## ONE COLUMN PAGE LAYOUT

**TITLE OF THE CONFERENCE:**

*5th International Conference Structures & Architecture (ICSA 2022)*

**DATE:**

*6–8 July 2022*

**LOCATION OF THE CONFERENCE/SYMPOSIUM:**

*Aalborg, Denmark*

---

**PLEASE NOTE:**

**When an Author submits a paper or article to the Publisher, the Author is obliged to sign and return a Consent to Publish Form, which you will find enclosed in this .zip file. With submitting a paper for publication, the Author agrees to transfer the copyright of his paper to the Publisher, and the Publisher has the right to publish the paper.**

**Furthermore:**

*All papers should be delivered in \*.pdf format that was compiled from \*.doc (Word) files or from another software program, using the option 'embedded fonts' in pdf-file preparation. Pdf-files prepared from scanned documents can not be accepted. In addition to the \*.pdf file, the original source file (\*.doc) should be provided as well.*

- all papers should be delivered in electronic form (MsWord or LaTeX) as well as identical Acrobat PDF file.

For 'Research Papers':

- the deadline for submission of papers to the conference editors is **30 October 2021**
- the number of pages per **full paper** is **16 pages** for keynote speakers
- the number of pages per **full paper** is **8 pages** for regular contributions
- the maximum number of pages per **(extended) abstract** is **4 pages** for keynote speakers
- the maximum number of pages per **(extended) abstract** is **2 pages** for regular contributions
- Be sure that the 'Conversion settings' in the PDF maker is set on 'High Print Quality'

For 'Critical Practices':

- the deadline for submission of papers to the conference editors is **30 October 2021**
- the maximum number of pages per **paper** is **3 pages**

## PLEASE FIND BELOW SEVERAL FILES THAT CAN BE USED TO PREPARE YOUR PAPER:

- *Read Me.pdf*: instructions on how to get started and use the files in this .zip
- *Templates.zip*
  - 1 column A4.zip >>
    - § B1PROCA4EXAMPLEPAPER.doc: Sample of A4 page lay out in MsWord
  - 1 column LaTeX.zip >>
    - § 1-column-A4-Full Paper: LaTeX stylefiles to create the paper with LaTeX
    - § 1-column-Letter-Full Paper: LaTeX stylefiles to create the paper with LaTeX
- *Artwork.pdf*: Instructions on how to submit your artwork (figures)
- *Consent to Publish Form\_Copyright.pdf*: Consent to publish the paper and transfer its copyright
- *Harvard.ens*: Stylesheet for preparing the 'References' section
- *Permission Verification Form.doc*: Form indicating that all required permissions have been sought and obtained (if applicable – if in doubt please consult the files *Permissions+Flow+Chart.pdf* and *T&F Permission FAQ.pdf*)

Before starting, make sure that you have a PostScript printer installed. Microsoft Word users should select the correct files for their printer: A4 paper size (21 x 29.7 cm, European size), or Letter paper size (8 1/2" x 11", American size). Copy the files which you will be using to a new directory and keep the original file as a backup.

## MICROSOFT WORD USERS

Start MS Word. Close the empty file which appears on your screen (Close in File Menu). Now open the file B1ProcA4.doc (if you have a printer printing on A4 size paper - European standard) Print this document. It gives detailed instructions on how to proceed when you still have to type your paper and also when you want to use the text from an old file. After you have read the first two pages of these instructions you are ready to start.

Note that you should always use the tag "First paragraph" after a heading. For the rest of the text use "Normal, text". When importing figures always set the paragraph tag on "Figures". Figures cannot be imported on the paragraphs tag. Use only the headings 1, 2, and 3 prepared by the Publisher.

### Quick start for MS Word users

1. Place the template file B1ProcA4.dotx in your directory on your network or computer.
2. Double click on the B1ProcA4.dotx template file.
3. Save your paper in the folder on your computer. Do not forget to give your file a unique filename. We prefer a filename no longer than 8 characters.

You are now ready to type your paper (see 4-7 below), or/and to insert text from another file (see 8-10 below).

1. Type the correct title, author(s) and affiliation(s), and delete old text without deleting the return at the end of the line.
2. Type your abstract behind "ABSTRACT:".
3. Type the text of the first heading and delete old text without deleting the return at the end.
4. Now type the text of your paper using tag "First paragraph" for all paragraphs that follow a heading and tag "Normal, text" for all other normal paragraphs. Figures should be placed in paragraphs with a "Figure" tag and equations with a "Formula" tag.
5. To insert text from another file, open that file as well, select (Mouse) the text to be copied (Edit Menu), and paste (Edit Menu) it into the new file. In the Window Menu you can switch between opened files. The title, author(s), and affiliation(s) should not be copied completely. First type the first word of each line and then copy the rest of each line one by one. Copy only the text of your abstract and place it behind the word "ABSTRACT: ".
6. Check if setting of paper size and margins (Page Set Up in File Menu), and Columns (Format Menu) are still correct (see table 1 in instruction file).
7. Change the old tags for the new Balkema tags (see 7 above). Before doing this apply automatic formatting: From the Format Menu select AutoFormat and click AutoFormat now.

## FINAL NOTE TO ALL AUTHORS

Please see to it that your paper has the same typography as the specimen paper enclosed, whether you used the CRC Press / Balkema templates or not. **The publisher will reduce your paper to 75% and print it in black. For this reason, please check if your figures will be legible after reduction.**

It is also very important that you submit your artwork/figures both embedded into Microsoft-Word as in a separate single file, with a preferred format of .TIFF or .EPS << **see for reference *Artwork.pdf***
