Anatomy of a Stock

A Guide to Fundamental Equity Analysis for Aspiring Investors

Joseph D. Foresi

Wall Street routinely cycles through different investment paradigms that often fail over the long term, because they don't take into account the only consistent thing about markets: their inconsistency. This book examines the positives and negatives of those paradigms to develop a fundamental, research-backed investing approach. This book will be an essential resource for aspiring financial analysts, individual investors seeking professional-level insights, early-career investment professionals, and finance students at undergraduate and MBA levels. Let *The Anatomy of a Stock* help you learn to invest like a pro!

The Dynasty Effect

The Real Impact of Family Businesses on the Global Economy

David Molian

As the tech billionaires dominate the headlines, this groundbreaking book reveals the overlooked yet formidable influence of multi-generational family wealth on the global economy. It provides essential insights into the largest wealth transfer in human history—as 2% of the global population inherits vast fortunes over the next 25 years—revealing how this tsunami of inherited capital will transform investment landscapes, industrial financing, and potentially undermine nation-state autonomy.

Women in Public Finance

Stories of Gender in Budgeting

Edited by **Maja Bosnić, Manal Fouad**

Public finance is often considered a discipline where numbers, efficiency, and productivity talk. And while gender budgeting, a field of public financial management (PFM), has gained increasing attention in recent years, the personal stories of the women driving this work have remained largely invisible. This is the first book to share unprecedented insider narratives from the women shaping public finance and public policy. These authentic first-person accounts provide rare insights into both the barriers and breakthroughs experienced by women in a field traditionally dominated by technical discourse and masculine perspectives.

AI Powered Insight

Marketing Research Reconfigured

Michalis A. Michael , Nicos Rossides

These technologies are moving the field beyond solicited customer opinion, traditionally gathered through surveys and focus groups, allowing marketers to leverage unstructured big data for a whole new type of customer feedback: the unsolicited opinion. Acting as a guide to what's possible, the book explores the redefinition of insight in the age of AI and stresses the need for every true insight to inspire action. It dives into techniques for analysis and the AI science behind the analytics, automated brand recommendations and content creation, introducing AI-specific research and data analysis tools.

Behavioral Corporate Governance in Practice

New Models for Leadership and Oversight

Jan Stalker

Behavioral Corporate Governance in Practice provides readers with a comprehensive understanding of corporate governance and its challenges. While covering the key aspects of any board's agenda, the book also goes a step further by deconstructing behavioral dynamics and balancing both leadership and oversight in its examination of governance. Case studies and reflection questions throughout the book serve to enhance readers' understanding of the nuances of these topics. This book is essential for postgraduates and practitioners interested in corporate governance, strategy, leadership, and oversight.

Corporate Governance and Digital Transformation

Strengthening Leadership of the Board of Directors in the Digital Era

Erik Beulen, Ries Bode

Series: Business and Digital Transformation

Corporate Governance and Digital Transformations argues that these are essential domains in organisations in the current digital era that must be aligned and require more dedication and digital expertise within the Board of Directors of any organisation. This book outlines what those capabilities should be and what options are available for a Board of Directors to improve their corporate governance. It also demonstrates how a crossover approach between the two is crucial for achieving success.

Financialism Against Democracy

Markets, Time, and the Collapse of Democratic Judgment

Ezra Wasserman Mitchell

The book argues that modern capitalism has given way to Financialism, a new stage of political economy in which legal institutions, financial markets, and professional norms reorganize corporations, public institutions, and everyday life around the imperatives of finance. It provides the first systematic account of Financialism as the organizing order of contemporary economic life. It is essential reading for scholars, graduate students, and policymakers in corporate law, finance, political economy, corporate governance, and business history. It is also ideal for readers interested in how financial power reshapes democratic governance and the structure of everyday life.

Marketing Insights from Popular Culture

Edited by **Jonatan Södergren, Niklas Vallström, Pierre Guillet de Monthoux**

Series: Key Issues in Marketing Management

This book explores how everyday stories, media, and symbols shape—and are shaped by—the ways we think about markets, brands, and consumption. Drawing on examples from film, television, music, fairs, and other familiar cultural settings, this book offers fresh perspectives on how marketing operates beyond boardrooms, spreadsheets, and formal strategy. Rather than treating marketing as a self-contained discipline, it goes further by suggesting that brands and marketing are not simply influenced by popular culture but are themselves forms of popular culture.

Mobility Revolution

How AI, EVs, Robotaxis, and New Modes Radically Transform the Ecosystem

Marc Amblard

Mobility Revolution captures the sweeping transformation redefining how people and goods move. Drawing on decades of experience across Paris, Detroit, and Silicon Valley, the author unpacks the forces driving this historic shift, namely a push for clean mobility, volatile regulations, ambitious startups, geopolitics, and the global power shift towards China. He dissects the central role played by technology, as electrification, autonomous driving, artificial intelligence, the software defined vehicle, and new modes reshape the entire ecosystem. This book is essential reading for anyone seeking to understand and anticipate the future of transportation.

The Commodification of Wellness

Conscious Luxury, Western Yoga and Fashion

Juliana Luna Mora

Series: Routledge Studies in Luxury Management

This book critically analyses and documents a shift of ethical consumption patterns through Western yoga commodities, services and transformational experiences that affect women within consumer culture. It discusses how aspirational Western yoga brands, yoga studios, and social media influencers commodify wellness by distributing cultural capital as postfeminist spiritual capital through the promotion of exclusive and consciously-minded aesthetic and ethical transformational experiences within the wellness industry. It will appeal to an academic audience interested in fashion and luxury studies, luxury management, consumer culture, gender studies and critical spiritual practices.

The Disabling Marketplace

Edited by **Leighanne Higgins**, **Katharina C Husemann**, **Anica Zeyen**

Series: Key Issues in Marketing Management

This volume brings together a collection of studies from leading scholars that critically examine the barriers to accessibility in marketplaces. It explores the pervasive forces of ableism embedded in marketplace practices and environments that often exclude, stigmatize, and disempower individuals with disabilities. By interrogating these barriers and ableist practices, the book aims to inspire scholars and practitioners to take responsibility for creating transformative, inclusive markets. Ultimately, it advocates for a future where marketplaces are 'enabling' rather than 'disabling.'

Fairness in Business and Investment

Paul Lee

Series: The Responsible Investment Series

Fairness is a basic foundation for how humans see the world. The principle of fairness is much more fundamental to people than is the concern about inequality – after all, some inequality is fair. Business and investment can and should rise to the global challenge of unfairness, helping to restore opportunity and growth. This book provides the roadmap to deliver this and identifies some of these investment and business failures, as well as developing an approach to navigate to a better mode of business – for society and for all of our long-term prosperity.

Managing Without Managers

Building a Flexible Organization

Jef Bell, Zoë Harrold, John Launchbury, Robert Wiltbank

This practical guide shares insights from 25 years of organizational experimentation, showing how to establish effective conversational practices, build collaborative workflows, implement distributed decision-making, and maintain alignment without traditional hierarchy. Through real examples of both successes and failures, you'll discover how to create workplaces where people genuinely want to contribute and how to transform principles into sustainable organizational systems. The book is unique in its effort to guide readers to create their organization on their terms, rather than encourage them to make an organization like Galois.

Incremental Safety Practices

Edited by **Erik Hollnagel , David Slater**

Incremental Safety Practices provides a systematic account of practical projects and programmes that have contributed to ensure that every-day work goes well. It illustrates the benefits of an incremental safety approach that unites concerns for productivity and safety, rather than juxtaposing them, and relates practical experiences from managing complex industrial and social systems in the spirit of both Resilience Engineering and Safety-II. Written at an intermediate professional level, but intentionally not technical, this book is for all middle managers, senior managers, independent consultants and safety professionals concerned with health, safety and environment.

The Blindspot Before the Disaster

A Safety Model for Developing Organisational Foresight

Tom Bourne

Major organisational disasters are not random. They are predictable. In the months and years before every catastrophic failure, the warning signs were already present. They were systematically unseen. Organisational blindness to accumulating risk is not a malfunction. In many organisations, it is the system working exactly as designed. This book explains why, and what can be done about it. This book is written for the leaders, safety professionals, and governance practitioners who are responsible for preventing harm before it occurs.

Unmasking Safety's Myth of Individualism

A Leader's Blueprint for Psychological Safety and Organizational Resilience

Rosa Antonia Carrillo

This book unveils a critical gap in current safety thinking: safety is not solely an individual responsibility, but a social outcome that entails collective action and thinking. Focusing on individual responsibility often translates into individual blame (most often called accountability) and is usually accompanied by a reluctance to recognize the psychosocial harm that leads to physical and emotional injuries. The cost of this oversimplification is that we miss the crucial role of psychological well-being and social dynamics. This book is written for all safety leaders, executives and safety professionals. It could also have a role in supplementary reading for graduate programs.

Agentic AI for Healthcare

Building Scalable Models for Production

Edited by **Sairohith Thummarakoti**

Agentic AI for Healthcare: Building Scalable Models for Production is the first comprehensive technical guide that focuses specifically on designing and deploying agentic AI systems within complex clinical and operational healthcare environments. Unlike traditional AI systems that passively infer outcomes, agentic AI involves systems that actively make decisions, coordinate with other agents, and take initiative toward long-term goals, making them ideal for dynamic and high-stakes healthcare settings. What sets this book apart is its deep technical focus tailored for computer scientists, architects, and AI engineers who are building real-world healthcare solutions.

Artificial Intelligence in the Healthcare Market

Opportunities and Threats

Katarzyna Szalonka, Jolanta Blicharz, Wioletta Nowak, Konard Zak, Krzysztof Błowski, Tomasz Wiśniewski, and Adrianna Szalonka

The book presents a study on the identification of unmet health needs in ageing societies, indicating a gap in the supply of medical services. While the senior population is among the groups that frequently use healthcare services and where the demand gap is particularly visible, they are presented to better illustrate the need and the potential of AI's tools. The proposed models and recommendations have broader applications, addressing different patient groups and entire healthcare systems outlining the benefits and risks of using AI in the healthcare market.

2ND EDITION

Strategies for Artificial Intelligence in Healthcare

Real-World Solutions for Reshaping Healthcare Through Artificial Intelligence and Beyond

Frank Papay , Piyush Mathur

As AI technology rapidly advances, the healthcare industry is becoming its most significant and impactful beneficiary. From the authors viewpoint, AI is revolutionizing healthcare with the promise of improving patient outcomes, lowering costs, and increasing access and efficiency. The use of AI in healthcare is not a new concept. In fact, it has been around for decades, but it is only in recent years that its potential has been fully realized. From the development of new surgical techniques to the use of telemedicine for remote patient care, technology has revolutionized the way healthcare is delivered.

Feedback Intelligence

Turning Conversations into Connection

Lise Lewis Bluesky International, UK

Organisations are encouraged to provide feedback to employees, and yet so often these conversations, if mishandled, can result in more damaged relationships than positive outcomes. This book provides guidance on this specific and yet far-reaching aspect of management that most people find difficult – how to give constructive feedback, and how to avoid and overcome damaging feedback.

Freeing Up Our Future

A Field Guide to Systemic Intelligence, Leadership and Practice

Edward Rowland

In a world of increasing complexity and disruption, traditional leadership approaches often fail to address the deeper, unseen dynamics shaping organizations and communities. Freeing Up Our Future offers a new lens—systemic intelligence—to help leaders, coaches, and change-makers navigate these hidden forces and unlock the potential of living systems. Drawing on over 20 years of systemic practice and 4,000 case studies and over 90 client stories, this book is a 'field guide' that blends thought leadership with practical application.

Gender, Technology and Work Engagement

The Impact of HR Technologies on Work-Life Integration

K. G. Priyashantha

Series: Routledge Research in Human Resource Management

This book explores how HR technologies may mitigate the negative impacts of work-family conflicts on work engagement, a topic of increasing relevance in the digital era. Acknowledging the changes in gender stereotypes and its impact on work engagement, this book undertakes systematic literature reviews on gender stereotypes, work-family conflicts, work engagement and disruptive HR technologies to identify gaps in existing Human Resource Management research. Priyashantha surveys over 600 Sri Lankan private sector executives and shows that changing gender stereotypes both enhance work engagement and intensify work-family conflict.

Mental Health in Coaching Practice

Approaches to Navigate Intersecting Spaces

Anne Calleja, Ursula Clidière

Grounded in research and lived practice, it is a reflective guide for coaches, coach supervisors, and leaders who want to respond with ethical awareness, confidence, and care – without diagnosing, treating, or straying beyond their professional scope. Structured around seven guiding principles and a Why / What / How / Reflection framework, the book integrates theory with application. The Integrative Reflective Practice Model (IRM) and the Flounder–Flourish Matrix (FFM) are brought to life through case vignettes, reflective questions, and tools.

Trust and Human Resource Management

Navigating Human Capital in the Age of Transformation

Edited by Joanna Paliszewicz Warsaw University of Life Sciences, **Marta Mendel, Charles J. Priolo, Trang Nguyen**

Series: Routledge Studies in Trust Research

Trust and Human Resource Management: Navigating Human Capital in the Age of Transformation explains why trust has become one of the most practical "must-haves" for managing people today. As work is reshaped by digital platforms, data analytics, and AI tools, employees increasingly experience HR through systems and algorithms as much as through managers. This book shows how trust is built—or damaged—through everyday HR decisions such as hiring, performance evaluation, rewards, development, and the handling of conflict, and why trust matters for engagement, well-being, innovation, and retention.

Workforce Blueprint

A Framework for Scaling Talent in Industry

Leressa Suber, Michelle Bartlett

The pandemic and automation have forever changed how and where we work, what work we do, and who will do it. All this uncertainty has impacted talent pipelines in technical industries and highlighted the critical need for talent expansion and inclusion within this global sector. This book addresses the multifaceted challenges and opportunities that technical industries face in creating a diverse workforce—a unique context that has been overlooked in broader discussions of workplace diversity. It looks back on the history of diversity management and forward to best practices for expanding talent, including attracting, recruiting, and retaining all talent, including special populations.

How To Outsmart AI and Thrive

How Human-AI Collaboration Drives Innovation and Growth

Patrick D. Lynch

Most books on AI leadership are too technical, leaving you wondering what to do Monday morning. This one focuses on practical frameworks for workplace AI you can use now. Whether you're an early adopter, cautious observer, or skeptic questioning the hype, you'll find a clear path forward. Dr. Patrick Lynch introduces the THRIVE framework, a proven system for human-AI collaboration that positions AI as your partner rather than replacement. Through stories from Stitch Fix, GitHub, and JPMorgan Chase, you'll see how leading organizations use AI strategy to unlock creativity, reimagine teams, and build cultures of innovation.

Information Assets

An Executive Guide to the Untapped Driver of Business Success

James Price , Nina Evans

In the age of Artificial Intelligence, organisations are increasingly using data, information and knowledge as a competitive weapon. Their data, information and knowledge are arguably their most valuable assets. Yet, this fourth asset is managed badly when compared to the other three assets, namely money, people and infrastructure with considerable risk to the organisation. Executives are accountable for the success of their organisations, and those who fail to manage this critical resource and business enabler effectively can be regarded as negligent.

Leadership in the Imagination Age

Navigating Unprecedented Possibilities and Moral Challenges

S M A Moin

This book reframes leadership for a world transformed by AI, accelerating technologies, and planetary fragility. It argues that leadership is no longer about control or optimisation but about orientation: knowing what matters, sensing direction, and acting with moral courage when certainty collapses. At its core are three navigational frameworks – the Leadership Compass, the Moral Gyroscope, and Cosmic Leadership – guiding leaders at all levels and across disciplines through purpose, people, performance, possibility, and ethics. Ultimately, the book poses a provocative question: when machines can optimise almost everything, what remains unmistakably human about leadership?

Navigating Crisis in Higher Education

Edited by Jitendra Singh, Chris Shannon

Global crises have prompted higher education institutions to reevaluate how they deliver education. While these challenges undoubtedly create significant pressure, they also serve as a catalyst for change, compelling institutions to adapt quickly, innovate, and discover new ways to support students and maintain operations. Set against the backdrop of the recent pandemic, this book offers an in-depth exploration of the key lessons learned, and covers essential topics such as financial health and sustainability, emergency preparedness, and the integration of artificial intelligence (AI) in both academic and administrative processes within higher education institutions.

The AI Precipice

An Executive Guide to Balancing AI Innovation and Safety

Cathy Cobey, Cindy Gordon

The AI Precipice fills a significant gap by providing an executive leadership guide to balancing innovation and safety. With the rapid business transformation underway to leverage AI, executives must allocate substantial investments in governance, corporate purpose, and risk management tailored to their organization's strategic goals. The stakes are high, and very few organizations are generating positive returns on their investments. Offering a wealth of strategic and operational insights from credible sources, this authoritative resource is indispensable for senior executives aiming to design, develop, and implement successful AI initiatives within their organizations.

The Handbook of Facilities Management

A Guide to Integrated Excellence

Steve F. Sawyer

The demand for a cohesive and strategic approach to construction, facilities management, finance, real estate, and supply chain, has shifted from being merely advantageous to being a critical necessity. Such an approach mitigates risk, optimizes resources, and enhances cost efficiency. This book is relevant to all enterprises in every industry, but it continually highlights the healthcare industry because that environment is arguably the best example of the complexity, challenges and pressures in creating and maintaining facilities management unity.

The Hidden Patterns of Leadership

The Mental Models That Shape How We Lead, Team and Follow

Ian Stewart

By bringing together behavioural science, organisational psychology, and real-world case studies from global corporations, government, and the military, this book explains why leaders do what they do – it offers a model that is at once deeply human and immediately practical. This is not another leadership style model, it is a cognitive framework that explains why styles emerge in the first place and shows readers how to develop role agility across the challenges of modern organisational life.

The Matter Model

How Great Leaders Build Belonging, Strengthen Purpose and Drive Engagement at Work

Jackie Handy

The book challenges the myth that belonging is a soft concept and purpose a strategic one, showing that both are essential for teams to thrive. Through the four zones of The Matter Model, leaders will learn to: Diagnose disengagement before it costs you talent and performance. Escape the traps of transactional or drifting cultures. Unlock clarity, energy, and trust through everyday leadership actions. Build rituals that embed belonging and purpose into the rhythm of work. This book will help to cultivate environments where people feel valued, work feels purposeful, and performance flows naturally.

The Right Call

A Leader's Guide to Ethical Decision-Making in Practice

Tremaine du Preez

The Right Call is for leaders who recognise that ethics is not an afterthought but the architecture of every meaningful decision. The quality of an organisation's ethical reasoning shapes outcomes long before a dilemma becomes visible. This book shows how to strengthen that capability. The INTEGRITI™ model, a disciplined nine-step approach to leading values-based conversations, provides a clear method for turning intent into action, navigating stakeholder tensions and embedding integrity into everyday practice. This is a book for anyone responsible for choices that carry consequences.

AI Innovation in Business

How Artificial Intelligence Can Create Value for Organizations

Jonny Holmström

Unlike many AI books that take a purely technical or cheerleading angle, this book bridges strategy, management, technology, and policy to demystify the AI revolution and tackle the urgent question facing today's leaders: How can we truly unlock value from AI? Championing an ecosystem approach, Holmström reveals that capturing AI's full value is a strategic and organizational challenge that demands new ways of thinking and collaborating. For business leaders, IT professionals, and policymakers alike, this is essential reading for those looking to harness AI's potential responsibly and strategically—not merely as a tool, but as a catalyst for reinventing the future of business.

The Innovator's Journey

A Practical and Frontline Guide to Implementing a Scalable Transformation System

Todd Dunn

By fostering innovation, companies can develop new products, improve processes, and adapt to changing customer needs, which are essential for staying relevant and thriving in a competitive landscape. However, achieving innovation is often challenging due to various factors, such as resistance to change, limited resources, and organizational inertia. Employees may be hesitant to embrace new ideas due to fear of failure or uncertainty, while leaders may struggle to balance the risks associated with innovation against the need for short-term results. This book is based on the authors' journey as an innovator who built his career on implementing innovative processes in operations.

Administrative Intelligence

The Leader's Strategy for Operational Clarity and Scalable Change

Jennifer P. Wisdom , Cynthia Drake Morrow

Providing a clear and concise alternative to expensive consultants or trendy apps, it guides leaders to solve three key problems undermining organizations today: (1) employee burnout and turnover; (2) constant updates and changes to technology resources; and (3) the inability of organizations' infrastructure to keep up in a perpetually shifting and fast-paced environment. Written by consultant-researchers specializing in behavior, evidence-based practice, and ethics, this book equips CEOs, COOs, entrepreneurs, and organizational leaders with proven strategies to address burnout, streamline workflows, and unite multi-generational teams.

Building Adaptive Organisations

A Systems and Culture Approach for Thriving in a Changing Workplace

Richard Kelly

This book is a practical guide for thriving in an era characterised by volatility, complexity, and rapid technological change. It argues that the 300-year-old closed system, designed for stability and control, is not fit for purpose for the demands of Industry 4.0 and the changing workplace. The outdated pyramidal enterprise has bred disengaged workforces, out-of-touch leaders, and cultures that collapse under constant disruption. Offering clear concepts, tools, and pathways, this book equips system leaders and organisational designers to build adaptive, responsive organisations capable of navigating the turbulence of Industry 4.0 and an increasingly unpredictable world.

Operations Management for Business Excellence

Building Sustainable Supply Chains

David Gardiner Massey University, New Zealand,
Hendrik Reefke Cranfield School of Management, UK

Operations Management for Business Excellence, 5ed, provides a contemporary and analytically grounded framework for understanding how operations and supply chain management contribute to long-term organisational performance. The text integrates foundational principles of operations and supply chain management with recent developments in automation, artificial intelligence, robotics, connected systems, and real-time analytics. It examines how these technologies are reshaping operational decision-making, blurring traditional boundaries between planning and execution, and raising new questions concerning governance, ethics, and the role of human judgement in technology-enabled systems.

A Brief History of Asia's Sustained Growth

Japan, Korea, China and India's Economic Transformation

In-Chang Song

Series: Routledge Studies in Development Economics

This book explores Asia's remarkable economic transformation by examining four key nations—Japan, Korea, China, and India. It presents how these countries sustained high economic growth, leading to prosperity. The book analyses the four economies through the four pillars: (a) free and open markets, (b) accountable government and effective policies, (c) education and human capital development, and (d) saving and investment, leading to capital accumulation. The analysis reveals that the experiences of the four countries are highly divergent.

Series: Routledge Research in Business and Economics in Africa

This book offers a rare Africa-centred perspective, exploring how innovative financial instruments and entrepreneurial models can drive Africa's green economy agenda. It gives prominence to African agencies and actors, showcasing how local stakeholders, particularly women, youth, and community-based enterprises, are crafting context-sensitive solutions that bridge environmental sustainability with economic inclusion. It emphasises the need to integrate ESG principles, mobilise domestic and international capital, and align national policy frameworks with the Sustainable Development Goals (SDGs) to accelerate a just green transition.

The Labour Market in Bangladesh

Emerging Challenges, Future of Work, and Policy Direction

Farzana Munshi

Series: Routledge Studies in Development Economics

Munshi provides a comprehensive analysis of the inherent and emerging challenges in Bangladesh's labour market. Beginning with an overview of the country's labour market conditions and regulations, it examines the current issues through dedicated chapters on youth unemployment, international migration, female labour force participation, and skill formation. The analysis is grounded in empirical evidence and data, including figures from the Bangladesh Integrated Household Survey (BIHS), to offer evidence-based policy recommendations for addressing labour market shortages.

The Philippine Economy Towards 2050

Economic Structure and Monetary Reality

Jesus Felipe, **Mariel Monica Sauler**, **Christopher Cabuay**, **Alellie Sobreviñas**, **Susan Kurdli**, **Julián Pérez**, **Eva Marie Aragones**, **Gerardo Largoza**

This book provides a rigorous analysis of the factors underlying the Philippines' relative economic stagnation compared with its Southeast Asian neighbours, despite sustained optimistic government rhetoric. Three critical factors are identified: failure to industrialise and undergo a complete economic transformation; ineffective reforms that differ markedly from successful regional models; and self-defeating fiscal conservatism that has prevented investment in essential public goods and industrial policy. It offers forecasts of the Philippines' income per capita, poverty, or economic structure, through 2050.

Youth Engagement and Sustainable Finance

The Financial Power of the Next Generation

Edited by **Shakeb Akhtar**, **Nikita Singhal**, **Shikha Goyal**

Series: Banking, Money and International Finance

In the context of escalating climate crises and growing economic precarity, this book investigates the transformative role of youth as financial actors, policy influencers, and sustainability champions. It positions the next generation as active agents of financial and environmental change in the present, arguing that youth possess both the moral authority and the financial capacity to drive climate-compatible investment and consumption decisions, and that their role is critical in shifting global economies toward sustainability. Ultimately, the book offers a roadmap for integrating the financial power of youth into global climate and development strategies.

2ND EDITION

Applied Spatial Statistics and Econometrics

Data Analysis in R

Edited by **Katarzyna Kopczewska** Faculty of Economic Sciences, University of Warsaw

Series: *Routledge Advanced Texts in Economics and Finance*

Now in its second edition, *Applied Spatial Statistics and Econometrics* offers a modern and accessible introduction to spatial data analysis using R. Updates reflect the substantial evolution of spatial models and R packages, such as the transition to *sf* and *terra*, enhancements to *spatstat*, new tools for spatial sampling and bootstrap, and fully reproducible analyses with complete R code. It is an essential resource for advanced students of econometrics, spatial planning, and regional science, as well as researchers and data scientists seeking to harness the power of spatial analysis for evidence-based insights and policy recommendations.

Dynamic Programming for Economists

From Basic Growth Models to Computational Methods

Gianluca Femminis

Series: *Routledge-Giappichelli Studies in Business and Management*

Dynamic programming's analytic foundations are mathematically demanding, making existing textbooks often too technical for beginners. This book is a primer in dynamic programming and related numerical techniques, therefore addressing this gap in the extant literature. The reader is introduced to formal concepts by an application to a simple deterministic growth model. The key concepts can then be easily adapted to deal with Real Business Cycle, New Keynesian models, dynamic CAPM, and many other topics in Macroeconomics and Finance. It will help students and applied researchers to bridge the gap between very basic techniques and applications and more advanced books and resources.

A History of Jewish Statistics

Counting Jews in the Early Twentieth Century

Nicolas Vallois

From the beginning of the twentieth century, leaders of the nascent Zionist movement saw statistics as a lever for building a Jewish state. More generally, other Jewish intellectuals, Zionists and non-Zionists alike, took part in the development of "Jewish statistics", or "Jewish social sciences". This book traces the social and economic history of this research, up to the outbreak of World War II, analyzing not only its institutionalization but also its practical and theoretical objectives. This book will be of interest to readers in the history of economics and statistics and, more broadly, Jewish history, Jewish studies and the political history of minorities in the modern era.

Adam Smith's Methodology

Imagination, Rhetoric, and Rene Descartes

Jorge López Lloret

Series: Routledge Studies in the History of Economics

Most previous studies of Adam Smith's methodology, with a few exceptions, have placed considerable emphasis on the undeniable influence of Newtonian physics and Humean empiricism. This book argues that other sources are at least as important: Smith's own didactic rhetoric and the methodological writings of René Descartes. This book will appeal particularly to historians of philosophy and economic theory, as well as to scholars of Adam Smith's life and work.

Between Collapse, Integration and Co-Transformation

Universalist and Particularist Economic Ideas and Practices in Europe since the 1970s

Edited by **Kiran Klaus Patel** Ludwig Maximilian University, Germany

This book comprises a collection of essays that delves into the economic history of Europe since the 1970s, offering a fresh perspective on the period by examining the interplay between universalist and particularist claims to validity. By exploring how these claims were constructed, justified, and contested, the book sheds new light on the ways they shaped political and social change in contemporary European history. Through a critical analysis of the economy as a dynamic field, the essays uncover the complexities of universalist and particularist concepts, their interactions, and the tensions they generate, providing a nuanced understanding of their role in shaping modern Europe.

6TH EDITION

Growth of the International Economy, 1820–2025

Michael Graff, A. G. Kenwood, A. L. Loughheed

Growth of the International Economy has been the benchmark introduction to the development of the global economy for decades. Significant additions to the sixth edition include coverage of the aftermath of the Great Recession, the growing impact of China and the New Silk Route and the economic consequences of Covid-19 pandemic. References and recommendations for further reading are included at the end of each chapter to encourage additional study. It provides the reader with a clear understanding of the factors which have been instrumental in creating the economic environment we face two hundred years after the industrial revolution.

Markets in the Evolution of Economics

Remaking the Mission of the Economist

Rudi Verburg

Series: Routledge Studies in the History of Economics

This book explores the place of the market in the history of economic thought, from the origins of neoclassical economics onwards, and looks at what has been written about the role of markets in promoting cooperation and trust. The first part of the book explores the debate about markets among those British economists who shaped neoclassical economics. The book concludes by venturing into the contours of a newly evolving story of the market. This book will be essential reading for historians of economic thought and political economy who are interested in changing ideas about the role of the market.

Merchants in Global Economic History

Intermediation, Information, Trust, and Exchange

Toshiaki Tamaki

Series: Routledge Explorations in Economic History

In this book, Toshiaki analyzes merchant and entrepreneurial activity from the 11th century to 21st century, arguing that these intermediaries drive global market expansion and institutional development, as they help to connect distant regions and reduce information asymmetry. Offering a compelling alternative to static economic models and supply-side theories, this book will be of interest to scholars and students of global history, economic history, and the history of capitalism.

Spinoza, Metaphysics and Political Economy

Ethical Conduct, Social Control, and Public Policy

Samuel Hollander

Series: Routledge Studies in the History of Economics

This book explores these political economy dimensions of Spinoza's thought setting them in the context of his own wider work and the broader intellectual history landscape. The book also explores Spinoza's position on public policy, with emphasis on working-class welfare, a matter displaying a typically 'mercantilist' stance. The book will be of great interest to readers of the histories of political economy, philosophy, and political science in particular, and intellectual history more broadly.

Urbanization without Economic Growth in Pre-Industrial Italy

Rome's Long Shadow

Luigi Oddo

Series: Routledge Explorations in Economic History

This book argues that urbanization levels alone are misleading. The book shows how this legacy fostered the emergence and persistence of regional states, constrained political unification, and encouraged extractive institutional arrangements, producing urbanization without growth and contributing to delayed industrialization. By reconnecting urbanization to its deep historical foundations, this study offers a new perspective on Italy's long-run development and clarifies the longstanding urbanization puzzle.

Disequilibrium Economics

Fluctuations in the U.S. Postwar Economy

Gérard Duménil, Dominique Lévy

Series: Routledge Frontiers of Political Economy

This book is about macroeconomics as a major field of economic theory. The reference to "alternative macroeconomic theory" emphasizes the distance from mainstream and Keynesian economics. There are important groundings in this book, notably in Marxian, Keynesian, Schumpeterian, and Minskian approaches, but no strict adhesion to a particular train of thought. This book, along with its sister volume, *Instability Cycles, Distribution, and Inflation*, is essential reading for all macroeconomists and economic theorists, especially those who are open to alternative approaches.

GDP, Growth, and Welfare

In Pursuit of Economic Wellbeing

Vito Tanzi

This book examines several concepts and processes related to economic growth, such as environmental degradation and climate change; income distribution, poverty; a vibrant civil society; and personal happiness and tackles the important question of whether growth itself can create problems that reduce its welfare value to populations. The author argues that reducing our dedication to economic growth should not be interpreted as stunting the growth of countries' GDPs at their current level, but rather as focusing on paying more attention to the factors that may reduce the social benefits of this growth.

Audit and the Art of Thinking Differently

Making the Connections that Inspire a Better Future

David Hatherly, Christopher Humphrey

Inspired by ideas from philosophy and physics where everything exists courtesy of its inter-connection with other things, the book explores just how audit, society and business, and their social and commercial values, are deeply inter-connected. Consequently, the book re-evaluates how we view society and what we expect of business. The authors argue that we must recognise not just the need to think differently about audit but also to regard 'thinking differently' as the very essence of audit. Thus, the book is an invitation to all with an interest in progress – auditors, policy makers, business leaders, educators, investors and the public – to reformulate how they view audit.

Derivatives

Mathematical Foundations for Finance Students

Declan French

Derivatives is written for students of finance and actuarial science who want to understand derivatives not just as formulas but as ideas that make sense. The goal is to build the mathematical foundations up step by step – starting from the familiar territory of first-year undergraduate probability and statistics and moving all the way to stochastic calculus and the principles of risk-neutral pricing, which form the heart of modern financial mathematics. It will appeal to both undergraduate and postgraduate students who wish to understand the principles of stochastic calculus and option pricing.

Enrico Berbenni

Series: Financial History

This book examines Italian economic initiatives in Egypt from the late nineteenth century to the Second World War, focusing in particular on the banking sector as the cornerstone of Italy's economic strategy, both as a driver of investment and as a key instrument for broader economic expansion. Drawing on largely unpublished banking and diplomatic sources, the book traces the history of Italian banks in Egypt. The book is primarily aimed at business history scholars, particularly those interested in multinational banking and financial history, but will also appeal to readers interested in imperial history, minority communities, and international relations generally.

Post-Crash Development in the Indian Banking Sector

Efficiency, Competition, and Credit Risk

Rachita Gulati India Institute of Technology Roorkee, India,
Sunil Kumar South Asian University, India

Series: Routledge International Studies in Money and Banking

The Indian banking sector has undergone a profound transformation in the wake of successive economic disruptions - the global financial crisis of 2007-09, the local banking crisis of 2013-17, the currency notes ban crisis of 2016-17, and the COVID-19 pandemic. Each episode has exposed latent vulnerabilities in the financial system: inefficiencies in intermediation, the build-up of credit risk, and structural imbalances in competition.

Public-Private Partnerships in China

Governance Logic and Policy Implications

Shikun Qin

Since 2014, China has developed what is now the world's largest Public-Private Partnerships (PPPs) market. This book provides a comprehensive and empirically grounded exploration of China's experience with PPPs. The empirical chapters assess the extent to which spatial diffusion theory, transaction cost theory, capital structure theory, and cutback management theory explain the dynamics observed in practice, while also offering a timely assessment of recent PPP reforms in China. The book will be of interest to scholars seeking to understand the evolution of PPP governance, as well as policymakers and practitioners looking for evidence-based insights.

The Economics and Finance of the Green Transition

Financial Instruments, Institutional Analysis, and Policy Design

Ewelina Sokołowska, Magdalena Olczyk

Series: Banking, Money and International Finance

Written for academics, policymakers, regulators, practitioners, and graduate students in economics, finance, and sustainability, the book offers a framework for understanding how the green transition can be governed under turbulence. It provides tools for identifying binding constraints, evaluating resilience, and understanding how credibility, sequencing, and uncertainty affect investment. Rather than offering a blueprint, it shows how transitions depend on managing sequences of constraints over time. Its central message is that a sustainable transition depends not on ambition alone, but on institutions capable of making long-term commitment credible under structural uncertainty.

8TH EDITION

The Psychology of Investing

John R. Nofsinger

While traditional finance focuses on the tools used to optimize return and minimize risk, this book shows how psychology can explain our decisions more than financial theory. Analyzing how investors behave in the real world, this classic text delves into the ways biases influence investment behavior, and how overcoming these biases can increase financial success. The eighth edition features a new chapter on FinTech and behavioral finance, as well as coverage of AI considerations. It will prove fascinating and educational for advanced students in behavioral finance, investment and portfolio management classes, as well as investors, financial planners and aspiring finance professionals.

Whistleblowing Systems

A Comparative Perspective

Aaron Ezroj

Series: Routledge Studies in the Economics of Business and Industry

This book provides a comparative perspective of whistleblowing systems across the world. It discusses the emergence of whistleblowing systems, identifying landmark events and offers pertinent information to employers, employees, academics, government policymakers and attorneys. Finally, the author examines design components that make whistleblowing systems successful and assesses where there are likely to be future developments, demonstrating that properly functioning whistleblowing systems are not only important morally, but they also ensure that banking, money and international finance will thrive.

Women in Turbulent Times

Crises, Transitions and Challenges for Gender Equality

Edited by Jill Rubery, Núria Sánchez-Mira, Valeria Insarauto

Series: Routledge IAFPE Advances in Feminist Economics

This book offers a long-term perspective on turbulence, grounded on comparative and country evidence from Europe, the USA, Australia and the Global South. It traces how acute shocks, chronic crises and systemic transformations reverberate through labour markets, households and state policies, reshaping gender inequalities and vulnerabilities and their intersections. It argues that turmoil is evolving into a polycrisis—an entanglement of economic, social, and ecological disruptions—while exposing a critical but neglected dimension of turbulence: the crisis of social reproduction and women's pivotal role in managing the tensions between production and the social reproduction spheres.

Energy Resilience and Sustainability in BRICS+ Economies

A Policy Analysis Perspective

Edited by **Sriram Divi**, **Venkat Ram Reddy Minampati**,
Fulufhelo Netswera, **Ndivhuho Tshikovhi**, **Shereen
Nassar**

Series: *Routledge Studies in the Modern World Economy*

This book highlights the role of BRICS+ nations in enhancing global energy resilience. What sets this work apart is its emphasis on the vulnerabilities of these nations, characterized by fiscally fragile economies heavily reliant on imported energy. It delves into the international externalities that make these nations susceptible, compounded by their geological predisposition to volatility. The book charts a course for change, proposing a systematic departure from these disruptions through academic insights and elaborations, laying the foundation for sustained and successful growth.

AI, Blockchain and the Circular Economy

Building Resilient, Regenerative and Sustainable Supply Chains

Edited by Manu Sharma, Sanjay Taneja, Ewelina Idziak

Series: Routledge Studies in the Economics of Innovation

In an era defined by climate urgency, resource scarcity, and technological disruption, this book offers a compelling roadmap for reimagining supply chains and business models. By weaving together the transformative capabilities of artificial intelligence and blockchain with the principles of the circular economy, it demonstrates how organizations can shift from linear "take-make-dispose" systems to regenerative, data-driven networks that minimize waste, maximize transparency, and build long-term resilience. Adopting a mixed methods approach, the book offers both academic insights and practical strategies to build resilient and future-ready supply chain systems.

Cultural and Creative Industries in Ghana

Policy, Labour and Entrepreneurship

Edited by **Thilde Langevang**, **Akosua K. Darkwah**
University of Ghana, Ghana, **Katherine V. Gough**

Series: *Creative Economies in Africa*

This book examines the rapid growth and rising global visibility of Africa's cultural and creative industries (CCIs) and how they are reshaping debates on economic and cultural development across the continent. Focusing on Ghana, the book explores how the development of CCIs is shaped through the interplay of creative policy, labour conditions, and entrepreneurial practices. While CCIs are increasingly celebrated for their potential, they continue to be constrained by precarious labour conditions, limited access to finance, weak infrastructure, and inadequate policy frameworks that often fail to reflect local realities.

Central Bank Digital Currencies in Asia Pacific

Barriers to Design, Development, and Implementation

Simeon Lawson

Series: *Routledge International Studies in Money and Banking*

Focused on the Asia Pacific region, this book examines the motivations behind CBDC adoption, the design and technological requirements, and the policy challenges faced by central banks. Using nations within Asia Pacific as case studies, it asks whether the potential design of CBDC will be influenced by the jurisdiction's regulation of legal tender and the central bank's motivations for exploring CBDC, considering the required technological capabilities. Analysing legal tender regulation, central bank motivations, and the technological capabilities of CBDCs, the book provides readers with insights into navigating implementation challenges and pursuing broad public adoption.

Decarbonisation and the Reshaping of Risk

Finance, Behaviour and Governance in the Transition

Edited by **Maurizio Pompella**, **Cristina Roxana Tanasescu**

Series: *Routledge International Studies in Money and Banking*

This book presents a comprehensive and innovative analysis of decarbonisation and reshaping of risk in contemporary financial and institutional systems. It develops a multidimensional approach that integrates finance, behavioural dynamics and governance within ongoing technological and climate transformations. The novelty of the volume lies in reframing decarbonisation as a structural reconfiguration of risk, rather than merely a regulatory or reporting challenge. It will be of interest to academics, advanced students and researchers concerned with decarbonisation, transition risk, sustainable finance, and the evolving governance of financial and institutional systems.

Development Institutions in The European Economy

Innovation, Economic Growth and Competitiveness

Marta Postuła, **Arkadiusz Garbarczyk**

Series: *Routledge Studies in the European Economy*

In the face of deglobalisation, decreased competitiveness and the lack of innovation in European Union countries, national development institutions have emerged as an effective tool in the hands of governments on the path to long-term sustainable economic growth. This book analyzes the contemporary economic situation in selected EU countries, diagnosing key structural challenges and evaluating the capacity of development institutions to address them. Bridging the gap between economic theory and banking practice, this volume is an essential resource for academics in macroeconomics and public finance, as well as policymakers shaping the future of the European financial architecture.

ESG Risk in Investment Funds and Insurance

Regulatory Perspectives and Market Reaction

Patrycja Chodnicka-Jaworska

Series: *Banking, Money and International Finance*

This book provides a comprehensive analysis of the regulatory framework governing sustainability in the non-banking financial sector, with particular emphasis on insurance companies and investment funds. It examines the implications of environmental, social, and governance (ESG) and climate-related regulations for ESG risk to management practices and market behaviour within these institutions. While existing literature predominantly focuses on the banking sector, this book addresses a significant research gap by offering an in-depth examination of non-banking financial institutions.

ESG Risk Management in Banking

Strategy, Regulation, and Market Reaction

Patrycja Chodnicka-Jaworska, **Annalisa Ferrari**

Series: *Banking, Money and International Finance*

This book provides a comprehensive overview of the definitions, trends, and regulatory approaches to ESG risk in the banking sector. It examines how banks develop strategies for managing ESG risks, and how stock, bond, and credit markets respond to such risks, including the implications of regulatory changes. Company size, geographical location, and industry characteristics are analyzed as key factors shaping these dynamics. By combining a review of current regulations and initiatives with practical perspectives on ESG risk management, the book offers both theoretical and applied insights.

Financial Instability and Systemic Risk

From the Global Financial Crisis and Beyond

Jagoda Kaszowska-Mojša

Series: Routledge International Studies in Money and Banking

This book illustrates how agent-based modelling (ABM) can enrich the study of crises, systemic risk and uncertainty, and the distributional effects of policies that are designed to contain them. Rather than treating crises as external shocks, the book highlights how fragility can emerge endogenously within economies that are understood as complex, evolving systems. Through clear explanations and targeted applications, it not only demonstrates how ABM can capture the effects of macroprudential regulation on the real economy and inequality and shed light on moments of financial instability but also provides a practical guide to building such data-driven models in the first place.

Interest Rates and Asset Values

A Case Study in Closed Markets

Richard Thomas

Series: Routledge Focus on Economics and Finance

In the complex world of corporate strategy and market dynamics, very few questions are as fundamental as understanding what drives the value of business assets. This book presents the first comprehensive empirical analysis of the causal relationship between interest rates and asset values in closed markets, using the unique example of the UK retail pharmacy sector, a market closed by regulation for over three decades. The book will appeal to researchers, scholars and advanced students in economics, business, finance and public policy, as well as policymakers, regulators, professional valuers and consultants.

Macroeconomic Challenges in Central and Eastern Europe

Sustainable Growth and Economic Resilience

Edited by Paweł Gajewski

Series: Routledge Studies in Central and Eastern European Business and Economics

This book invites readers into the evolving economic story of Central and Eastern Europe (CEE), a region often misunderstood yet vital to Europe's future. Since the fall of communism, CEE has transformed, integrating with the EU and closing economic gaps with the West through rapid income growth. The book asks whether this progress is sustainable and examines whether the region is converging with advanced economies or stagnating in the middle-income trap. It offers a compelling exploration, confronting common assumptions and shedding new light on the region's complex challenges, making it an insightful read for researchers, scholars and policymakers.

The Economic Credibility of the State

Governance, Institutions, and the Challenge of Populism

Edited by Jerzy Hausner, Andrzej Sławiński

Series: Routledge Studies in the European Economy

This book argues that economic credibility must be assessed not only by financial stability and growth but also by a state's ability to uphold democracy and long-term social cohesion. It explores how political decisions, institutional integrity, and public trust shape economic policy. Drawing from years of research, the authors highlight the consequences of populist governance, which often undermines economic efficiency and democratic stability. The book offers a comprehensive framework for assessing a state's economic credibility, advocating for a more holistic, democracy-supporting approach. Readers will gain a fresh and interdisciplinary understanding of economic credibility.

The Economics of Public Issues

John Tommasi

The Economics of Public Issues bridges the gap between abstract economic theory and the real-world outcomes of public policy. Written in clear, accessible language, it explores why well-intentioned programs so often lead to results that differ sharply from what policymakers envisioned. Organized into four thematic sections, the book examines how economic reasoning applies to markets and regulation, redistribution, globalization and environmental dimensions. Accompanied by PowerPoint slides, a teaching guide and MCQs, this book is a crucial companion for undergraduates, MBA students and instructors who wish to understand that economics is not just about money, but about choice.

Trade War Economics

The Geoeconomics of Reciprocal Tariffs and Macroeconomic Instability

Edited by **Rajesh Kumar , Prasoon M. Tripathi , Debasis Neogi , Abhishek Bhushan Singh**

Series: Routledge Studies in the Modern World Economy

In an era marked by multipolar power rivalries, pandemic-era protectionism, and institutional fragmentation, global trade is undergoing a strategic shift. This book investigates the resurgence of reciprocal tariff wars in the 21st century. By uniting perspectives from international economics and political economy, the book examines why these retaliatory trade conflicts have resurfaced, how they are unfolding across different regions, and what consequences they hold for the stability of the global economic order. This book will appeal to scholars of international trade, macroeconomic governance, and global politics, as well as policymakers navigating a fractured trade order.

Economics and Management

Essentials with Applications

G. Cornelis van Kooten

Economics and Management offers an intermediate-level introduction to economic and operations research concepts. A key feature of the book is its integration of Artificial Intelligence into economic analysis. Students learn to use AI to write R code for simulations, regression modeling, and optimization problems, making complex coding accessible to non-programmers. Applications include stochastic cost-benefit analysis, sales forecasting, and tariff analysis. Economics and Management provides a holistic and practical approach to economics, enabling students from non-economics backgrounds to confidently address real-world challenges.

The Economics of a Breakaway Football League

The Rise and Fall of Colombia's El Dorado in the 1950s

Jorge Tovar, Andrés Álvarez

Series: Routledge Focus on Economics and Finance

The Colombian professional football league was a brief but remarkable experiment that attracted top South American and European players in the early 1950s, commonly referred to as El Dorado. This book explores how a small, economically underdeveloped country with no established football tradition managed to finance such a high-profile "pirate" league while confronting the international football establishment. The book also traces the collapse of the league and its lasting ramifications for the history of football in the region. It will be of great interest to readers in sports economics, sports history, economic history, and Latin American studies.

The Economics of Cybercrime

A Complexity Science Approach

Piotr Wiśniewski

Series: Routledge Studies in the Economics of Business and Industry

Economic research in cybercrime requires stepping beyond a mainstream economic approach. Complexity economics shows that every economic phenomenon is influenced by a plethora of factors rooted in various fields of science. This book utilizes a complexity economics approach as the main framework for cybercrime research; whereby economic problems are analysed in a complex manner not constrained by tradition or a body of work limited to one discipline. It will be valuable to policymakers and academics in the fields of economics and cybersecurity studies and will be especially interesting to the complexity economics community.

The Economics of MedTech Innovation

Balancing Patient Safety with Economic Growth

Andreas Peters

Series: Routledge Studies in the Economics of Innovation

This book examines a fundamental problem in European medical technology innovation: the disconnect between patent protection periods and increasingly lengthy regulatory approval processes, demonstrating that Europe's current system forces companies to abandon breakthrough innovations in favor of incremental improvements. It combines legal analysis, mathematical modelling, and policy evaluation. With its quantitative rigour and policy relevance, the book targets a multidisciplinary readership of academics in law, economics, and innovation policy, policymakers, regulators at European Union institutions, and industry professionals.

A Classical-Keynesian Approach to Macroeconomics

Growth, Production, and the Environment

Edited by **Eladio Febrero** Faculty of Social Sciences, University of Castilla-La Mancha, Spain., **Maria Angeles Cadarso** University of Castilla - La Mancha, Spain, **Ferran Portella-Carbó** University of the Balearic Islands, Palma, Spain.

Series: *Routledge Frontiers of Political Economy*

This book outlines a coherent Classical-Keynesian approach to economics - one grounded in the Classical theory of value, the Keynesian principle of effective demand, and the post-Keynesian perspective on money and finance. The essays explore the dynamics of an advanced market economy, understood as a process organised according to the sequence: finance-production-distribution-spending and accumulation. This book will be essential reading for researchers in political economy, history of economic thought, economic theory, heterodox economics and alternatives to the mainstream.

Black Women in the U.S. Economy

The Hardest Working Woman

Edited by **Nina Banks** Bucknell University, USA, **Rhonda Vonshay Sharpe** Bucknell University, USA

Series: *Routledge IAFPE Advances in Feminist Economics*

This important and illuminating study explores the impact of economic, structural, and policy changes since the 1970s on the status and well-being of Black women in the U.S. It examines the rise in income and wealth inequality and subsequent economic downturns on Black women and their families given the changing relationship between the state, markets, and families over this period of time. It challenges the popular rhetoric about Black women's work experiences, economic status, and role in providing for and sustaining their families and communities, and will be essential reading for anyone seeking a deeper understanding of Black women's experiences within the political economy.

Keynes and Macroeconomics

An Alternative Theory of Employment, Finance and Sustainability

Arne Heise University of Hamburg, Dep of Socioeconomics, Von-Melle-Park 9, 20146, Hamburg/Germany.

Series: Routledge Frontiers of Political Economy

-In 1936 John Maynard Keynes published a book that he believed would revolutionize the way the world thinks about economic problems: The General Theory of Employment, Interest, and Money. Although the book became the foundation of a particular approach to economic theorizing—later termed macroeconomics. -This book not only revisits the debate on the 'revolution that never was' within a philosophy of science framework. -The book will be of interest to all readers seeking alternatives to mainstream economics, advocating for a pluralistic approach to the discipline, and looking for a key to understanding the different strands of Post-Keynesianism.

Marx, the State, and Primitive Accumulation

Rethinking Dispossession Under Capitalism

Raju J Das York University, Canada

Series: Routledge Frontiers of Political Economy

Critically engaging with contributions from both the Global North and South, this book offers a systematic rethinking of Marx's concept of primitive accumulation and its relevance to contemporary capitalism. The book argues that recent attempts to reinterpret dispossession often suffer from conceptual overstretch and a neglect of production and class relations. It will be of interest to scholars and students across the social sciences, as well as to readers concerned with Marxist political and economic thought, capitalism, dispossession, and the state.

Nativism and Capitalism

From Colonial Hauntings to Radical Indigenous Futures

Peter Bloom The Open University, UK

Series: Routledge Frontiers of Political Economy

Nativism and Capitalism: From Colonial Hauntings to Radical Indigenous Futures offers a sweeping reappraisal of nativism as a central force within global capitalism rather than a simple reaction against it. The book traces how contemporary movements convert economic dispossession into racialized narratives of authenticity and exclusion. It is essential reading for scholars in political science, sociology, anthropology, economics, and cultural studies, as well as policymakers and activists working on nationalism, migration, global justice, and Indigenous rights.

Public Economics and Democracy

The Moral Foundations of Economic Governance

Shahzavar Karimzadi

Series: Routledge Frontiers of Political Economy

This book argues that only a democratic government that can meet the conditions of legitimacy and economic efficiency that is consistent with freedom and social justice. The book outlines the fundamental elements and methods of public economics and exposes the constraints of standard public economics in relation to the legitimacy of government. The main goal of the book is to draw a clear demarcation line between democratic states and undemocratic states and to spell out clearly the essential place of the state in the economy. This book makes a significant contribution to the field of public economics.

Rainbow Liberty

Liberal Political Economy and Queer Freedom

Edited by **Nathan P. Goodman**, **Jordan K. Lofthouse**, **Mikayla Novak**

This volume uses classical liberal thought to present new theoretical and empirical perspectives on freedom of LGBTQ individuals and communities. Rainbow Liberty emphasizes the institutions that sustain tolerance, pluralism, and freedom of association, which empower marginalized communities to build civil associations in the face of social and political pressures. This volume is an invaluable resource for scholars exploring sexuality and gender from a variety of disciplines, including economics, political science, philosophy, sociology, and related fields.

Reimagining the Welfare State

Celia Lessa Kerstenetzky Universidade Federal do Rio de Janeiro, Instituto de Economia, Reitoria – UFRJ, Cidade Universitária.

Series: *Routledge Frontiers of Political Economy*

This book argues that the critical expansion of public social services is central to addressing these challenges. The book draws on a wide range of theoretical traditions, including the capability approach, development studies, welfare state scholarship, and the UK's Universal Basic Services perspective. The book will be of interest to scholars and students of development, welfare state studies, social investment, well-being, labour markets, economic inequality (including gender and racial) and distributional macroeconomics.

The BRICs and the Global Agrifood System

Varieties of Capitalism and Food Regime Transformation

Edited by **Fabiano Escher**

Series: *Routledge Frontiers of Political Economy*

The BRICS grouping - Brazil, Russia, India, China, and South Africa - jointly founded the New Development Bank and the Contingent Reserve Arrangement as part of their efforts to constitute a trade, monetary and geopolitical bloc. This book provides a comparative institutional analysis of the BRICS 'varieties of capitalism' and their role in the international reordering of the contemporary 'food regime'. The book will appeal to an international readership interested in agrarian political economy, economic sociology, rural and agrifood studies, and the future of the global economy.

The End of the American Era of Globalization

Historical and International Perspectives

Andrés Solimano

Series: *Routledge Studies in the Modern World Economy*

The book examines the current backlash to neoliberal globalization driven by the United States, a country that until recently had promoted economic globalization. It illuminates this dramatic process by examining the waves of globalization from the Renaissance to current times and the different realities of globalization for the global north, the global south, and former socialist countries of the soviet bloc. It discusses wealth inequality, the social impact of rapid technological change and the factory system, the challenges of economic stabilization and austerity in unequal societies, and calls for a more stable, socially equitable and ecologically sustainable new globalization.

The Political Economy of Bolivia and Peru

The Impact of Extractivism in Post-Neoliberal Times

Daniel Agramont-Lechin

Series: *Global Challenges in Political Economy*

The book examines why both Bolivia and Peru remain highly dependent on primary commodity exports. Drawing on a comparative framework that combines world-systems analysis and political settlements theory, it assesses how global economic pressures were mediated through distinct domestic coalitions, institutions, and strategies of rent distribution. The analysis shows that neither country succeeded in fundamentally transforming its position within the global economy. Instead, the underlying pattern of surplus extraction from peripheral economies by core actors persists, albeit through reconfigured mechanisms.

The Political Economy of Housing the Urban Poor

An Asian Perspective

Yap Kioe Sheng

Series: *Routledge Research in Sustainable Planning and Development in Asia*

This book critically examines the application of the enabling housing strategy in Asia. It assesses why this market-driven strategies have systematically failed to meet the housing needs of the urban poor in Asian cities. A book of vital interest to students, researchers, and academics in urban planning, housing, architecture, development studies, and urban economics. It will also be of interest to policymakers, housing activists of NGOs, and private-sector developers in developing countries.

Welfare States after the Eurozone Crisis

An Evolutionary Economics Perspective

Cristina Soeiro Matos

Series: Routledge Frontiers of Political Economy

This book develops an evolutionary economics approach to welfare state dynamics. Welfare states are complex settings, including social insurance, social assistance and universal provisions. Their main aim is to shelter household incomes from instability and redistribute incomes. The book analyses welfare states in terms of how they pool business cycle uncertainty between the state (social security), firms, and households.

Evolving Intelligent Environments

Smart Ecosystems and Transformative Innovations in the 21st Century

Nicos Komninos

Series: Routledge Advances in Regional Economics, Science and Policy

This book advances a novel and interdisciplinary framework for understanding intelligent environments, grounded in the concept of connected intelligence, the integration of human, collective, and machine intelligence. It explores how this integration operates within real-world smart ecosystems to drive transformative innovations in sustainability, carbon neutrality, urban efficiency, and liveability. Departing from approaches that treat intelligent systems as purely technological constructs, it reframes intelligent environments as socio-technical systems that remain fundamentally human-centric, even in the age of AI.

Higher Education and Regional Green Transitions

Navigating Tensions, Complexities and Solutions

Edited by Rómulo Pinheiro, Ina Drejer, Dзамila Bienkowska, Vito Laterza, Markku Sotarauta

Series: Regions and Cities

Higher education institutions (HEIs) play a pivotal yet underexplored role in Regional Green Transitions (RGTs) and sustainable development. This volume addresses this knowledge gap by examining how universities in the Nordic region engage with RGTs, offering theoretical and methodological insights from diverse disciplines such as economic geography, political economy, organizational theory, and education. The Nordic region, often regarded as a benchmark for best practices in education, research, innovation, and regional development, serves as the backdrop for this exploration.

Public-Housing Privatisation

Tenure Value, Resale Governance, and Mobility

Zheng Linzi

Focusing on Hong Kong's Tenants Purchase Scheme, this book examines the implications of transforming public tenants into homeowners, particularly in terms of creating properties that are marketable, financeable, and conducive to upward mobility. Spanning decades of housing reform, it explores how governments can promote homeownership while preserving mobility and public value, offering a valuable resource for advancing housing policy. This book will appeal to scholars and policymakers working in housing policy, public administration, and real estate economics.

Resilient and Generative Smart Cities

Innovation, Creativity and Urban Sustainability

Marino Cavallo

Series: Routledge Advances in Regional Economics, Science and Policy

The smart city is not merely a set of digital infrastructures, but a complex ecosystem in which technological networks, human capital, and urban communities intertwine. This volume explores the smart city as a relational space, a place where innovation, creativity, and resilience redefine urban development. It presents a new paradigm of a generative and resilient smart city: one that can attract talent and diversity, transform fragilities into resources, and build new forms of environmental sustainability and social cohesion. It is intended for scholars, public administrators and planners, as well as those interested in the challenges and opportunities of the city to come.

The Evolution of UK Regional Policy

Lessons from the Past for a Policy Fit for the Future

Edited by Ron Martin

Series: Regions and Cities

The UK has one of the highest levels of spatial economic inequality of any of the OECD nations. This collection of interrogative essays, by experts in their respective fields, examines past policies to identify both their positive and the negative aspects with a view to explaining the question of why past regional policies have had such limited lasting impact. Recent major policy initiatives are examined and recurring weaknesses of past policies are identified (including inadequate resources, excessive churn of policies, a lack of strategic vision and a disproportionate concentration of economic, financial and political power in London).
