African Intelligence, Diplomacy and National Security

Statecraft Tools for Navigating an Insecure World

Teboho J. Lebakeng , Andreas Velthuisen

Series: African Governance

This book argues that the intersection between intelligence, diplomacy, and national security is essential for the success of African statecraft. The book demonstrates that African states can enhance national and regional security in a complex global security environment by prudently harnessing intelligence insights and diplomatic relationships. Under certain conditions of national security, intelligence and diplomacy can be leveraged for socio-economic development. This book will be an important read for scholars, researchers and practitioners of African security studies, international relations, and political sciences, development, as well as for policymakers and decision-makers.

African Urbanisms and Their Hinterlands

Contemporary Cultural Imaginaries of Spatial Connections

Edited by Femi Eromosele , Rebecca Fasselt , Lwanga Songsore

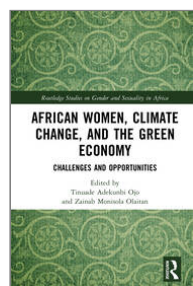

This volume revisits contemporary cultural and artistic imaginaries of African cities through a focus on their manifold connections with rural hinterlands. Tracing the multidimensional movements and flows between six African cities—Nairobi, Accra, Kampala, Pretoria/Tshwane, Johannesburg, and Lagos—and their respective hinterlands, the book maps similarities between contemporary city-hinterland interactions across the continent. It conceives of the relationship between the urban and the hinterland as non-dichotomous and makes an argument for the complex entanglements between African rural and urban cultural imaginaries.

Ethiopia's Urban Transformation

Infrastructure, Mobility, and Authoritarianism

Thomas Betschart

Series: *Routledge Contemporary Africa*

This book investigates the ways in which Ethiopia's urban landscape is being reshaped by an infrastructure boom in megaproject corridors and industrial parks. Drawing on extensive immersive fieldwork, the book considers how citizens negotiate, appropriate, or resist these engineered spaces. Rather than treating infrastructure expansion as a straightforward, top-down process, the study foregrounds the "messy" negotiations that unfold on the ground. This book's detailed ethnographic insights will be an important read for researchers across the fields of urban studies, human geography, development economics, anthropology, and African studies.

Writing as Refugee

Cover Image

Minority Languages and Audio-Visual Content in Africa

Edited by **Limukani Mathe**, **Oswelled Ureke**, **Dumisani Moyo**

Series: *Routledge African Media, Culture and Communication Studies*

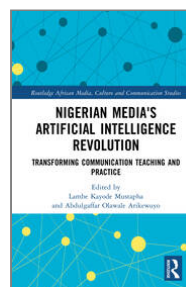

This book examines audio-visual content production in Africa, highlighting how the rise of social networking platforms has combatted the marginalisation of minority languages across the continent. Colonial languages have tended to dominate audio-visual narratives in Africa, and although postcolonial film and video production initiatives have tried to counter this, in practice they perpetuate the marginalisation of minority language groups by favouring major indigenous languages. This timely investigation into the political economy of contemporary audio-visual production in minority languages in Africa will interest researchers of media studies and sociolinguistics in Africa.

Nigerian Media's Artificial Intelligence Revolution

Transforming Communication Teaching and Practice

Edited by **Lambe Kayode Mustapha**, **Abdulgaffar Olawale Arikewuyo**

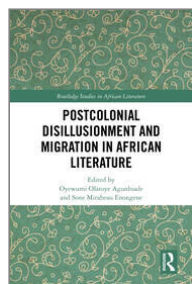

Series: *Routledge African Media, Culture and Communication Studies*

Artificial Intelligence (AI) is rapidly transforming communication and media sectors around the world, but much of the global academic literature on this remains Western-centric. This book provides an in-depth, multi-sectoral analysis of AI's influence on Nigerian media and communication ecosystems, bridging the gap between global AI discourse and localized realities. Going beyond critique to provide actionable strategies for curriculum development and ethical adaptation, this book argues that Nigerian institutions can lead, and not just follow, in AI transformation. An important read for researchers of media, communication, and education both in Nigeria, and in Africa more broadly.

Postcolonial Disillusionment and Migration in African Literature

Edited by **Oyewumi Olatoye Agunbiade**, **Sone Mirabeau Enongene**

Series: *Routledge Studies in African Literature*

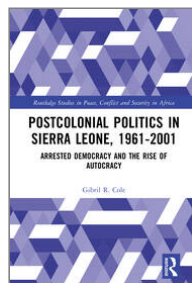

This book investigates the many ways in which African literature has engaged with themes of migration and postcolonial disillusionment. The book argues that disillusionment amongst African migrants facing discrimination abroad has become a microcosm for postcolonial disillusionment at home. Drawing on literature and film from across the four regions of Africa, the book considers the intersection of postcolonial disillusionment and migration, showing that the two are interwoven. This book will be an important read for researchers working on African literature, film, migration, and postcolonial studies.

Postcolonial Politics in Sierra Leone, 1961-2001

Arrested Democracy and the Rise of Autocracy

Gibril R. Cole

Series: *Routledge Studies in Peace, Conflict and Security in Africa*

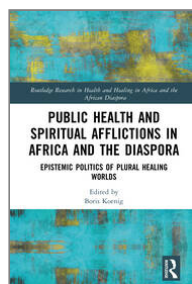

This book investigates the historical trajectory of postcolonial Sierra Leone, especially the persistence of political violence and autocratic tendencies. Regarded as a litmus test for the consolidation of postwar democracy, the 2023 national polls became a stark reminder of the persistence of elite bickering, electoral malfeasance, autocratic political machinations, and violence. This book investigates how a culture of corruption, political violence, and autocracy crystallized in the decades following independence. Drawing on extensive archival research as well as the author's own interviews, this book will be an important read for researchers of West African history and politics.

Public Health and Spiritual Afflictions in Africa and the Diaspora

Epistemic Politics of Plural Healing Worlds

Edited by **Boris Koenig**

Series: *Routledge Research in Health and Healing in Africa and the African Diaspora*

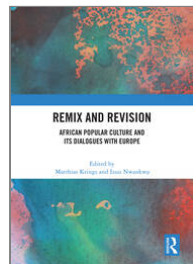

This book examines the paradox whereby spiritual afflictions (conditions attributed to ancestors, jinns, spirits, witchcraft, and other intangible entities) remain central to everyday therapeutic worlds in Africa and the diaspora, yet are routinely sidelined or rendered invisible in official public health policies and global health agendas. It offers conceptual and methodological tools for rethinking what counts as evidence, legitimate care, and public health expertise, inviting readers to imagine health institutions that are attentive to plural epistemologies and responsive to the lived realities of those navigating diverse therapeutic worlds.

Remix and Revision

African Popular Culture and Its Dialogues with Europe

Edited by **Matthias Krings**, **Izue Nwankwo**

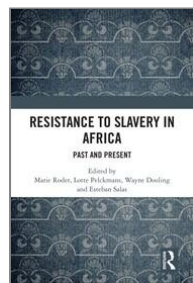

This book takes a critical look at contemporary digital forms of African popular cultural production, examining how they articulate relationships between Africa and Europe, and between Africans and Europeans. Through detailed analysis of cinema narration, video films, comedy skits, social media performances, and lip-sync impressions, the contributors reveal how African creators remix and revise European cultural forms whilst asserting their own agency and resistance. It demonstrates how digital platforms have become sites of counter-hegemonic cultural production, where African artists negotiate complex postcolonial relationships through creative appropriation and transformation.

Past and Present

Edited by **Marie Rodet**, **Lotte Pelckmans**, **Wayne Dooling**, **Esteban Salas**

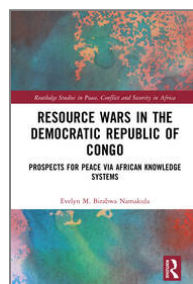

Resistance to Slavery in Africa: Past and Present offers a sweeping, accessible overview of how African individuals and communities have challenged slavery across centuries. Bringing together insights from Anglophone, Francophone, Lusophone, Arabic and Ottoman scholarship, the volume presents a truly pan-African perspective on resistance movements from the precolonial era to the digital age. The collection traces resistance across diverse geographical regions—from West and Central Africa to the Indian Ocean and Sahara—demonstrating how people confronted external slave trades, local systems of bondage and enduring inequalities that survived abolition.

Russia and China in Africa

Towards a New World Order?

Bohumil Doboš Charles University, Czech Republic

Series: *Routledge Contemporary Africa*

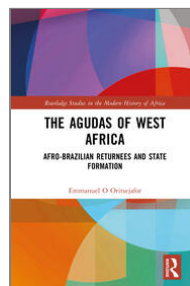

As both China and Russia seek to extend their global influence and challenge the liberal world order, Africa is becoming increasingly critical to contemporary geopolitics. This book argues that it is within Africa that we can best understand the synergies and conflicts between Russian and Chinese approaches. Problematising over-simplifications of a contest between the West and a Sino-Russian bloc, this book argues that the future of the global order is to be determined by a more nuanced set of political and economic interactions. It will be of interest to researchers across the fields of political science, international relations, and geopolitics.

Edited by **Andrew E. Yaw Tchie**

Series: *Routledge Studies in Peace, Conflict and Security in Africa*

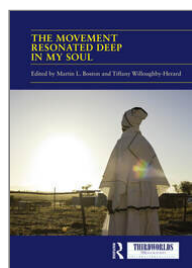

This book investigates how African armies in post-conflict societies are evolving and adapting to new and emerging threats. The Nonhuman in African Philosophy

Alena Rettova

Series: *Routledge Studies in African Philosophy*

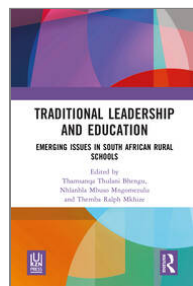

Whilst much analysis of African philosophy focuses on humanistic traditions, this book argues that there is an alternative history of African philosophy based on understandings of the nonhuman, or 'the world', from across the continent. Interrogating texts in Swahili, Shona, Ndebele, Wolof, and Kinyarwanda, the book's coverage ranges from classical poetry to existentialist and postmodern novels, to songs and post-conflict literature. Challenging humanist and Europhone African philosophical assumptions, this book is an important read for researchers of African philosophy, literature, languages, and cultural studies.

Ubuntu and Youth Studies in Africa

Edited by **Motsamai Molefe, Paul Michael**

Series: *Routledge Studies in African Philosophy*

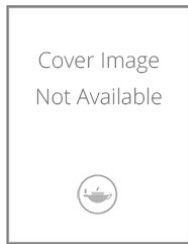

This book considers how the African philosophy of Ubuntu can contribute to the study of the youth in Africa. Reports from the UN indicate that by 2050, more than a third of young people in the world will be in or from Africa. However, most existing youth studies remain framed by Global North paradigms, creating a risk of generalising or globally universalizing the stage of life between childhood and adulthood. This incisive and expansive African perspective on youth studies expands our metaphysical, epistemological, and axiological understanding of the field. It will be an important read for researchers across the fields of philosophy, youth studies, sociology, and African studies.

A Bangladesh Reader

Beyond Nation and State

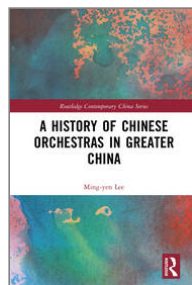

Edited by **Mirza Taslima Sultana** Jahangirnagar University, Dhaka, **Parsa Sanjana Sajid** Independent University, Bangladesh, **Sayeed Ferdous** Jahangirnagar University, Dhaka, Bangladesh

This book is an authoritative interdisciplinary resource on Bangladesh and the region's history, politics, and culture. It provides fine grained ethnographic, literary, and historical analyses. The volume interrogates key liberal categories – law, religion, nationalism, women's rights – through which knowledge of the national space of Bangladesh has been conventionally produced. The implicit call to question and reconfigure dominant epistemologies and knowledge practices that effectively reinscribe bourgeois, capitalist hegemony is a hallmark of current theorizing from the Global South, one that this volume fully embraces.

Is India's Foreign Policy Contradictory?

Understanding Modern Diplomacy through a New Lens

Manasi Pritam

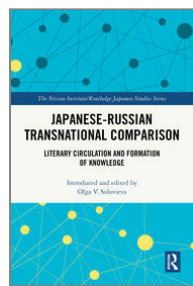

This book interrogates the idea among scholars and practitioners of foreign policy that India's foreign policy is contradictory. It argues that while states have to be tactical, strategic, opportunistic, and wary, in their dealings in the international system, there are many other often much stronger forces at play that are overlooked. The book contends that trust and morality form a bigger part of diplomatic practice than international relations scholars care to acknowledge. The book will be of great interest to scholars and researchers of South Asian studies, security studies, and international relations, especially foreign policy.

Liquid Objects

Abdulrazak Gurnah and the Material Ecologies of Water

Keyvan Allahyari University of Tübingen, Germany

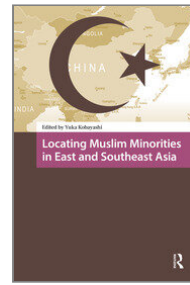

Series: Transdisciplinary Souths

Liquid Objects: Abdulrazak Gurnah and the Material Ecologies of Water offers a consistent reading of Gurnah's work as oceanic constellations that stretch our dualistic assumptions of human and nonhuman matter. The book observes the flow of four objects—map, breath, border, and bone—each moving us through Gurnah's Indian Ocean worlds and attuning us to flows that exceed familiar interpretive frameworks. Keyvan Allahyari shows that Gurnah's capacious imagination resists habitual inquiry, and that reading itself migrates across currents of matter and memory we can only partially grasp. Essential for scholars of literature, culture studies, Indian Ocean studies, and African studies.

Series: Routledge Critical Perspectives on Breath and Breathing

This book studies the multiple ways of breathing (in) and knowing (of) contemporary lifeworlds. It offers a collection of ethnographic and interdisciplinary essays articulating the politics and poetics of air, atmosphere, and the body across diverse geographical locations, historical moments, and theoretical approaches. The book argues that air, atmosphere, and the body are relational entities shaping and shaped by the very act of breathing. How differences in air, atmosphere, and the body at the scales of neighbourhoods, regions, nation-states and the planet co-constitute breathing inequalities and respiratory conditions of possibilities in suffocating times.
