Introducing Human Geographies

Edited By **Kelly Dombroski, Mark Goodwin, Junxi Qian, Andrew Williams, Paul Cloke**

Introducing Human Geographies is a 'travel guide' into the academic subject of human geography and the things that it studies. The coverage of the new edition has been thoroughly refreshed to reflect and engage with the contemporary nature and direction of human geography. The book is designed especially for students new to university degree courses in human geography across the world, and is an essential reference for undergraduate students on courses related to society, place, culture and space.

AUTHOR

Kelly Dombroski is a Rutherford Discovery Fellow and Associate Professor of Geography at Te Kunenga ki Pūrehuroa | Massey University, Aotearoa New Zealand.

Mark Goodwin is Emeritus Professor of Human Geography at the University of Exeter, UK.

Junxi Qian is Associate Professor in the Department of Geography, The University of Hong Kong, Hong Kong SAR.

Andrew Williams is Course Director in Human Geography at Cardiff University, Wales.

Paul Cloke was Emeritus Professor of Human Geography, University of Exeter, UK

Geographies of Food and Power

Amy Trauger University of Georgia, USA

This book provides a comprehensive overview of the production and consumption of food, suitable for use in undergraduate classrooms, either at the intermediate or advanced level. *Geographies of Food and Power* takes a synthetic approach by discussing food as something produced within an interconnected system, in which labor, food quality and the environment are considered together. It will be a valuable resource for students of human geography, environmental geography, economic geography, food studies and development.

Global Food Security

What Matters?

Zhang-Yue Zhou James Cook University, Australia

Series: Routledge Textbooks in Environmental and Agricultural Economics

This book looks at food security from a socio-economic perspective. It offers a detailed and systematic examination of food security from its historical backgrounds, concepts and measurements, to the determinants and approaches to achieve food security. The book also introduces the key challenges and root causes of food insecurity. Through country-specific cases, the book highlights instances of both successful and disastrous national food security management and their outcomes. The invaluable learning experiences of these countries shed light on food security practices, and the straightforward demand-supply framework effectively guides readers in understanding food security issues.

Global Foodscapes

Oppression and resistance in the life of food

Alistair Fraser Maynooth University, Ireland

Global Foodscapes is a highly accessible and useful text for undergraduate students interested in the global food economy. The text explores how food is conceived, traded, grown, reared, processed, sold, and consumed; investigates what goes wrong along the way; and assesses what diverse people around the world are doing to fix these faults. It draws on case studies from around the world that illuminate key issues about food in today's world; examines how oppression affects diverse people caught up in the food economy; and highlights how individuals, groups, and institutions such as governments, but also firms, are trying to improve how we interact with the food system.

2ND EDITION

Geographies of Globalization

Warwick Murray Victoria University of Wellington, New Zealand, **John Overton** Victoria, University of Wellington, NZ

Series: Routledge Contemporary Human Geography Series

Geographies of Globalization offers a lively exploration of the geographical impacts of globalization and the distinctive contribution of human geography to studies and debates in this field. Fully up-to-date and engaging, this work critically appraises the concept and processes of globalization from a geographical perspective, debates the historical evolution of globalized society and illustrates how the core principles of human geography leads to a better understanding of the phenomenon.

Handbook of Local and Regional Development

Edited by **Andy Pike** , **Andres Rodriguez-Pose** , **John Tomaney**

This book provides a comprehensive statement and reference point for local and regional development in an international and multi-disciplinary context. Specifically, it aims to provide critical reviews and appraisals of the current state of the art and future development of conceptual and theoretical approaches as well as empirical knowledge and understanding of local and regional development, to encourage dialogue across the disciplinary barriers between notions of 'local and regional development' in the Global North and 'development studies' in the Global South.

2ND EDITION

Local and Regional Development

Andy Pike , **Andrés Rodríguez-Pose** , **John Tomaney**

Local and Regional Development provides an accessible, critical and integrated examination of local and regional development theory, institutions and policy in this changing context. Amidst its rising importance, the book addresses the fundamental issues of 'what kind of local and regional development and for whom?', its purposes, principles and values, frameworks of understanding, approaches and interventions throughout the world. The title concludes by identifying what might constitute holistic, inclusive, progressive and sustainable local and regional development, and reflecting upon its limits and political renewal.

2ND EDITION

Global Migration

Patterns, Processes and Politics

Elizabeth Mavroudi, **Caroline Nagel** University of South Carolina, US

This new, fully updated edition of *Global Migration* provides students with a thorough and grounded understanding of multiple dimensions of migration, including labour markets, citizenship, border control, integration, and identity. Written by two geographers, the book incorporates insights from across the social sciences and is accessible to students in many disciplines. *Global Migration* serves as the go-to book for teaching advanced undergraduate and Master's-level students about the complexities of migration across nation-state borders.

2ND EDITION

Migration

Michael Samers University of Kentucky, USA, **Michael Collyer** University of Sussex, UK

Series: Key Ideas in Geography

Now in its second edition, *Migration* provides a critical, multi-disciplinary, advanced, and theoretically-informed introduction to migration and immigration. The multi-disciplinary text draws on insights from human geography, political science, social anthropology, sociology, and to a lesser extent economics. Revised and updated with new material, new maps and illustrations and an accompanying website, it continues to be aimed at advanced undergraduates and Masters-level graduate students undertaking courses on migration and immigration.

2ND EDITION

Cities and Development

Sean Fox University of Bristol, UK, **Tom Goodfellow**
University of Sheffield, UK

Series: Routledge Perspectives on Development

In the five years since the first edition of *Cities and Development* was published, awareness of the challenges associated with urban growth in the developing world has grown significantly. More than a billion of the world's people live in slums, a shocking statistic that is set to more than double within the next 20 years unless serious interventions are made. This has consequently become a key focus for international aid appeals and research. This revised edition provides an updated critical review of the dynamic relationship between urbanism and development. Building on the success of the first edition, the authors have brought the chapters and the selection of literature up to date.

Contemporary Co-housing in Europe

Towards Sustainable Cities?

Edited by **Pernilla Hagbert** , **Henrik Gutzon Larsen** ,
Håkan Thörn , **Cathrin Wasshede**

This book investigates co-housing as an alternative housing form in relation to sustainable urban development. This book will be of interest to students and researchers in a broad range of social-scientific fields concerned with housing, urban development and sustainability, as well as to planners, decision-makers and activists.

Routledge

2ND EDITION

Water Resources

An Integrated Approach

*Edited by* **Joseph Holden** University of Leeds, UK

The second edition provides students with a comprehensive overview of natural processes associated with water and the modifications of these processes by humans through climate change and land management, water-related health issues, engineering approaches to water and socio-economic processes of huge importance to water resources. The book contains chapters written by 24 specialist contributors, providing expert depth of coverage to topics. It will be an indispensable guide to undergraduates studying Water Resources and Management, Geography of Water, and Water in the Environment.

Climate Change

Mike Hulme

Series: Key Ideas in Geography

Written by a leading geographer of climate, this book offers a unique guide to students and general readers alike for making sense of this profound, far-reaching and contested idea. It presents climate change as an idea with a past, a present and a future. The book is written as a student text, suitable for disciplinary and inter-disciplinary undergraduate and graduate courses that embrace climate change from within social science and humanities disciplines. Science students studying climate change on inter-disciplinary programmes will also benefit from reading it, as too will the general reader looking for a fresh and distinctive account of climate change.

Climate Change and Development

Thomas Tanner Overseas Development Institute, UK,
Leo Horn-Phanthanotai

Series: Routledge Perspectives on Development

Climate Change and Development brings together insights and perspectives from across natural and social science disciplines. Focusing in particular on concerns and perspectives of poor countries and poor people, its hallmark is its concern with structural considerations at the heart of the climate-development nexus. It argues that a transformational – rather than incremental – approach to tackling climate change challenges offers the best route to reducing poverty, stabilising the climate and securing the future well-being of all.

2ND EDITION

Global Climate Change

Turning Knowledge Into Action

David Kitchen

Earth's climate is changing. This book investigates the scientific, environmental, social, political and economic aspects of climate change. It enables students to reach an informed opinion and encourages active engagement in finding solutions. This textbook will be an essential resource for students taking courses in environmental geography, climate change, natural hazards, climatology and meteorology.

7TH EDITION

The Global Casino

An Introduction to Environmental Issues

Nick Middleton

This book is an introduction to environmental issues which deals both with the workings of the physical environment and the political, economic and social frameworks in which the issues occur. Using examples from all over the world, the book highlights the underlying causes behind environmental problems, the human actions which have made them issues, and the hopes for solutions. It is a book about the human impact on the environment and the ways in which the natural environment impacts human society. An essential resource for students of the environment, geography, development studies and earth sciences.

Conducting Research in Conservation

Social Science Methods and Practice

Helen Newing University of Kent, UK

This is the first textbook on social science research methods for use in the expanding and increasingly multidisciplinary field of environmental conservation. It is divided into five useful sections and illustrated throughout with practical examples of conservation-related research from different parts of the world (Europe, the Americas, Africa, Asia, Australia) and different ecosystems (forests, grasslands, desert, marine and riverine systems; also farmland and home gardens). It will be an invaluable tool in the training of the next generation of conservation professionals.

Companion to Environmental Studies

Edited by **Noel Castree** University of Manchester, UK, **Mike Hulme** Kings College London, UK, **James D. Proctor**

The Companion offers a comprehensive and interdisciplinary overview of the key issues, debates, concepts, approaches and questions that together define environmental studies today. The intellectually wide-ranging volume covers approaches in environmental science all the way through to humanistic and post-natural perspectives on the biophysical world. Over a hundred and fifty short chapters written by leading international experts provide concise, authoritative and easy-to-use summaries of all the major and emerging dominating the field. The book offers an essential one-stop reference to university students, academics, policy makers.

Energy and Society

A Critical Perspective

Gavin Bridge Durham University, UK, **Stewart Barr** University of Exeter, UK, **Stefan Bouzarovski**, **Michael Bradshaw**, **Ed Brown**, **Harriet Bulkeley** University of Durham, UK, **Gordon Walker** University of Lancaster, UK

Energy and Society provides an extensive critical treatment of energy issues informed by recent research on energy in the social sciences. Written in an engaging and accessible style it draws new thinking on uneven development, consumption, vulnerability and transition together to illustrate the social significance of energy systems in the global North and South. Its critical perspective highlights connections between energy and significant socio-economic and political processes, and connects important issues that are often treated in isolation, such as resource availability, energy security, energy access and low-carbon transition.

2ND EDITION

Environment and Economy

Molly Scott Cato University of Roehampton London, UK

Series: *Routledge Introductions to Environment: Environment and Society Texts*

Written in an accessible style, this introductory text offers students an engaging account of the way that the various traditions of economic thought have approached the environment, bringing them together for the first time in one volume. It takes a pluralist approach to using economic tools to solve a range of environmental problems: economic growth, resource depletion, pollution, globalisation, climate change, markets vs. commons. The text is complimented by boxes, case studies and recommended reading for each theme addressed. It will be of value to students interested in environmental sciences, geography, green issues and economics.

4TH EDITION

Environment and Politics

Timothy Doyle University of Keele, UK, and University of Adelaide, Australia, **Doug McEachern** University of Western Australia, **Sherilyn MacGregor** University of Keele, UK

Series: *Routledge Introductions to Environment: Environment and Society Texts*

Environment and Politics is a concise introduction to this ever-expanding field, explaining the key concepts, conflicts, political systems and the practices of policy-making. This book provides a comprehensive introduction, examining a diverse range of environmental problems and policy solutions. The fourth edition has been extensively revised to include new theoretical perspectives and debates surrounding environmental politics. It features discussions of social environmental movements, the role of the media, environmental security, green welfare and more. The book also examines concepts and debates surrounding environmental citizenship, considering the role of the individual and the local.

Routledge

2ND EDITION

Environment, Media and Communication

Anders Hansen University of Leicester, UK

Series: *Routledge Introductions to Environment: Environment and Society Texts*

The second edition builds on the first edition's framework for analysing and understanding media and communication roles in the politics of the environment. It draws on the significant and continuing growth and advances in the field of environmental communication research to show the increasing diversification and complexity of environmental communication and to stress the persistent urgency of analysing and understanding how communication about the environment is being influenced and manipulated. This book will be of interest to students in media/communication studies, geography, environmental studies, political science and sociology as well as to environmental professionals and activists.

2ND EDITION

Environmental Governance

James Evans University of Manchester, UK, **Craig Thomas**

Series: Routledge Introductions to Environment: Environment and Society Texts

Environmental Governance is the only book to discuss the first principles of governance, while also providing a critical overview of the wide ranging theories and approaches that underpin policy and practice today. It places governance within its wider political context to explore how the environment is controlled, manipulated, regulated, and contested by a range of actors and institutions. This book shows how network and market governance have shaped current approaches to environmental issues, while also introducing approaches such as transition management and adaptive governance.

Environmental Justice

Concepts, Evidence and Politics

Gordon Walker University of Lancaster, UK

The book will provide readers with a wide ranging and critical view of the evolving field of environmental justice scholarship. It encourages careful thinking and analysis of what is at issue, and provides a framework for understanding the claim making of environmental justice in spatial, temporal and political context. It provides compelling examples of the processes involved in producing inequalities and a clear sense of the challenges involved in advancing the interests of disadvantaged, vulnerable and excluded social groups and communities. For those interested in policy measures it also provides a systematic account of the various ways in which the tools, measures and strategies of environmental governance might be made more responsive to justice concerns.

2ND EDITION

Environmental Policy

Jane Roberts Open University, UK

Series: Routledge Introductions to Environment: Environment and Society Texts

As evidence of resource shortages, climate change and biodiversity loss grows in significance year by year, the urgency of changes towards greater sustainability in individual lifestyles, corporate strategies, national policies and international relations becomes ever more apparent. Environmental Policy explains how such changes can be brought about by examining how behaviour change can be encouraged through the carrots and sticks of policy. This is a lively and accessible text with a multi-disciplinary perspective. Detailed and topical case studies, updated for this new edition and drawn from a range of international examples, are used throughout to illustrate issues such as climate change, international trade, tourism and human rights. It is well illustrated and includes chapter summaries and further reading.

2ND EDITION

Gender and Environment

Susan Buckingham

Series: Routledge Introductions to Environment: Environment and Society Texts

This completely revised second edition of Gender and Environment explains the inter-relationship between gender relations and environmental problems and practices, and how they affect and impact on each other. The book provides a contemporary text book with a strong research foundation, drawing on the author's extensive research, professional and practice activity on the gender/environment relationship over the past 20 years, in a wide range of geographical contexts.

The Routledge Handbook of Environmental Justice

Edited by Ryan Holifield, Jayajit Chakraborty, Gordon Walker

The Handbook of Environmental Justice presents an extensive and cutting-edge introduction to the diverse, rapidly growing body of research on pressing issues of environmental justice and injustice. With wide-ranging discussion of current debates, controversies, and questions in the history, theory, and methods of environmental justice research, contributed by over 90 leading social scientists, natural scientists, humanists, and scholars from professional disciplines from six continents, it is an essential resource both for newcomers to this research and for experienced scholars and practitioners.

Cities, Disaster Risk and Adaptation

Christine Wamsle Lund University, Sweden

Series: Routledge Critical Introductions to Urbanism and the City

This book addresses the urgent need for re-evaluating current city planning to provide better solutions. With disasters and changing climatic conditions being a product of past developments, responding and adapting effectively to risk is inherently complex. This book explores the complex interrelation between disasters, climate change, and cities, provides an understanding on how to integrate sustainable risk reduction and adaptation into city planning – both in theory and in practice, and analyzes the role that people's coping strategies, urban institutions, and governance can play in addressing increasing disaster risk.

Disaster Risk

Irasema Alcántara-Ayala

Ciudad Universitar, Mexico., **Christopher Gomez** University of Canterbury, NZ, **Ksenia Chmutina** Loughborough University, UK., **Dewald van Niekerk** North-West University, South Africa., **Emmanuel Raju** Copenhagen Center for Disaster Research, Denmark., **Victor Marchezini** CEMADEN, Brazil., **Jake Rom Cadag** University of the Philippines., **JC Gaillard** Auckland University, NZ.

The text offers a comprehensive and unique perspective on disaster risk associated with natural hazards. It covers a wide range of topics, reflecting the most recent debates but also older and pioneering discussions in the academic field of disaster studies as well as in the policy and practical areas of disaster risk reduction. This book will be of particular interest to undergraduate students studying geography and environmental studies/science. It will also be of relevant to students/professionals from a wide range of social and physical science disciplines, including public health and public policy, sociology, anthropology, political science and geology.

7TH EDITION

Environmental Hazards

Assessing Risk and Reducing Disaster

Keith Smith, Carina J. Fearnley, Deborah Dixon, Deanne K. Bird, Ilan Kelman University College London, UK, and University of Adger, Norway

The seventh edition of Environmental Hazards provides a much expanded and fully up-to-date overview of all the extreme environmental events that threaten people and what they value in the 21st century globally, illustrating how natural and human systems interact to place communities of all sizes, and at all stages of economic development, at risk. This carefully structured and balanced textbook captures the complexity and dynamism of environmental hazards and is essential reading for students across many disciplines including Geography, Environmental Science, Environmental Studies and Natural Resources.

Handbook of Hazards and Disaster Risk Reduction

Edited by Ben Wisner Oberlin College, USA, **J. C. Gaillard** University of Grenoble, France, **Ilan Kelman** University College London, UK

The Handbook provides a comprehensive statement and reference point for hazard and disaster research, policy making, and practice in an international and multi-disciplinary context. Specifically, it aims to provide critical reviews and appraisals of the current state of the art and future development of conceptual, theoretical and practical approaches as well as empirical knowledge and available tools. It aims to encourage dialogue across disciplinary barriers among notions of 'disaster risk reduction' and 'vulnerability' (central concepts within the hazards and disaster community), 'climate change adaptation' and 'sustainable livelihood security' (core notions underlying much work within the climate and environmental studies community), and 'poverty reduction' (which remains a pivotal rallying point within development studies).

An Introduction to Environment, Society and Sustainability

Helen D. Hazen University of Denver, USA, **Paul Sutton**

This timely and innovative book delves into the complex interplay of human activities and natural limits in generating today's sustainability challenges. By contrasting the pressures of growing populations with ecological footprints associated with consumption, the volume navigates the contested terrain where human societies generate environmental impacts. This volume will be of pivotal interest to students, scholars and academics in the fields of environmental studies, environment and society, human geography and environmental geography, as well as those with an interest in these areas more generally.

2ND EDITION

Sustainable Development

Susan Baker Cardiff University, UK

Series: Routledge Introductions to Environment: Environment and Society Texts

This accessible text explores how the international community is responding to the challenge of sustainable development. It investigates the prospect for and barriers to its promotion in the high consumption societies of the industrialised world of the USA, Europe, the Third World and economies of transition in East and Central Europe. The book explores the global impact of China and how Chinese investments are shaping prospects for sustainable development in Africa. Local action is also discussed, from the transition towns movement in the UK to the Green Belt movement in Kenya.

4TH EDITION

The Sustainable Urban Development Reader

Edited by **Stephen M. Wheeler** University of California, USA

Series: Routledge Urban Reader Series

This thoroughly revised and updated Fourth Edition of The Sustainable Urban Development Reader combines classic and contemporary readings to provide a broad introduction to the topic that is accessible to general and undergraduate audiences. The book remains unique in presenting a broad array of sustainable city readings, each with a concise introduction placing it within the context of this evolving discourse. Presenting an authoritative overview of the field using original sources in a highly readable format, it is a valuable resource for general readers as well as students and researchers in urban studies, environmental studies, the social sciences, and related fields.

Transitions to Sustainable Development

New Directions in the Study of Long Term Transformative Change

John Grin University of Amsterdam, the Netherlands, **Jan Rotmans** Erasmus University Rotterdam, the Netherlands, **Johan Schot** Technische Universiteit Eindhoven, the Netherlands

Series: Routledge Studies in Sustainability Transitions

There has been a growing concern about the social and environmental risks which have come along with the progress achieved through a variety of mutually intertwined modernization processes. This book addresses how to understand the dynamics and governance of long term transformative change towards sustainable development.

Understanding Poverty and the Environment

Analytical frameworks and approaches

Fiona Nunan University of Birmingham, UK

Does poverty lead to environmental degradation? Do degraded environments and natural resources lead to poverty? Or are there other forces at play? Is the relationship between poverty and the environment really as straightforward as the vicious circle portrayal of 'poverty leading to environmental destruction leading to more poverty' would suggest? Does it matter if the relationship is portrayed in this way? Recommended further reading draws on published material from the last thirty years as well as key contemporary publications, steering readers towards essential key texts and authors for each topic. Themes examined include power, access, institutions and scale.

4TH EDITION

Introducing Human Geographies

Edited by **Kelly Dombroski**, **Mark Goodwin**, **Junxi Qian**
The University of Hong Kong, **Andrew Williams**, **Paul Cloke** University of Exeter, UK

Introducing Human Geographies is a 'travel guide' into the academic subject of human geography and the things that it studies. The coverage of the new edition has been thoroughly refreshed to reflect and engage with the contemporary nature and direction of human geography. The book is designed especially for students new to university degree courses in human geography across the world, and is an essential reference for undergraduate students on courses related to society, place, culture and space.

Routledge

3RD EDITION

Understanding Cultural Geography

Places and Traces

Jon Anderson University of Cardiff, UK

The book outlines how the theoretical ideas, empirical foci, and methodological techniques of cultural geography make sense of the battlegrounds on which contemporary politics and society determines our opportunities, rights, and futures. By focusing on the notion of 'place', it showcases how this discipline can be used to understand how cultures define and form our spatial lives. It is the ideal text for students being introduced to the discipline through either undergraduate or postgraduate degree courses. The third edition is an important update to a highly successful text that incorporates a vast foundation of knowledge; it is an invaluable book for lecturers and students.

Aid and Development

John Overton Victoria, University of Wellington, NZ,
Warwick Murray Victoria University of Wellington, New Zealand

Series: Routledge Perspectives on Development

This book provides an overview of what aid is, how it has changed over time, and how it is practiced, as well as debates about whether aid works, for whom, and what its future might be. It is an important resource for students, development workers and policy makers seeking an understanding of how aid works. The text shows how 'aid' is a contested and fluid concept that involves a wide and changing variety of policies, actors and impacts. Each chapter includes case studies, chapter summaries, discussions, weblinks and further reading, to help strengthen the reader's understanding.

Education and Development

Simon McGrath University of Nottingham, UK

Series: Routledge Perspectives on Development

This title explores the place of education in development debates and provides a systematic and a theoretical overview of the main approaches to the subject. It emphasises the fact that education is profoundly shaped by national and local cultures even if many issues are shared across different locations. The chapters discuss human capital, human rights and human development, education, gender and development, and draw on examples from a wide range of countries such as India, Hong Kong, Kenya and South Africa. It is aimed at the undergraduate level, and also development practitioners, policy makers, entrepreneurs and corporate employees engaged in aspects of education and development work.

Human Rights and Development

Peris Jones University of Oslo, Norway

Series: Routledge Perspectives on Development

The emergence of human rights within development and the evolving relationship was increasingly brought to bear upon key debates and policies over the last couple of decades. This book provides a critically informed, comprehensive and multi-disciplinary entry-level account of this engagement between human rights and development. This textbook will be an essential resource for social science students, particularly in the fields of development studies, human rights and geography, as well as those interested in the intersection between law, human rights and social change. It should also appeal to practitioners in development and human rights.

Information and Communication Technology for Sustainable Development

Cesar Marolla

Information and communication technology (ICT) is fundamental for monitoring climate change and also for transitioning toward sustainable economies. This book highlights the role ICTs can have in mitigating numerous global risks. It offers the first integrated approach to better managing infrastructures with more consistent on-time, on-target delivery of services. Through practical examples, the book presents better technology practices to innovate processes and operations, and implement faster integration of new technologies into business systems. Focused on sustainability, it addresses a strategic approach to cope with global environmental risks and also promote economic growth.

Postcolonialism

Tariq Jazeel University College London, UK

Series: Key Ideas in Geography

Postcolonialism is a book that examines the influence of postcolonial theory in critical geographical thought and scholarship. Aimed at advanced level students and researchers, the book is a lively, stimulating and relevant introduction to 'postcolonial geography' that elaborates on the critical interventions in social, cultural and political life this important subfield is poised to make. Structured around three intersecting blocks – 'Space', 'Identity', 'Knowledge' – the book will familiarize students and researchers with key critical intellectual trajectories and developments in postcolonial theory since its late 1970s emergence.

2ND EDITION

Postcolonialism, Decoloniality and Development

Cheryl McEwan

Series: Routledge Perspectives on Development

Postcolonialism, Decoloniality and Development, 2e explains, reviews and critically evaluates recent debates about postcolonial and decolonial approaches and their implications for development studies. It unpacks the difficult, complex and important aspects of the relationships between postcolonial theory, decoloniality and development studies. It includes a new chapter on postcolonial theory, development and the Anthropocene that considers the challenges posed by the current global environmental crisis to both postcolonial theory and ideas of development.

South-South Development

Peter Kragelund Roskilde University, Denmark

Series: Routledge Perspectives on Development

The book examines the historical background for the current situation: why it suddenly took off again approximately a decade ago; the various vectors of engagement and their interrelatedness; the actors involved; the affect of revitalisation of South-South development to cooperation 'as it was'; and how it affects the rest of the Global South. It offers a unique combination of in-depth insights and secondary data on South-South development, presenting a 'state-of-the-art' account aimed at students as well as practitioners in disciplines such as International Development Studies, International Relations, Geography, Anthropology, Global Studies and International Political Economy.

4TH EDITION

The Companion to Development Studies

Edited by **Emil Dauncey, Vandana Desai, Robert B. Potter**

The Companion to Development Studies is essential reading in the field of development studies. This indispensable resource offers succinct, up-to-date, and insightful chapters that reflect the diverse voices and perspectives informing the field and the dynamic interplay of theory, policy, and practice that characterizes it. This fourth edition brings together contributions from an impressive range of renowned international experts, and emerging voices at the forefront of development studies to deliver engaging, interdisciplinary, and provocative insights into this challenging field.

The Development Reader

Edited by **Sharad Chari**, **Stuart Corbridge** London School of Economics, UK

The Development Reader brings together a set of key readings that explore the changing ways that ideas of development are understood, contested and put into practice. Adam Smith and Karl Marx meet, among others, Robert Wade, Amartya Sen and Jeffrey Sachs. Section and individual extract introductions guide students through the material and bind the readings into a coherent whole. Selected Contents: Part I The Object of Development, Part II Markets, Empire, Nature, Difference, Part III Reform, Revolution, Resistance, Part IV Promethean Visions, Part V Challenges to the Mainstream, Part VI The Hubris of Development, Part VII Institutions, Governance and Participation, Part VIII Globalization, Security and Well-Being, Part IX Development in the 21st Century

3RD EDITION

Theories and Practices of Development

Katie Willis Royal Holloway, University of London, UK

Series: *Routledge Perspectives on Development*

The new updated third edition provides a clear and user-friendly introduction to the complex debates around how development has been understood and achieved. It has been fully updated and expanded to reflect global political and economic shifts, as well as new approaches to development. Sections on diversity and development have been expanded and the book considers the future of development in the era of the Sustainable Development Goals (SDGs). This key text provides a clear and thorough explanation of key development theories and practices. The third edition will remain an invaluable resource for undergraduate students in Geography, Politics and Development Studies.

3RD EDITION

An Introduction to Economic Geography

Globalisation, Uneven Development and Place

Danny MacKinnon University of Newcastle, UK, **Andrew Cumbers** University of Glasgow, UK

The text comprehensively guides students through the core issues and debates of this vibrant and exciting area, whilst simultaneously exploring the range of approaches and paradigms currently invigorating the wider discipline. It balances coverage of "traditional" areas such as regional development and labour markets with insight into new and evolving topics like neoliberalism, consumption, finance, energy transition and alternative economic practices. The new edition features three new chapters on Changing Global Geographies of Capital, Consumption and Retailing and Economic Geography and Energy Transition. Existing chapters and material have also been revised and updated.

Cultural Production in and Beyond the Recording Studio

Allan Watson Loughborough University, UK

Series: *Routledge Studies in Human Geography*

Recording studios are the most insulated, intimate and privileged sites of music production and creativity. Yet in a world of intensified globalisation, they are also sites which are highly connected into wider networks of music production that are increasingly spanning the globe. This book is the first comprehensive account of the new spatialities of cultural production in the recording studio sector of the musical economy, spatialities that illuminate the complexities of global cultural production. It will appeal to academic students and researchers working in human geography, cultural studies, media and communication studies, sociology, as well as those studying music production courses.

6TH EDITION

The Geography of the World Economy

Paul Knox Virginia Polytechnic and State University, USA, **John Agnew** University of California, Los Angeles, USA, **Linda Mccarthy** University of Wisconsin-Milwaukee, USA

Provides in-depth introduction to the globalisation of the world economy, and discusses local, regional, national and global economic development over the course of history. This historical approach provides the basis for understanding the economic interactions of both industrialised and developing countries. This edition has been fully revised and updated to provide a full analysis of the major changes in the world economy in recent years, now with a companion website to accompany the text.

The Production and Consumption of Music in the Digital Age

Edited by **Brian J. Hraes** University of Southampton, UK, **Michael Seman** University of North Texas, USA, **Tarek E. Virani** Queen Mary, University of London, UK

Series: *Routledge Studies in Human Geography*

This international collection of case studies examines the spatial dynamics of today's music industry. Students of geography, business, economics, and cultural studies will find this volume helpful in answering questions about how and where music is produced, financed, marketed, curated and distributed in the digital age.

2ND EDITION

Understanding Local Economic Development

Second Edition

Emil Malizia, **Edward J. Feser**, **Henry Renski**, **Joshua Drucker**

This book offers insights into the process and the practice of local economic development. Bridging the gap between theory and practice it demonstrates the relevance of theory to inform local strategic planning in the context of widespread disparities in regional economic performance. Offering valuable perspectives on both the process and the practice of local and regional economic development, this book will be useful for both current and future economic developers to think more profoundly and confidently about their local economy.

2ND EDITION

An Introduction to the Geography of Health

Helen D. Hazen University of Denver, USA, **Helen Hazen**, **Peter Anthamatten** University of Colorado, Denver, USA, **Peter Anthamatten**

In this second edition, the authors explore the ways in which geographic ideas and approaches can inform our understanding of health. The focus on a broad range of physical and social factors that drive health in places and spaces offers students and scholars an important holistic perspective on the study of health in the modern era. The book is designed to be used as the core text for a health geography course for undergraduate and lower-level graduate students, and is relevant to students of biology, medicine, entomology, social science, urban planning, and public health.

2ND EDITION

An Introduction to Political Geography

Space, Place and Politics

Martin Jones University of Sheffield, UK, **Rhys Jones** University of Aberystwyth, UK, **Michael Woods** University of Aberystwyth, UK, **Mark Whitehead** University of Aberystwyth, UK, **Deborah Dixon** University of Glasgow, UK, **Matthew Hannah** University of Bayreuth, Germany.

This book provides broad-based introduction exploring the full breadth of contemporary political geography, covering not only traditional concerns but also increasing important areas at the cutting-edge of political geography research. This updated edition includes new chapters on political geographies of globalization, geographies of empire, political geography and the environment and geopolitics and critical geopolitics. New case studies have been added, drawing on an increasing number of international and global examples, as well as additional boxes for key concepts and an expanded glossary.

Geopolitics

An Introductory Reader

Edited by **Jason Dittmer** University College London, UK, **Jo Sharp** University of Glasgow, UK

Drawing both on academic and political material, this book introduces readers to the concept of geopolitics, from the first usage of the term to its more recent reconceptualisations. The concept of geopolitics is introduced through four thematic sections - imperial geopolitics, cold war geopolitics, post-cold war geopolitics and reconceptualising geopolitics - which establish the foundations of geopolitics while also introducing readers to the continuing significance of the concept in the 21st century. Each section includes key papers from a range of diverse and leading authors.

Global Geopolitics

A Critical Introduction

Klaus J. Dodds

Employing thematic investigation and illustrated through case studies, Dodds explores how global politics is imagined and practised by countries such as the US and other organisations including Greenpeace, the IMF and CNN International. In addition, the author discusses how issues such as environmental degradation, terror networks, anti-globalisation protests and North-South relations challenge, consolidate and subvert the existing international political system.

4TH EDITION

Introduction to Geopolitics

Colin Flint Utah State University, USA

The new edition presents the themes of geopolitical structures and agents in an engaging and accessible manner, with no previous knowledge of theory or current affairs required. It includes the geopolitical implications of COVID-19, China's pronounced role in the world, the relative decline of the US, and the Black Lives Matter movement. The book will provide its readers with a set of critical analytical tools for understanding the actions of states as well as non-state actors acting in competition over resources and power. Both students and general readers will find this book an essential stepping-stone to a deeper and critical understanding of contemporary conflicts.

2ND EDITION

Global Migration

Patterns, Processes and Politics

Elizabeth Mavroudi, **Caroline Nagel** University of South Carolina, US

This new, fully updated edition of *Global Migration* provides students with a thorough and grounded understanding of multiple dimensions of migration, including labour markets, citizenship, border control, integration, and identity. Written by two geographers, the book incorporates insights from across the social sciences and is accessible to students in many disciplines. *Global Migration* serves as the go-to book for teaching advanced undergraduate and Master's-level students about the complexities of migration across nation-state borders.

Population Geography

Social Justice for a Sustainable World

Helen D. Hazen University of Denver, USA, **Heike C. Alberts** University of Wisconsin Oshkosh, USA, **Kazimierz J. Zaniewski** University of Wisconsin Oshkosh, USA.

This book surveys the ways in which geographic approaches may be applied to population issues, exploring how human populations are embedded in natural and social environments. It encourages students to evaluate population issues critically, given that population topics are at the heart of many of today's most contentious subjects. Through introducing students to different lenses of analysis (ecological, economic and social equity), the authors ask students to consider how different perspectives can lead to different conclusions on the same issue. This textbook will be a valuable resource for students of human geography, population geography, demography and diaspora studies.

2ND EDITION

Migration

Michael Samers University of Kentucky, USA, **Michael Collyer** University of Sussex, UK

Series: Key Ideas in Geography

Now in its second edition, *Migration* provides a critical, multi-disciplinary, advanced, and theoretically-informed introduction to migration and immigration. The multi-disciplinary text draws on insights from human geography, political science, social anthropology, sociology, and to a lesser extent economics. Revised and updated with new material, new maps and illustrations and an accompanying website, it continues to be aimed at advanced undergraduates and Masters-level graduate students undertaking courses on migration and immigration.

2ND EDITION

Population and Development

W.T.S. Gould University of Liverpool, UK

Series: Routledge Perspectives on Development

The new edition of *Population and Development* offers an up-to-date perspective on one of the critical issues at the heart of the problems of development for all countries, and especially those which seek to implement major economic and social change: the reflexive relationships between a country's population and its development. How does population size, distribution, age structure and skill base affect development patterns and prospects? How has global development been affected by regional population? Written by a leading international scholar in population, the book successfully integrates cutting-edge academic research with the focus and efforts of international development agencies.

Rural Geographies

People, Place and the Countryside

**Richard Yarwood** University of Plymouth, UK

This book provides a critical, contemporary and accessible introduction to understanding rural change by using geographical ideas to explain and analyse current issues affecting the countryside. Driven by thinking in human geography, the book reflects how major paradigmatic changes in geography have impacted upon, and been informed by, rural geography. The aim is not to champion a particular approach or the latest fashionable idea but, rather, introduce key ideas and concepts that will teach students the critical skills necessary to analyse rural issues themselves. The text will be a valuable resource for upper-level undergraduate students studying rural geography and rural studies.

Rural

**Michael Woods** University of Wales, UK

Series: Key Ideas in Geography

Rural provides an advanced introduction to the study of rural places and processes in Geography and related disciplines. It focuses on key ways in which geographers have engaged with and explored the rural. Engaging and accessible, the book introduces and illustrates these ideas and approaches through the use of detailed case studies drawn from both the developed and developing world. Student engagement with the ideas and examples contained in the book is encouraged by the use of activities and exercises. Essay and exam questions and end of chapter further reading are also provided. Selected Contents: 1. Approaching the Rural; 2. Exploiting the Rural; 3. Consuming the Rural; 4. Developing the Rural; 5. Living in the Rural; 6. Performing the Rural; 7. Regulating the Rural; 8. Re-making the Rural

Social Geographies

Space and Society

Gill Valentine

Most social geography undergraduate textbooks are structured around different social categories, splintering the discussion of gender, class, race and increasingly now sexuality and disability, into separate chapters. This has the effect, firstly, of making social relations rather than space (the *raison d'être* of human geography) the focus of undergraduate books; secondly of ignoring the way that social relations are negotiated and contested in different space. Rather than reproducing this conventional social geography format the aim of this proposed text is to make space the focus of analysis. In doing so the intention is to make complex theoretical debates about space more accessible to students and encourage them to look at their own environments in new ways.

4TH EDITION

Introducing Human Geographies

Edited by **Kelly Dombroski, Mark Goodwin, Junxi Qian**
The University of Hong Kong, **Andrew Williams, Paul Cloke**
University of Exeter, UK

Introducing Human Geographies is a 'travel guide' into the academic subject of human geography and the things that it studies. The coverage of the new edition has been thoroughly refreshed to reflect and engage with the contemporary nature and direction of human geography. The book is designed especially for students new to university degree courses in human geography across the world, and is an essential reference for undergraduate students on courses related to society, place, culture and space.

People and Place

The Extraordinary Geographies of Everyday Life

Lewis Holloway, Phil Hubbard

An innovative introduction to Human Geography, exploring different ways of studying the relationships between people and place, and putting people at the centre of human geography. The book covers behavioural, humanistic and cultural traditions, showing how these can lead to a nuanced understanding of how we relate to our surroundings on a day-to-day basis. The authors also explore how human geography is currently influenced by 'postmodern' ideas stressing difference and diversity. While taking the importance of these different approaches seriously as ways of thinking about the role of place in peoples' everyday lives, the book also tries to encapsulate what has been so vibrant and exciting about human geography over the last couple of decades. By using examples to which students can relate - such as how they imagine and represent their home, the way they avoid certain spaces, how they move through retail spaces, where they choose to go to university, how they use the Internet, h

3RD EDITION

Environment and Tourism

Andrew Holden University of Bedfordshire, UK

Series: *Routledge Introductions to Environment: Environment and Society Texts*

This third edition of Environment and Tourism incorporates additional material on environmental philosophies and ontologies of nature and how these influence our understanding of tourism's relationship with the natural environment. It communicates a range of key conceptual debates on the ethics and economics of the consuming nature for tourism and relates these to real world examples whilst evaluating environmental planning, and management responses. It is an invaluable tool for anyone studying Human Geography, Tourism and Environmental Studies, as well as for policy makers and consultants working in the field of tourism development.

2ND EDITION

Tourism and Development in the Developing World

David J. Telfer Brock University, Ontario, Canada,
Richard Sharpley University of Central Lancashire, UK

Series: *Routledge Perspectives on Development*

Tourism is widely considered to be an important factor in socio-economic development, particularly in less developed countries - but despite almost universal recognition of tourism's development potential, the extent to which economic and social progress is linked to the growth of a country's tourism sector remains a topic of intense debate. This book offers a thorough overview of the tourism-development relationship. Focusing specifically on the less developed world and drawing on contemporary case studies, the updated second edition questions widely-held assumptions on the role of tourism in development and seeks to highlight the challenges faced in tourism-based development.

4TH EDITION

Tourism and Sustainability

Development, globalisation and new tourism in the Third World

Martin Mowforth University of Plymouth, UK, **Ian Munt**

'If unequal opportunities are large within many countries they are truly staggering on a global scale', concludes the World Bank's 2006 World Development Report. It is a global unevenness within which the barriers to immigration of Third World migrants to wealthy First World nations go ever higher, whilst the barriers to travel in the reverse direction are all but extinct. How can tourism help narrow this glaring inequality between rich and poor? Tourism and Sustainability critically explores and challenges what have emerged as the most significant universal geopolitical norms. The fourth edition has been extensively updated and includes a new chapter on climate change and sustainable tourism.

3RD EDITION

Tourism Geography

Critical Understandings of Place, Space and Experience

Stephen Williams

Tourism Geography develops a critical understanding of how different geographies of tourism are created and maintained. Drawing on both historical and contemporary perspectives, the discussion connects tourism to key geographical concepts relating to globalization, mobility, new geographies of production and consumption, and post-industrial change. The new edition has been fully updated to have an international focus, with global case studies and broader based content.

6TH EDITION

The Geography of Transport Systems

**Jean-Paul Rodrigue**

This expanded and revised sixth edition provides a comprehensive and accessible introduction to the field with a broad overview of its concepts, methods, and areas of application. It explores the spatial aspects of transportation and focuses on how the mobility of passengers and freight is linked with geography. An essential resource for undergraduates studying transportation, as well as those interested in economic and urban geography, transport planning and engineering. A companion website, which contains additional material such as photographs, maps, figures, and PowerPoint presentations, has been developed for the book and can be found here: <https://transportgeography.org/>

Artificial Intelligence and the City

Urbanistic Perspectives on AI

Edited by **Federico Cugurullo** University of Manchester, UK, **Federico Caprotti** King's College London, UK, **Matthew Cook**, **Andrew Karvonen**, **Pauline McGuirk**, **Simon Marvin**

This book explores in theory and practice how artificial intelligence (AI) intersects with and alters the city. Drawing upon a range of urban disciplines and case studies, it reveals the multitude of repercussions that AI is having on urban society, urban infrastructure, urban governance, urban planning and urban sustainability. This book offers a state-of-the-art analysis and review of AI urbanism, from its roots to its global emergence. It cuts across several disciplines and will be a useful resource for undergraduates and postgraduates in the fields of urban studies, urban planning, geography, architecture, urban design, science and technology studies, sociology and politics.

2ND EDITION

Cities and Development

Sean Fox University of Bristol, UK, **Tom Goodfellow** University of Sheffield, UK

Series: *Routledge Perspectives on Development*

In the five years since the first edition of Cities and Development was published, awareness of the challenges associated with urban growth in the developing world has grown significantly. More than a billion of the world's people live in slums, a shocking statistic that is set to more than double within the next 20 years unless serious interventions are made. This has consequently become a key focus for international aid appeals and research. This revised edition provides an updated critical review of the dynamic relationship between urbanism and development. Building on the success of the first edition, the authors have brought the chapters and the selection of literature up to date.

Frankenstein Urbanism

Eco, Smart and Autonomous Cities, Artificial Intelligence and the End of the City

Federico Cugurullo

This book tells the story of visionary urban experiments, and delves first into the eco-city, second the smart city and third the autonomous city, where existing smart technologies are evolving into artificial intelligences which are taking the management of the city out of the hands of humans. It is both an examination of the evolution of urban experimentation through the lens of Mary Shelley's *Frankenstein*, and a warning. Academics, students and practitioners will find in this book the knowledge that is necessary to comprehend and engage with the many urban experiments that are now alive, ready to leave the laboratory and enter our cities.

The City: The Basics

Kevin Archer Central Washington University; University of South Florida, USA

Series: *The Basics*

A brief yet compelling overview of the study of cities and city life. This book draws on a range of perspectives - economic, political, cultural, and environmental - to provide a broad comparison of the evolution of cities in the rich Global North and the poorer Global South. Topics covered in the book include: a brief history of cities, the environmental impact of urban life, sustainable cities, and urban planning, politics and poverty. Featuring suggestions for further reading, recommended websites and a number of maps and illustrations, this is the ideal starting point for those interested in any aspect of cities or urban studies.

2ND EDITION

The Globalizing Cities Reader

Edited by **Xuefei Ren** Michigan State University, US, **Roger Keil** York University, Canada

Series: *Routledge Urban Reader Series*

The revised volume reflects how the geographies of theory have recently shifted away from the northern and western vantage points from which much of the classic work in this field was developed. It contains 38 new selections, and reflects the fact that world and global city studies have evolved in exciting and wide-ranging ways. The book will be a key resource for students and scholars alike who seek an accessible compendium of the intellectual foundations of this research field as well as an overview of the major new research horizons that are currently being explored to decipher emergent patterns of early 21st century urbanization.

The Routledge Companion to Urban Regeneration

Edited by **Michael E. Leary**, **John McCarthy**

This Companion provides cutting edge critical review and synthesis of recent theoretical, conceptual, policy and practical developments within the field of urban regeneration. It explores the meaning of 'urban regeneration' in differing national contexts, asking questions and providing informed discussion and analyses that illuminates how an apparently disparate field of research, policy and practice can be rendered coherent, drawing out common themes and significant differences. This is a valuable resource for both undergraduate and postgraduate students studying Planning, Urban Studies and Urban Regeneration.

2ND EDITION

Urban Ecology

An Introduction

Philip James, Ian Douglas

This fully revised second edition reflects the great expansion in urban ecology research, action and teaching since 2015. Urban ecology provides an understanding of urban ecosystems and uses nature-based techniques to enhance habitats and alleviate poor environmental conditions. This text provides the student and the practitioner with a critical scientific overview of urban ecology that will be a key source of data and ideas for studies and for sound urban management.

3RD EDITION

Urban Regeneration in the UK

Andrew Tallon University of the West of England, UK

The textbook provides a comprehensive and critical synthesis of urban regeneration in the UK incorporating key philosophies, approaches, policies, issues, debates and overall critiques from the 1940s up until the late 2010s. The central objective is to place the historical and contemporary regeneration agenda into context. The major changes to the new edition are that the urban agenda and changes to regeneration policies under the Coalition government/Conservative government of the period 2010-2017 are assessed, as well as the influences of economic uncertainty, austerity and Brexit. Advances in the academic literature, policy, and city case studies are also incorporated.

6TH EDITION

Urban Social Geography

An Introduction

Paul Knox Virginia Polytechnic and State University, USA,
Steven Pinch University of Southampton, UK

The 6th edition of this highly respected text builds upon the successful structure, engaging writing style and clear presentation of previous editions. Examining urban social geography from a theoretical and historical perspective, it also explores how it has developed into the modern day. Taking account of recent critical work, whilst simultaneously presenting well established approaches to the subject, it ensures students are well-informed about all the issues. The result is a topical book that is clear and accessible for students.

Climate Change

**Mike Hulme**

Series: Key Ideas in Geography

Written by a leading geographer of climate, this book offers a unique guide to students and general readers alike for making sense of this profound, far-reaching and contested idea. It presents climate change as an idea with a past, a present and a future. The book is written as a student text, suitable for disciplinary and inter-disciplinary undergraduate and graduate courses that embrace climate change from within social science and humanities disciplines. Science students studying climate change on inter-disciplinary programmes will also benefit from reading it, as too will the general reader looking for a fresh and distinctive account of climate change.

Climate: Present, Past and Future

Volume 1: Fundamentals and Climate Now

**Hubert Lamb**

First published in 1972, this first volume of Professor Lamb's study of our changing climate deals with the fundamentals of climate and climatology, as well as providing global data on the contemporary climates of the twentieth century. 'Professor Lamb has indeed served us well, in a complex field of study of the utmost significance to mankind' – The Times Higher Education Supplement 'Destined to become one of the classics of climatology' – Geographical Magazine 'Professor Lamb is to be congratulated on producing such an informative book, one which is almost certainly destined to become a classic synthesis of our present understanding of physical and dynamical climatology.' – Times Literary Supplement

2ND EDITION

Global Climate Change

Turning Knowledge Into Action

**David Kitchen**

Earth's climate is changing. This book investigates the scientific, environmental, social, political and economic aspects of climate change. It enables students to reach an informed opinion and encourages active engagement in finding solutions. This textbook will be an essential resource for students taking courses in environmental geography, climate change, natural hazards, climatology and meteorology.

9TH EDITION

Cargo Work

For Maritime Operations

David House previously a lecturer at Fleetwood Nautical College, UK

An essential reference written for the marine industry and seafarers around the world, Cargo Work has been fully revised and expanded to cover the key classes of cargo, regarding the handling, stowage and carriage of all major commodities by marine transports. The book provides a general guide to the movement of a wide range of cargoes safely, under the latest international regulations affecting all cargo work, equipment and operational systems. The work includes marine movements in both the passenger and offshore environments as well as the unit load systems of containerisation, Roll on Roll off practice, Hazardous goods and Project cargoes.

5TH EDITION

Seamanship Techniques

Shipboard and Marine Operations

David House previously a lecturer at Fleetwood Nautical College, UK

Ideal for Merchant Navy Officers from Cadet rank to Master Mariner, the fifth edition of this highly respected book is in full colour, and has been updated to include more information on topics as diverse as electronic navigation and AIS technology whilst still including essential information on subjects such as safety at sea, rescue operations, watch keeping duties and pollution control. Used by training establishments around the world, this best seller is the only reference to both shipboard practice and ship operations that seafarers will need.

2ND EDITION

The Seamanship Examiner

For STCW Certification Examinations

David House previously a lecturer at Fleetwood Nautical College, UK, **Farhan Saeed** Senior Lecturer in Maritime Operations in Liverpool John Moores University, UK

Since publication of the first edition, there have been many new innovations throughout the industry. This guide is fully updated to reflect these changes and includes practice questions on International Safety Management (ISM), Electronic Chart Display and Information Systems (ECDIS) and the International Code for the Security of Ships and Port Facilities (ISPS), as well as hundreds of additional tutorial questions throughout the book and the accompanying interactive CD.

5TH EDITION

Fundamentals of Geomorphology

Richard Huggett University of Manchester, UK, **Emma Shuttleworth**

Series: Routledge Fundamentals of Physical Geography

This revised and updated edition continues to provide a comprehensive introduction to the subject, exploring the world's landforms from a broad systems perspective. It covers the basics of Earth surface forms and processes, while reflecting on the latest developments in the field. Fundamentals of Geomorphology begins with a consideration of the nature of geomorphology, including its relation to society, process and form, history, and geomorphic systems, and moves on to discuss. Written in an accessible and lively manner, it provides a stimulating and innovative perspective on the key topics and debates within the field of geomorphology.

Global Geomorphology

Michael A. Summerfield

The plate tectonics revolution in the earth sciences has provided a valuable new framework for understanding long-term landform development. This innovative text provides a comprehensive introduction to the subject of global geomorphology, with the emphasis placed on large-scale processes and phenomena. Integrating global tectonics into the study of landforms and incorporating planetary geomorphology as a major component the author discusses the impact of climatic change and the role of catastrophic events on landform genesis and includes a comprehensive study of surface geomorphic processes.

3RD EDITION

Fundamentals of Hydrology

Tim Davie

Series: Routledge Fundamentals of Physical Geography

The third edition of *Fundamentals of Hydrology* provides an absorbing and comprehensive introduction to the understanding of how fresh water moves on and around the planet and how humans affect and manage the freshwater resources available to them. It gives undergraduates a thorough understanding of hydrological processes, knowledge of the techniques used to assess water resources and an up-to-date overview of water resource management. Throughout the text examples and case studies from all around the world are used to clearly explain ideas and techniques. Short chapter summaries, essay questions, guides to further reading, website links and a glossary are also included.

2ND EDITION

Water Resources

An Integrated Approach

Edited by **Joseph Holden** University of Leeds, UK

The second edition provides students with a comprehensive overview of natural processes associated with water and the modifications of these processes by humans through climate change and land management, water-related health issues, engineering approaches to water and socio-economic processes of huge importance to water resources. The book contains chapters written by 24 specialist contributors, providing expert depth of coverage to topics. It will be an indispensable guide to undergraduates studying Water Resources and Management, Geography of Water, and Water in the Environment.

Landscape

John Wylie University of Exeter, UK

Series: Key Ideas in Geography

A stimulating introduction to the contemporary understanding of one of the most important concepts within human geography and related disciplines, this book clearly and concisely explores 'landscape' theories and writings. Introducing notable figures and themes in the landscape tradition, the text emphasizes key landscape writings of the last twenty to thirty years. It develops an understanding of landscape as an ensemble of practices that produce, enact and reflect relations between the natural and cultural, and the spatial and social. Selected Contents: 1. Introduction 2. Landscaping Traditions 3. Ways of Seeing 4. Cultures of Landscape 5. Landscape Phenomenology 6. Prospects for Landscape. Bibliography

2ND EDITION

The Routledge Companion to Landscape Studies

Edited by **Peter Howard , Ian Thompson , Emma Waterton , Mick Atha**

This new edition features 32 revised and/or updated chapters and 17 entirely new chapters, each summarizing an aspect of the multifaceted subject of landscape. It is divided into four sections: Experiencing Landscape; Landscape, Heritage and Culture; Landscape, Society and Justice; and Design and Planning for Landscape. The book provides a critical review of the various fields related to the study of landscapes, including the future development of conceptual and theoretical approaches, as well as current empirical knowledge and understanding. It encourages dialogue across disciplinary barriers and between academics and practitioners.

2ND EDITION

Late Quaternary Environmental Change

Physical and Human Perspectives

**Martin Bell, M.J.C. Walker**

Late Quaternary Environmental Change addresses the interaction between human agency and other environmental factors in the landscapes, particularly of the temperate zone. Taking an ecological approach, the authors cover the last 20,000 years during which the climate has shifted from arctic severity to the conditions of the present interglacial environment.

3RD EDITION

Reconstructing Quaternary Environments

J. John Lowe University of London Royal Holloway, UK,
Michael Walker University of Wales, Trinity St David, UK

The years since the 2nd edition of Reconstructing Quaternary Environments have seen a huge increase in the volume of literature on the Quaternary. New methods and technological advances have given rise to a number of multi-disciplinary research groups looking to offer insights into short- and long- term climatic changes. Illustrated in colour throughout, this long-anticipated new edition has been updated to address new developments and to freshly examine evidence on the history and scale of environmental changes during the period. A new final chapter demonstrates how results using these different methods and approaches can be synergised to provide an overview of global environmental change.

2ND EDITION

Geographies of Developing Areas

The Global South in a Changing World

Glyn Williams University of Sheffield, UK, **Paula Meth** University of Sheffield, UK, **Katie Willis** Royal Holloway, University of London, UK

This is a textbook that introduces students to the geography of developing areas in a novel and challenging way. Rather than presenting the Global South to students as a set of problems (rapid urbanisation, population growth, poverty, etc) this book focuses on the diversity of life in the South, and looks at the role the South plays in shaping and responding to current global change. Thought-provoking and accessible, this new edition has been fully updated and highlight cross-cutting themes around security, risk and violence; environmental sustainability and climate change; and the impact of ICT on patterns of North-South and South-South exchange.

2ND EDITION

Africa

Diversity and Development

Tony Binns University of Otago, New Zealand, **Etienne Nel** University of Otago, New Zealand, **Alan Dixon** University of Worcester, UK, **Kenneth Lynch**

Africa: Diversity and Development introduces and demystifies Africa's diversity and dynamism, and considers how its peoples and environments have interacted through time and space. This textbook is a refreshing interdisciplinary text which enhances understanding of the background to Africa's current position and clarifies possible future scenarios. It will be a valuable resource for students taking modules on Africa, African Development and Geography of Africa, and will also prove useful to students in the wider fields of Geography, Development Studies, Global Studies, Environment and Society and African Politics.

Antarctic Environments and Resources

A Geographical Perspective

J.D. Hansom, **John Gordon**

Antarctica is no longer a 'pole apart'. From a scientific perspective, the Antarctic ice sheet, ocean and climate systems are intimately linked with the global climate and are now seen to be of international significance for understanding climate change. From an economic perspective, the Antarctic is perceived to have great potential as a source of marine resources although the extent of speculated mineral and hydrocarbon resources is unknown. From a conservation perspective, the continent of Antarctica represents the ideal image of unspoiled wilderness. Antarctic Environments and Resources is an accessible and timely new geography of the Antarctic which examines the differing and sometimes conflicting interests in the great southern continent, the Southern Ocean and the subantarctic islands against a background of the physical and natural systems of the region and their interactions. It charts the development of human involvement in the area, focusing on the exploitati

Geology of Connemara in Western Ireland

Unravelling the Region's Tectonic, Metamorphic, and Magmatic Histories

Martin Feely University of Galway, Ireland

The Connemara region in Western Ireland is world-renowned for its outstanding geology that blends with spectacular landscapes. This book and its many colorful illustrations, maps, diagrams, field, and landscape images, detail the origin and formation of Connemara's metamorphic and igneous rocks in deep time from 700 to 380 million years ago. It combines many field geology observations, and current research results, and describes the many geological processes involved in the formation of the bedrock foundations of Connemara. It serves as an amazing book for students and geological societies that visit the region annually.

4TH EDITION

Study Skills for Geography, Earth and Environmental Science Students

Pauline E. Kneale University of Plymouth, UK

This guide will help you to survive and thrive during your degree and on into the workplace. Everything you do at university can be useful in your career. It is packed with practical hints, study tips, short cuts, real-life examples and careers advice, the new expanded fourth edition of this book is an invaluable resource throughout your geography, earth science or environmental science studies. Written in accessible style, this guide also explains the role of the academic, how it differs from that of a school teacher, and prepares you for the world of work by showing how the skills you learn at university today can be used in your career choice of tomorrow.

Studying Geography at University

How to Succeed in the First Year of Your New Degree

Simon Tate University of Newcastle, UK, **Peter Hopkins**

Written by leading academics, this book is an invaluable "how to..." guide to studying for a Geography degree. Written in a practical and conversational style, it offers important insights into how to succeed in first-year, covering everything from how to succeed in assessments to how to decide where to live. Some of the information the book provides is academic and some of it is non-academic as negotiating both is important in order to be successful in the first year of a Geography degree. This guide is a must-read for anyone starting their studies in Human Geography, Physical Geography, Environmental Science, or any other related subject at university.

Collective Spatial Cognition

A Research Agenda

Edited by **Kevin Curtin**, **Daniel R. Montello** University of California, Santa Barbara, USA

This book integrates the science of spatial cognition and the science of team cognition to explore the social, psychological, and behavioral phenomenon of spatial cognition as it occurs in human collectives such as dyads and work teams. It represents the culmination of a process of outlining and defining a growing field of research termed Collective Spatial Cognition.

Interviewing: The Basics

Mark Holton University of Plymouth, UK.

Series: The Basics

This text outlines the relative merits of qualitative interviewing to new and emerging scholars in an accessible way. This is achieved not by providing an exhaustive 'how to...' guide but in introducing researchers to the interview technique and using examples of 'best practice' from across the social sciences. Each chapter includes a range of interview design activities for readers to try which might help them engage with the chapter topics, as well as a Summary box which comprises a short annotated reading list of key texts relating to each of the chapter topics; and a checklist of things to consider relating to the chapter topics.

Statistics for Geography and Environmental Science

Richard Harris University of Bristol, UK, **Claire Jarvis**
University of Leicester, UK

Statistics are important tools for validating theory, making predictions and engaging in policy research. They help to provide informed commentary about social and environmental issues, and to make the case for change. Knowledge of statistics is therefore a necessary skill for any student of geography or environmental science. This textbook is aimed at students on a degree course taking a module in statistics for the first time. It focuses on analysing, exploring and making sense of data in areas of core interest to physical and human geographers, and to environmental scientists. It covers the subject in a broadly conventional way from descriptive statistics, through inferential statistics to relational statistics but does so with an emphasis on applied data analysis throughout.

Conducting Research in Human Geography

theory, methodology and practice

Rob Kitchin , Nick Tate

Reading this book is your first step to becoming a competent human geography researcher. Whether you are a novice needing practical help for your first piece of research or a professional in search of an accessible guide to best practice, *Conducting Research in Human Geography* is a unique and indispensable book to have at hand. The book provides a broad overview of theoretical underpinnings in contemporary human geography and links these with the main research methodologies currently being used. It is designed to guide the user through the complete research process, whether it be a one day field study or a large project, from the nurturing of ideas and development of a proposal, to the design of an enquiry, the generation and analysis of data, to the drawing of conclusions and the presentation of findings.

3RD EDITION

How To Do Your Dissertation in Geography and Related Disciplines

Tony Parsons University of Sheffield, UK, **Peter G Knight**
Keele University, UK

Following the success of prior editions, this revised and updated volume continues to provide students with a detailed guide to the planning and procedures needed for preparing projects in geography, environmental science and geology. Written by well-respected authors in the field the book takes new sources and teaching styles into account. Guiding the reader through each stage in the process, it deals with many of the common concerns and issues in dissertation writing from deciding on a topic through to research design and data analysis. With its consideration of different data types and tips on writing from conception to final submission this is an invaluable guide for final-year students.

2ND EDITION

Children, Youth and Development

Nicola Ansell Brunel University London, UK

Series: Routledge Perspectives on Development

The new edition explores the varied ways in which global processes in the form of development policies, economic and cultural globalization, and international agreements combine with more locally specific practices to shape the lives of young people living in the poorer regions of the world. Children, Youth and Development takes account of significant changes in the contexts in which poor children grow up, notably the financial crisis and changing development policy environment, the impacts of environmental change and hazards, as well as recent theoretical developments. It is aimed at higher level undergraduates and postgraduates, researchers and practitioners.

Children, Youth and the City

Kathrin Horschelmann University of Durham, UK,
Lorraine van Blerk University of Dundee, UK

Series: Routledge Critical Introductions to Urbanism and the City

Painting a vivid picture of children and youths in the city, the authors analyze theoretical arguments and international case studies to explore how they make sense of city life, and how they appropriate it through their social actions. Selected Contents: 1. Introduction 2. Theorising and Researching Children and Youth in the City 3. The Causes of Effects of Social Inequalities on Children and Youth in the City 4. Growing up in the City - How Children and Youth Experience Urban Space 5. Globalisation and Urban Youth Culture 6. Participation and Active Citizenship in the City 7. Conclusion

Companion to Environmental Studies

Edited by **Noel Castree** University of Manchester, UK, **Mike Hulme** Kings College London, UK, **James D. Proctor**

The Companion offers a comprehensive and interdisciplinary overview of the key issues, debates, concepts, approaches and questions that together define environmental studies today. The intellectually wide-ranging volume covers approaches in environmental science all the way through to humanistic and post-natural perspectives on the biophysical world. Over a hundred and fifty short chapters written by leading international experts provide concise, authoritative and easy-to-use summaries of all the major and emerging dominating the field. The book offers an essential one-stop reference to university students, academics, policy makers.

4TH EDITION

Fundamentals of the Physical Environment

Fourth Edition

Edited by **Peter Smithson** University of Sheffield, UK, **Ken Addison** University of Oxford, UK and University of Wolverhampton, UK, **Ken Atkinson** University of Leeds, UK

A core introductory textbook for students of physical geography and environmental sciences, it explains the scientific principles underlying the Earth's climates, landforms, soils and ecosystems and reviews the principal interactive processes driving them. It also introduces the nature and mechanisms of current environmental change. Selected Contents: Part One: Fundamentals 1. The Physical Environment: Scientific Concepts and Methods 2. Energy and Earth, Part Two: Atmosphere 3. Heat and Energy in the Atmosphere, 4. Moisture in the Atmosphere, 5. Precipitation and evapotranspiration 6. The Atmosphere in Motion 7. Weather-Forming Systems 8. Micro and Local Climates 9. Climate Change, Part Three Geosphere 10. Earth's Geological Structure and Processes 11. The Global Ocean 12. Rock Formation and Deformation 13. Denudation, Weathering and Mass Wasting 14. Flowing Water at the Land Surface 15. Ice at the Land Surface 16. The Work o

4TH EDITION

Introducing Human Geographies

Edited by **Kelly Dombroski**, **Mark Goodwin**, **Junxi Qian** The University of Hong Kong, **Andrew Williams**, **Paul Cloke** University of Exeter, UK

Introducing Human Geographies is a 'travel guide' into the academic subject of human geography and the things that it studies. The coverage of the new edition has been thoroughly refreshed to reflect and engage with the contemporary nature and direction of human geography. The book is designed especially for students new to university degree courses in human geography across the world, and is an essential reference for undergraduate students on courses related to society, place, culture and space.

7TH EDITION

The Global Casino

An Introduction to Environmental Issues

Nick Middleton

This book is an introduction to environmental issues which deals both with the workings of the physical environment and the political, economic and social frameworks in which the issues occur. Using examples from all over the world, the book highlights the underlying causes behind environmental problems, the human actions which have made them issues, and the hopes for solutions. It is a book about the human impact on the environment and the ways in which the natural environment impacts human society. An essential resource for students of the environment, geography, development studies and earth sciences.

David Harvey

A Critical Introduction to His Thought

Noel Castree, Greig Charnock University of Manchester, UK, **Brett Christophers**

David Harvey is among the most influential Marxist thinkers of the last half century. This book offers a lucid and authoritative introduction to his work, with a structure designed to reflect the enduring topics and insights that serve to unify Harvey's writings over a long period of time. An important resource for scholars and graduate students in geography, politics, and many other disciplines across the social sciences and humanities.

Discovering Political Ecology

Gustav Cederlöf University of Gothenburg, Sweden, **Alex Loftus** King's College London, UK

Political ecology is one of the most vibrant fields of environmental research. This book introduces political ecology to a new generation of students in a daring new way: as an interdisciplinary approach to environmental research but also as a series of lived realities and a praxis for change. At the cutting-edge of the field, the book will be of interest to those in all disciplines brought together in political ecology, including but not limited to anthropology, development studies, ecology, geography, history and political science.

2ND EDITION

Geographical Thought

A Critical Introduction to Ideas in Geography

Anoop Nayak, Alex Jeffrey

This new second edition of Geographical Thought remains a clear and accessible introduction to the key ideas and figures in human geography. Containing new material it brings to the fore current ideas on the Anthropocene, decolonization, human and post-human environmental debates. This book is an invaluable guide for students new to the discipline, seeking an introduction to the theories and ongoing debates, as well as those looking to deepen their understanding of human geography.

Making Sense of Nature

Noel Castree University of Wollongong, Australia

Drawing on over 30 years on research into the 'social constitution of nature', this book shows that what we call 'nature' is made sense of for us in ways that make it central to social order, social change and social dissent. By utilising insights and extended examples from anthropology, cultural studies, human geography, philosophy, politics, sociology, science studies, this interdisciplinary text asks whether we can better make sense of nature for ourselves, and thus participate more meaningfully in momentous decisions about the future of life – human and non-human – on the planet.

More-than-Human

Jamie Lorimer University of Oxford, UK, **Timothy Hodgetts**

Series: Key Ideas in Geography

This text offers the first book-length introduction to more-than-human geography, exploring its key ideas, main debates, and future prospects. Introducing the key idea of more-than-human geography, this book will be an important resource for undergraduate and postgraduate students of human geography, environmental geography, cultural and social geography, and political geography.

Non-representational Theory

Paul Simpson University of Plymouth, UK

Series: Key Ideas in Geography

The title explores a range of ideas which have recently engaged geographers and have led to the development of an alternative approach to the conception, practice, and production of geographic knowledge. It offers the first sole-authored, accessible introduction to this work and its impact on geography drawing together the work of a range of established and emerging scholars working on the development of non-representational theories. This volume is essential reading for undergraduates and post-graduate students interested in the social, cultural, and political geographies of everyday living.

2ND EDITION

Science, Philosophy and Physical Geography

Robert Inkpen Portsmouth University, UK, **Graham Wilson** University of Portsmouth, UK

This accessible and engaging text explores the relationship between philosophy, science and physical geography. It addresses an imbalance that exists in opinion, teaching and to a lesser extent research, between a philosophically enriched human geography and a perceived philosophically empty physical geography. This edition has been fully updated with two new chapters on field studies and modelling, as well as greater discussion of ethical issues and forms of explanation. The book explores key themes such as reconstructing environmental change, species interactions and fluvial geomorphology, and is complimented throughout with case studies to illustrate concepts.

Wilderness

Phillip Vannini Royal Roads University, Canada, **April Vannini**

Series: Key Ideas in Geography

Wilderness provides a multidisciplinary introduction into the diverse ways in which we make sense of wilderness. Drawing upon key theorists, philosophers, and researchers, it argues for a relational and process based notion of the term and understands it as a keystone for the examination of issues from environmental aesthetics to more-than-human relations. The text presents important recent case studies and provides summaries of key points, further readings, web resources as well as discussion questions. It is designed for courses and modules on the subject at both postgraduate and undergraduate levels.

Physical Geography: The Key Concepts

Richard John Huggett University of Manchester, UK

Series: Routledge Key Guides

Physical Geography: The Key Concepts is a thought-provoking and up-to-date introduction to the central ideas and debates within the field. It provides extended definitions of terms that are fundamental to physical geography and its many branches, covering topics such as: biogeography, ecology, climatology, meteorology, geomorphology, hydrology, and pedology. Complete with informative tables, diagrams, and suggestions for further reading, this is a highly accessible guide for those studying physical geography and related courses.
