taste and Spatial Practice

Adriana Cobo Corey

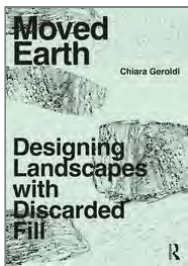

This book explores how privately owned public spaces (POPS) are presented today as desirable additions to urban redevelopment projects, regardless of their inherently divisive social impact, usually delivered through, amongst other factors, carefully managed aesthetic codes. Providing a brief theoretical framework that covers definitions of spatial practice, participatory and collaborative strategies and exploring intersections between performance, architecture and urban design, the book examines cases from London, New York, Bogota, Ahmedabad and Hong Kong, to illustrate how taste-makers influence POPS and spatial design.

Moved Earth

Designing Landscapes with Discarded Fill

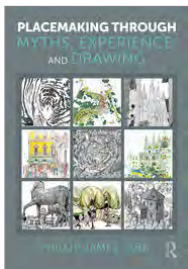

Chiara Geroldi

Moved Earth explores discarded fill to construct designed landscapes from a designer's perspective. This book shows how discarded fill offers opportunities to construct significant designed landscapes, with designers playing a positive role in a multidisciplinary environment. It addresses issues of design, form, and aesthetics; materials and meanings; openness and closure; processes and material movements; technical aspects; and the role of the designer through thirty-one international examples and four case studies. Moved Earth offers readers a unique insight into the opportunities discarded fill offers designers and is essential reading for landscape architects.

Placemaking Through Myths, Experience, and Drawing

Phillip James Tabb Texas A&M University, USA

This book reveals the profound connections between placemaking, drawing, mythology, and experience as focused on creating vital and meaningful places through the process of drawing. Six different drawing techniques are covered, including in-situ sketching, studio enhanced drawing, mythic landscapes, diagrams, watercolors, and conceptual masterplans. By analyzing drawings, planners and designers can learn from places and architecture, gaining practical insights into the complex interplay of factors that contribute to successful placemaking. This book is essential for practitioners, designers, and students interested in concepts of place, myths, experience, and drawing.

Placemaking with Tall Buildings

A Guide to Ten Key Planning and Design Principles

Kheir Al-Kodmany

This book reconceptualizes tall buildings as civic agents that deliver spatial legibility, cultural significance, and vibrant social interaction by embedding placemaking at the heart of vertical development. Drawing on global case studies, it articulates ten pragmatic planning and design principles that explain how holistic, context-sensitive design can weave vertical structures into their surrounding fabric, fostering inclusivity, environmental responsiveness, and a distinct sense of place. This work equips architects, planners, policymakers, and students with a comprehensive toolkit to transform tall buildings from isolated monuments into dynamic, human-centered environments.

Planning with Young People

A Practical Guide to Youth-Inclusive Urban Planning in Schools

Josh Pinto Taylor

This book presents an alternative vision of how to build cities for young people, challenging readers to imagine cities that truly serve their youngest inhabitants. The first half of the book explores the competing, sometimes conflicting, and often incomplete visions and agendas of the city that have historically failed to include or prioritize young people. The final chapters highlight structures, systems, policy frameworks, and practices that can be employed to plan for and with young people. Written in an accessible style, this book is a valuable interdisciplinary resource for planning students, urban planners, or educators seeking a vision for inclusive planning practices.

Progressive Planning Practice

Transforming Communities of Color

Edited by Sean Robin

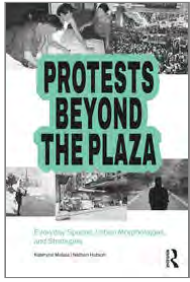

Planning, design and community development have often been practiced in a monocultural way, meaning that communities of color and low-income communities are often overlooked or ignored, if not outright harmed. This book highlights a new approach for transformative community development, where worldviews are rooted in the culture of communities of color and everyday people can find expression in decisions about a community's future. Chapters explore themes such as decolonial planning, climate injustice, Black planning, and ethics. This book is essential for professionals, students and professors of urban planning, design, and community development in the US.

Protests Beyond the Plaza

Everyday Spaces, Urban Morphologies, and Strategies

Edited by **Kateryna Malaia**, **Nathan M. Hutson**

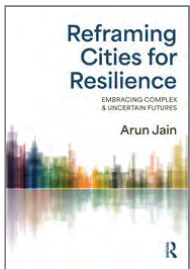

The chapters in this volume investigate some of the most important urban upheavals in recent history through different political, social and cultural contexts. Through a global cross-section of case studies, the authors envision the future of the successful urban protest as a whole-society movement in which all aspects of a city's morphology are effectively leveraged. Using interviews, mapping, architectural and planning-scale documentation of urban morphologies, the book traces the development of important protests and the evolution of protest strategy. It will be of interest to architects, urban sociologists, and anyone else interested in how the city shapes resistance.

Reframing Cities for Resilience

Embracing Complex & Uncertain Futures

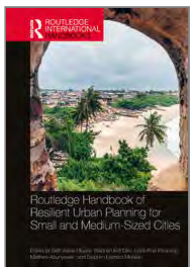

Arun Jain

We live in times of profuse change. This book challenges the traditional realms in which urban design and planning operate and argues that the first step towards adaptive and resilient futures is making a fuller spectrum of the complexity of cities comprehensible to all. Drawing upon cultural anthropology, evolutionary biology, economic theory, behavioral sciences, systems thinking, and technology, it provides fresh foundations for addressing decades of physical and social underinvestment and neglect across a range of urban challenges. This book is essential for urban designers, planners, landscape architects, and postgraduate students.

Routledge Handbook of Resilient Urban Planning for Small and Medium-Sized Cities

Edited by **Seth Asare Okyere**, **Stephen Kofi Diko**, **Louis Kusi Frimpong**, **Matthew Abunyewah**, **Stephen Leonard Mensah**

Series: *Routledge International Handbooks*

Small and medium-sized cities (SMCs) are becoming the new frontiers of global urban growth and population change. This handbook aims to increase attention to the resilience of SMCs and explore the unique challenges they face, as well as provide practical recommendations for built environment practitioners to understand and respond to these challenges in global contexts. Chapters cover topics such as climate-induced risks, heat resilience planning, access to urban infrastructure and services, socio-environmental inequities, urban safety, health resilience, walkability, and more. This handbook is essential for scholars and practitioners working in the built environment.

Spatial Governance and Planning in Latin America

A Comparative Account

Edited by **Juan E. Cabrera**, **Francesca Blanc**, **Giancarlo Cotella**

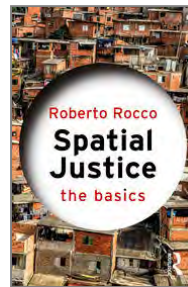

This book is the first to provide an in-depth discussion of spatial governance and planning systems in Latin America, with analysis and comparison across 10 different countries. This collection explores the contrasting influences of the public and private sectors and informal institutions, while also highlighting the role of indigenous culture in certain contexts and the increase of participatory processes in others. A timely contribution to this evolving topic, the book will appeal students and scholars in the fields of planning, urban and regional studies, public policy, and human geography.

Spatial Justice

The Basics

Roberto Rocco

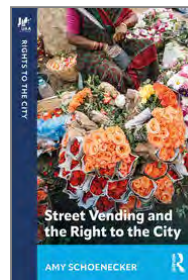

Series: *The Basics*

Spatial Justice: The Basics offers an accessible introduction to spatial justice as both a theoretical framework and a practical agenda for urban transformation. It examines how urban space is produced, contested, and governed, and how it is implicated in broader dynamics of inequality, recognition, and participation. The book draws on key thinkers to articulate spatial justice through its distributive, procedural, and recognitional dimensions. Designed for upper-level undergraduates and postgraduates in planning, geography, and architecture, the book includes a glossary of key terms, end-of-chapter summaries, and diagrams to support critical engagement and classroom use.

Street Vending and the Right to the City

Amy Schoenecker

Series: *Rights to the City*

Through a multi-city comparison, this book demonstrates how vendors blur the lines of in/formality through their resistance tactics, and fight for their rights to the city not only as economic agents, but as residents seeking urban belonging. With international examples and an in-depth case study featuring a comparison of Chicago and Mumbai, chapters explore how urban informalities are produced and offer perspectives on roadblocks and pathways to gaining legitimacy. This book is essential for academics and students in urban planning, urban studies, anthropology, sociology, urban design, geography and political science, as well as practitioners and policymakers.

2ND EDITION

Therapeutic Gardens

Design for Healing Spaces

Daniel Winterbottom , Amy Wagenfeld

This book presents a collaborative approach that successfully translates the principles of therapeutic design into practise using case studies from around the world. This practical guide demonstrates how gardens support learning, movement, well-being, and mental and psychological health. This second edition has been thoroughly updated throughout to include: pandemic and mental health design, trauma responsive design, designing for neurodivergence, and more. Beautifully designed with over 250 color images throughout, it is essential for professionals and students in landscape architecture, planning, design, healthcare and mental health fields.

Vacant Land Regeneration

Novel Strategies for Maximizing Local Impact

Edited by **Rui Zhu , Galen Newman**

This book provides readers with a comprehensive understanding of vacant land regeneration through the lens of influential research, groundbreaking case studies, and future trends, and equips readers with the knowledge needed to transform vacant spaces into valuable community assets. The book is structured into four key sections: urban policy and classifications; ecosystem services and resilience; remediation and public health; and community engagement. With insights from key researchers and urban planners, this book inspires a transformative approach to urban development. It is an essential resource for both scholars and practitioners in the field of urban regeneration.

Wild Nature in Cities

Design for a Post-Pandemic World

Timothy Beatley , JD Brown

This book collects the many stories, experiences and innovative policies and strategies by which cities and local governments have helped to facilitate and strengthen essential pandemic-era nature-connections. It makes the central point that contact with nature and the outdoors was (and is) an essential element of a healthy, resilient city. The book provides a view to the longer-term effects of the pandemic on the design of cities and how nature will figure into these trends and likely future changes. The book will be useful to policymakers, urban researchers, and citizens, as well as students and faculty.
