# Welcome

## Welcome to the Taylor and Francis Public Health Textbook Catalogue.

### eBooks

We have over 50,000 eBooks available across the Humanities, Social Sciences, Behavioural Sciences, Built Environment, STM and Law, from leading Imprints, including Routledge, Focal Press and Psychology Press. These eBooks are available for both individual and institutional purchase.

#### INDIVIDUALS

Our eBooks are available from Amazon, Apple iBookstore, Google eBooks, Ebooks.com, Kobo, Barnes & Noble, Waterstones, Mobipocket, VitalSource, and CourseSmart.

#### LIBRARIES AND INSTITUTIONS

Subscribe to or purchase a wide range of eBook packages or pick and mix your own from our complete collection (a minimum number of titles applies). FREE TRIALS are available. For more information, please visit [www.tandfebooks.com](http://www.tandfebooks.com) or contact your local sales team.

### eUpdates

Register your email at [www.tandf.co.uk/eupdates](http://www.tandf.co.uk/eupdates) to receive information on books, journals and other news within your area of interest.

## Antivaccination and Vaccine Hesitancy

A Professional Guide to Foster Trust and Tackle Misinformation

**Thomas Aechtner**

This important book provides a comprehensive guide to understanding vaccine hesitancy, as well as the nuances of antivaccination claims. It is designed to give clinicians and other professionals targeted information to help them address vaccine hesitancy and antivaccination claims, as well as ways of responding to immunisation concerns. This is essential reading for anyone wishing to really understand the phenomenon of vaccine hesitancy, whether professional, student or general reader, and the methods that can be used to challenge misinformation.

## Outsmarting the Next Pandemic

What Covid-19 Can Teach Us

*Edited by Elizabeth Anne Kirley , Deborah Porter*

This book examines the role of law and policy in addressing the public health crisis of Covid-19 and offers reforms that could improve pandemic preparedness for future outbreaks. It will appeal to academics, professionals and policymakers interested in how law and health policy can converge on solutions for global infectious disease. It is suitable for use in upper level courses.

## Pandemics: The Basics

**Elisa Pieri** University of Manchester, UK

*Series: The Basics*

This book provides an engaging, jargon-free introduction to the threat of global pandemics, offering an overview of the many origins and triggers of pandemic events. Given the interdisciplinarity of the topic, this book will be of great interest to a wider non-academic audience, as well as students from a range of subjects including politics, sociology, geography, anthropology, and international development, along with entry-level medical students keen to widen their appreciation of the social dimensions of the medical work they set out to conduct.

3RD EDITION

## Routledge Handbook of Infectious Diseases

A Geographical Guide

*Edited by Eskild Petersen , Lin H. Chen* Harvard Medical School, USA, *Patricia Schlegelhauf* University of Zürich, Switzerland

The new edition of this unique resource, ground on an understanding that our global world is more connected than it has ever been, provides an essential survey of infectious diseases based on both clinical presentation and geographical area of exposure. Thoroughly updated through the latest clinical data, and featuring some of the leading scholars and clinicians in the field, this is a timely and important resource for practitioners and scholars across Clinical Medicine, Epidemiology and Public Health.

Routledge

2ND EDITION

## Viral Pandemics

From Smallpox to COVID-19 & Mpox

**Rae-Ellen Kavey , Allison Kavey**

The new edition of Viral Pandemics illuminates how the increasing emergence of novel viruses has combined with intensifying global interconnectedness to create an escalating spiral of viral disease. It includes an introduction to the key characteristics of viral pathogens that make them so dangerous followed by a comprehensive survey of epidemic viral disease from 1900 to the present. This book is ideal reading for students of public health and its history, the history of medicine and medical anthropology, as well as general readers keen to understand how viral pandemics have shaped, and continue to shape, millions of lives.

Routledge

## Digital Health

Critical and Cross-Disciplinary Perspectives

**Deborah Lupton** University of Canberra, Australia.  
SHARP Professor, Leader, the Vitalities Lab, Centre for Social Research in Health and Social Policy Research Centre.

*Series: Critical Approaches to Health*

The rise of digital health technologies is, for some, a panacea to many of the public health challenges we face today. This is the first book to articulate a critical response, answering a number of questions around the interests they represent, and their effects on patients, physicians and how we conceive of public health. Citing empirical research throughout, the book discusses how self-tracking devices change the patient-physician relationship, and how the gamification of healthcare affects the way we see our bodies. Cross disciplinary, it will be relevant across students and researchers of sociology, psychology, anthropology and cultural studies, as well as professionals in the field

Routledge

## Digital Transformation in Healthcare

An Ecosystem Approach

**Panos Constantinides**

In an era of digital transformation within healthcare management, this important book outlines an ecosystem perspective to illustrate how a range of actors can use digital technologies to offer better value within the provision of healthcare services. Covering key issues such as patients' rights to data and written in the aftermath of the Covid-19 pandemic, the book will be essential reading for researchers, postgraduate students, and professionals interested in how technology can support and enable healthcare service provision.

## The Digital Transformation of the Healthcare System

Healthcare 5.0

**Katarzyna Kolasa**

This book examines how the digital revolution has reorganized the model of healthcare during the COVID-19 pandemic and argues for a continued paradigm shift to digital healthcare. Illuminating the mindset shift needed to transform healthcare and outlining in detail a futuristic vision of healthcare 5.0, this book will be of interest to academics and professionals of health policy, health economics and digital health.

## Biostatistical Methods and Applications in Health Research

A Case Study Approach

Edited by **Vivek Verma**, **Hafiz T.A. Khan**, **Dilip C. Nath**, **Kenneth C. Land**

Supported by real-world case studies, this essential textbook provides a detailed overview of the use of biostatistical tools and methods, enabling students and researchers to undertake their own research with confidence and understanding. Written by a team of experts with extensive teaching experience in this field, this is the ideal textbook for graduate students and researchers across the biomedical sciences, from Public Health to Epidemiology to Clinical Medicine.

## Conducting an Observational Epidemiological Study

From Idea to Publication

**Sarah Cuschieri**

This concise, user-friendly book provides an accessible guide for anyone wishing to pursue an epidemiological study. It provides the essential tools to understand what epidemiology is, how to choose the correct observational study design for a research question, and how to collect or access data to conduct the study. Following this, and central to the book, is step-by-step case study on how to conduct a cross-sectional project. Concluding by guiding readers from conducting the research to publishing its findings, this is the ideal companion to students, researchers or healthcare professionals approaching epidemiological research for the first time.

## Decoding the Pandemic

Unveiling the Hidden Depths of the COVID-19 Iceberg

**Wen-Ta Chiu**, **Jonathan Wu**

This comprehensive analysis of COVID-19 draws on the Iceberg Framework—a modified systems thinking model—to examine the deeper forces that shaped the pandemic's trajectory, from structural inequities and institutional fragility to shifting mental models and global behavioral patterns. Timely, accessible, and analytically rigorous, Decoding the Pandemic is essential reading for students, researchers, and practitioners in public health, epidemiology, global health policy, and systems science—anyone seeking to understand not just what happened, but why, and what must change before the next pandemic arrives.

3RD EDITION

## Epidemiology

Study Design and Data Analysis, Third Edition

**Mark Woodward** University of Oxford, UK; University of Sydney, Australia; and Johns Hopkins University, Baltimore, Maryland, USA, **Mark Woodward**

Series: *Chapman & Hall/CRC Texts in Statistical Science*

Updated and expanded, this popular text focuses on the quantitative aspects of epidemiological research. It shows students how statistical principles and techniques can help solve epidemiological problems. Along with more exercises and examples using both Stata and SAS, this third edition includes a new chapter on risk scores and clinical decision rules, a new chapter on computer-intensive methods, and new sections on binomial regression models, competing risk, information criteria, propensity scoring, and splines. Supporting materials are available on the book's CRC Press web page.

## Making Sense of Epidemiological Research

A Student's Guide

**Katherine W. Reeves**

Using clear language and real-world examples, this accessible textbook provides a concise guide to the understanding and critical evaluation of journal articles in Epidemiology. Written by an experienced instructor with over 15 years of experience teaching, and including activities so that readers can practice the skills they learn, this will be essential reading for any student of Epidemiology, Public Health and Medicine.

## Managing and Preventing Pandemics

Lessons From COVID-19

**Roberto De Vogli**

Using an evidence-based, critical, population health approach, this book provides a comprehensive, critical analysis of the key errors and most effective interventions to contain the COVID-19 pandemic. It also examines the root determinants of pandemic risk on a global scale and addresses the policy changes to be implemented to prevent future health crises.

## Reading and Understanding Health Research

A Critical Approach

**Robert R. Weaver**, **Qian Jia**

This concise guide equips readers with the essential skills required to analyze and critically appraise health research evidence, an integral element to evidence-based practice and professional development. Ideal reading for students across all health disciplines, whether undergraduate or postgraduate, it will also be a valuable resource for health professionals seeking to enhance their skills in evidence-based practice and continuing professional development. Instructors can also access a range of online resources to support classroom use.

## SARS-CoV2 (COVID-19) Pandemic Control and Prevention

An Epidemiological Perspective

**Laurens Holmes, Jr.** Nemours Healthcare System, Wilmington, Delaware, USA

This is the first comprehensive text to provide not only a detailed explanation of how the SARS-CoV2 (COVID-19) virus is spread within human populations, but also an epidemiological analysis and interpretation of viral pandemic to enable better measures for preventions and control. Also providing invaluable guidance on how future iterations of this pandemic may be better prevented and controlled, this will be a defining book for students, researchers and professionals within Public Health and Clinical Medicine to better understand the SARS-CoV2 (COVID-19) virus, and how to protect the most vulnerable social groups.

## Vaccination Programmes

Epidemiology, Monitoring, Evaluation

**Susan Hahné** National Institute for Public Health and the Environment, the Netherlands, **Kaatje Bollaerts** P-95, Belgium, **Paddy Farrington** Open University, UK

Vaccination programmes are of vital importance to public health and are present in virtually every country in the world. By promoting an understanding of the diverse effects of vaccination programmes, this textbook discusses how epidemiologic methods can be used to study, in real life, their impacts, benefits and risks. The book is aimed at all those involved in the many aspects of vaccination programmes, including public health professionals and epidemiologists. Its primary target audiences are master and doctoral students in infectious disease epidemiology.

## Program Evaluation

A Primer for Effectiveness, Quality, and Value

**Arlene Fink**

This book provides students and practitioners with the tools and skills needed to evaluate social and policy programs across a range of disciplines - from public health to social work to education - enabling the allocation of scarce human and financial resources to advance the health and well-being of individuals and populations. The chapters include methods for selecting and justifying evaluation questions or hypotheses, designing evaluations, sampling participants, selecting information sources, and ensuring reliable and valid measurement. The final section of the book is focused around managing and analyzing data and transparently reporting the results.

## Treatment Program Evaluation

Public Health Perspectives on Mental Health and Substance Use Disorders

**Allyson Kelley**

This invaluable text provides a rigorous guide to the assessment and evaluation of substance misuse programs through a multi-disciplinary, holistic model of care. It highlights issues of race, social justice and health equity, and offers real-world guidance to effect community healing and transformation. In an era where substance misuse has reached epidemic proportions in the US and beyond, this book will be essential reading for anyone involved in public health policy and practice in this important area.

2ND EDITION

## Nutrition in Public Health

Principles, Policies, and Practice, Second Edition

**Arlene Spark**, **Lauren M. Dinour**, **Janel Obenchain**

This book provides an overview of the field and focuses on the role of the Federal Government in determining nutrition policy and practice. Beginning with a review of the definition and principles of public health, the book examines trends in the US population and nutritional epidemiology. It considers programs to help reduce disparities in the prevalence of diet-related chronic diseases among various populations, as well as a detailed chapter on obesity with discussions on global impact and cost, pediatric obesity, and the impact of socioeconomic status and ethnicity. Specific information is included on breastfeeding mothers, HIV/AIDS, and prison inmates.

## Decolonizing Healthcare Innovation

Low-Cost Solutions from Low-Income Countries

**Matthew Harris** Imperial College London, UK

This fascinating book offers a pathway for the NHS to adopt low-cost but effective innovations from areas of the world traditionally seen as beneficiaries rather than providers of help and support. In an era of increasing demand and dwindling resources, and where the Covid-19 pandemic has illustrated the structural limitations of the current system, the book provides examples of simple, frugal but high-quality alternatives to current practice. The volume will be essential reading for students and scholars across Public Health, Global Health and Development Studies, as well as healthcare managers and policy makers in the UK and beyond.

## One World Health

An Overview of Global Health

**Nigel Crisp** House of Lords and All Party Parliamentary Group on Global Health, London, UK

This brand new textbook presents a new approach to the teaching and understanding of global health. It describes the shared opportunities but also the problems that we all face, wherever we live, and the particular needs of the poorest people in every society. Covering subjects from epidemics and climate change, the need to staff and resource health services appropriately, the rich potential of science and technology, and the impacts of social and political change in the world around us, all is presented at a level appropriate for the student looking to gain an understanding of this broad and developing area.

## Health Care Economics

**John B. Davis , Robert McMaster** University of Glasgow, UK

Series: *Routledge Advances in Social Economics*

This book places care at the centre of an economics of health, showing how essential it is that care is appropriately recognised in policy as a means of enhancing the dignity of the individual. Drawing upon care theory from feminist works, philosophy, nursing and medicine, and political economy, the authors develop a health care economics with a moral basis in health care systems. In providing deeper insights into the nature of care and caring, this book seeks to redress the shortcomings of the standard approach and to contribute to the development of a more person-based approach to health and medical care in economics.

## Understanding Health, Illness and Society

A Patient-Centred Approach to Healthcare

**Alexis Paton**

This accessible book shows how social structures and social norms shape both individual and collective health. It provides readers with an insightful understanding of the relationship between society, health and illness, and highlights issues to inform a progressive, patient-centred approach to contemporary healthcare. Guided by the fundamental principle that everything in a society has some effect or impact upon its health, and assuming no prior knowledge of the social sciences, this is the ideal book for healthcare students across nursing, medicine, midwifery and pharmacy, as well as anyone interested in the relationship between health and society.

## Women's Health and Corporate Marketing

Our Bodies, Their Business

Edited by **Mary Hunter**

This compelling collection of essays examines how historically significant marketing schemes have profoundly impacted women's health and healthcare across the world. Written by scholars and activists from a range of disciplines, including law, sociology and the health sciences, the book spotlights a range of products that have had a damaging impact on women's health, unpicking the values and assumption engrained within the marketing campaigns which promoted them. A powerful critique of the unethical and paternalistic approach of some corporations, this book will find readers among students in Public Health, Allied Health, Gender Studies, Sociology and beyond.

## An Introduction to Global Health Ethics

Edited by **Andrew Pinto** St Michael's Hospital, Toronto, Ontario, Canada, **Ross Upshur** University of Toronto, Ontario, Canada

Global health is beset by ethical dilemmas surrounding issues such as health inequalities, power differentials, cultural competence, informed consent, and ethics of research. Presenting a solid theoretical foundation for global health work, this text supports students in understanding key areas of concern, ensuring that they are able to practise ethically worldwide. Written in an accessible manner, the book draws on political economy, human rights, and indigenous research methods, as well as cases in clinical work. Designed to encourage further inquiry, it includes discussion questions, lists of recommended resources, and suggested reading.

## Globalization, Health and the Global South

A Critical Approach

**Jimoh Amzat , Oliver Razum**

Globalization is a form of social change, reshaping the socio-spatial milieu in which human strive, and in which health and disease are managed and controlled. And yet the effects of globalization are distributed unevenly, with opportunities open for some but not for all. Including further reading and end of chapter discussion questions, this essential textbook will be important reading for students across the health social sciences.

## Understanding Public Health in Africa

Issues and Cases

**David Mulenga**

This innovative textbook, written by an author based in Zambia, provides an invaluable perspective on the key public health issues facing Africa today. With each chapter providing examples and case studies to illustrate the issues, success stories and innovative approaches being taken in countries such as Tanzania, Uganda, Kenya, Malawi and Nigeria, this unique book will fascinate students of Public Health, Global Health, African Studies and beyond.

## Public Health in Postcolonial Africa

The Social and Political Determinants of Health

*Edited by* **Olukayode Faleye** Edo State University Uzairue, Nigeria, **Tanimola Akande** , **Innocent Moyo** University of Zululand, South Africa

This fascinating, multi-disciplinary collection examines how public health interventions in postcolonial Africa mirror wider manifestations of power in the region. Offering a fresh and insightful understanding of health issues in this important global region, and including chapters on issues around the Covid-19 pandemic, the book will interest students and researchers across a range of disciplines, including Global Health, Politics and African Studies.

## Public Health in Sub-Saharan Africa

Social Epidemiological Perspectives

*Edited by* **John Fulton** , **Philip Emeka Anyanwu** , **Catherine Hayes** University of Sunderland, UK, **Jonathan Ling**

This fascinating collection shines a social epidemiological spotlight onto the key public health issues effecting sub-Saharan Africa today. Beginning with the legacy of colonial rule, the book outlines the complex interplay between population health and a range of social, economic and cultural factors. It shows how social epidemiological methods can offer a deeper understanding of population health, and features chapters on a range of infectious diseases which continue to have a devastating impact on the region, including Sickle Cell Disease, HIV /AIDS, Leprosy and Ebola.

## Health Policy

Critical and Comparative Perspectives

**Iain Crinson**

This important new textbook provides comparative and critical analysis of healthcare policy from high income states in Europe to low-income countries in the Global South. Each chapter includes case studies, historical contexts, and summaries of the key policy. Detailed and clearly written, it is the ideal text for students across the health and social sciences in this important area.

4TH EDITION

## Project Management in Health and Community Services

A contemporary guide to practice

**Zhanming Liang , Valerie Thiessen , Judith Dwyer**

The new edition of this best-selling text presents the tools and techniques for effectively managing every kind of development and change in health and community services, while also balancing the needs of a range of stakeholders. It offers practical, problem-solving strategies based on real-life scenarios. Written by highly experienced authors, and underpinned by the latest research, this enlightening and practical guide is an essential resource for anyone studying or working in health and community services.

## Public Health Leadership

Strategies for Innovation in Population Health and Social Determinants

**Richard Callahan , Dru Bhattacharya**

With a practice-based approach, this book presents cutting-edge topics in healthcare and public health, drawing on the premise that there is no single perspective or stakeholder. The work demonstrates the complexity of intersecting interests and responsibilities in a graspable way, and includes case studies contributed by leading experts. Topics include cross-sector partnership-building, innovations in investment strategies, quality control in service delivery, globalization and risk management, performance management, advances in big data tracking, social determinants, and so much more.

## Applied Biostatistical Principles and Concepts

Clinicians' Guide to Data Analysis and Interpretation

**Laurens Holmes, Jr.** Nemours Healthcare System, Wilmington, Delaware, USA

This book provides practical knowledge to biomedical researchers using biological and biochemical specimen/samples in order to understand health and disease processes at cellular, clinical, and population levels. Concepts and techniques provided will help researchers design and conduct studies, then translate data from bench to clinics in attempt to improve the health of patients and populations. This book presents the extreme complexity of epidemiologic research in a concise manner that will address the issue of confounders, thus allowing for more valid inferences and yielding results that are more reliable and accurate.

2ND EDITION

## Biostatistics for Clinical and Public Health Research

**Melody S. Goodman** Washington University School of Medicine, Division of Public Health Sciences, St. Louis, Missouri, USA

The new edition of Biostatistics for Clinical and Public Health Research is the only introductory workbook to provide not only a concise overview of key statistical concepts but also step-by-step guidance on how to apply these through a range of software packages, including R, SAS, and Stata. Ideally suited to accompany either a course or as support for independent study, this book will be an invaluable tool for both students of biostatistics and clinical or public health practitioners.

Routledge  
August 2025 : 622pp

## Biostatistics in Public Health Using STATA

**Erick L. Suárez** School of Public Health, University of Puerto Rico, San Juan, USA, **Cynthia M. Pérez**, **Graciela M. Noguera**, **Camille Moreno-Gorrín**

Striking a balance between theory, application, and programming, Biostatistics in Public Health Using STATA is a user-friendly guide to applied statistical analysis in public health using STATA version 14. Each chapter is based on one or more research problems linked to public health. Additionally, every chapter includes exercise sets for practicing concepts and exercise solutions for self or group study. Several examples are presented that illustrate the applications of the statistical method in the health sciences using epidemiologic study designs.

2ND EDITION

## Complex Interventions in Health

An Overview of Research Methods

*Edited by* **David A. Richards** University of Exeter, UK, **Ingaliil Rahm Hallberg** Lund University, Sweden, **Carole Estabrooks**, **Sascha Köpke**, **Gabriele Meyer**, **Lars Wallin**, **Yvonne Wengström**, **Joanne Woodford**

Extensively updated in light of the UK Medical Research Council's (MRC) latest guidance on complex intervention research methods in health and social care, this important book provides the most comprehensive resource available to understand and apply the range of methodologies available to researchers and practitioners today. With a renewed focus on the context of complex interventions, including concise summaries of the latest thinking, this is essential reading for any researcher or practitioner in health and social care.

Routledge  
March 2026 : 420pp

2ND EDITION

## Critical Thinking Skills for Healthcare

A Student's Guide

**Stephanie Mckendry**

The new edition of Critical Thinking Skills for Healthcare is the ideal text to foster this key attribute, supporting students to critically evaluate information and evidence on their journey from healthcare student to healthcare practitioner. Concise and user-friendly, this is the perfect textbook for students across the healthcare disciplines, including nursing, midwifery and allied health, as well as those returning to practice after a period away.

2ND EDITION

## A Researcher's Guide to Using Electronic Health Records

From Planning to Presentation

**Neal D. Goldstein**

In an age when electronic health records (EHRs) are an increasingly important source of data, this essential textbook provides both practical and theoretical guidance to researchers conducting epidemiological or clinical analysis through EHRs. Supported by case studies throughout, and applicable across a range of research software programs (including R, SPSS and SAS), this is the ideal text for students and researchers engaging with EHR across epidemiological and clinical research.

Routledge

## Biostatistical Methods and Applications in Health Research

A Case Study Approach

*Edited by* **Vivek Verma, Hafiz T.A. Khan, Dilip C. Nath, Kenneth C. Land**

Supported by real-world case studies, this essential textbook provides a detailed overview of the use of biostatistical tools and methods, enabling students and researchers to undertake their own research with confidence and understanding. Written by a team of experts with extensive teaching experience in this field, this is the ideal textbook for graduate students and researchers across the biomedical sciences, from Public Health to Epidemiology to Clinical Medicine.

## Reading and Understanding Health Research

A Critical Approach

**Robert R. Weaver, Qian Jia**

This concise guide equips readers with the essential skills required to analyze and critically appraise health research evidence, an integral element to evidence-based practice and professional development. Ideal reading for students across all health disciplines, whether undergraduate or postgraduate, it will also be a valuable resource for health professionals seeking to enhance their skills in evidence-based practice and continuing professional development. Instructors can also access a range of online resources to support classroom use.
